ABSTRACT

AUTHOR: LTC (P) Terry R. Council, Oklahoma Army National Guard
LTC (P) Austin R. Omlie, United States Army

TITLE: Requirements Assessment and Integration of the United States Army Reserve and the Army National Guard into the Army Acquisition Corps

FORMAT: Strategy Research Project

DATE: 15 May 1997 PAGES: 340 CLASSIFICATION: Unclassified

In order to comply with the provisions of Public Law 101-150, Title XII, the Defense Acquisition Workforce Improvement Act (DAWIA), the Department of the Army is required to integrate the United States Army Reserve (USAR) and Army National Guard (ANG) components as functional elements of the Army Acquisition Corps. Amidst the ongoing Department of Defense acquisition reform initiatives, budgetary reductions, and system development and force restructuring, the progress towards achieving this integration goal has been ambiguous. This research effort investigated numerous subjects pertaining to the relative scope and requirements of potential USAR/ANG acquisition-related activities; identified skill qualifications and personnel management issues; evaluated statutory provisions and potential waiver requirements; and addressed USAR/ANG implementation plan(s).

I. INTRODUCTION

The past seven years have seen dramatic changes to virtually every facet of our nation's defense establishment, and assuredly, those surrounding the components of the United States Army. Of greatest significance is the demise of the former Soviet Union and its Eastern Bloc, which for nearly 40 years served as the predominant threat that our military establishment was postured to confront. We are now confronted by domestic and international environments characterized by both uncertainty and rapidly changing circumstances. The post-Cold War era has set evolutionary courses into motion, most notably reduced levels of overall funding, especially in research, development, and acquisition; the downsizing and proposed restructuring of our forces; review and reform of the regulations and various processes by which the components of the Department of Defense (DoD) function; and a tremendous growth in the frequency and magnitude of troop deployments in "peacekeeping and peace monitoring roles." The initiation of the Congressionally mandated "Quadrennial Defense Review" in January 1997, undertakes a universal assessment of our nation's military needs for the 21st century and will certainly entail further changes throughout all of the DoD.

The Army vision of its "Force XXI" in meeting the challenges of the next century requires changing aggressively, questioning all past assumptions, and leveraging technology in order to become more efficient and effective. Force XXI projects the quality soldiers of the total Army into the 21st century by providing them the right doctrine and organizations, the most realistic training, and adequate and predictable

sustainment package during both peace and war, and the best equipment and weapons systems. General Dennis J. Reimer, Chief of Staff of the Army, has stated "...Presently, our force mix is not in balance with the demands of sustaining the effort across the spectrum of military operations around the globe. Meeting these new challenges without assuming unacceptable risk will require reshaping the total Army—Active, Guard, and Reserve—and the complementary roles that they play. Our Army must not only win multiple, high tech, mid-to-high intensity conflicts, but also meet the growing demands for reassurance and support."¹

To achieve these aforementioned objectives, the continued modernization of our weapons and other systems, and the equipping of the force must be accomplished as a "total Army team." Accordingly, each of its components must avidly embrace new philosophies, new processes, and new relationships in becoming a "total Army Acquisition Corps." Recognizing the requirements of the Defense Acquisition Workforce Improvement Act, this research effort has investigated numerous aspects pertaining to the relative scope of acquisition-related activities and requirements for the integration of elements of the United States Army Reserve (USAR) and the Army National Guard (ARNG) into the Army Acquisition Corps.

II. BACKGROUND TO DEFENSE ACQUISITION REFORM

Over the past 30 years the DoD has experienced various efforts seeking to improve aspects of the acquisition system. Both the executive and legislative branches have identified the need for overall change to various aspects of defense acquisition, ranging from the Fitzhugh Commission (President Nixon's Blue Ribbon Defense Panel, July 1969), the Goldwater-Nichols Department of Defense Reorganization Act of 1986, and the implementation of recommendations from the President's Blue Ribbon Commission on Defense Management of 1986, better known as the "Packard Commission."² Most initiatives had focused on changes in acquisition policy, procedures, and processes, with little address of the management and organizational structure of the acquisition arena and virtually no focus on the DoD acquisition workforce. The Packard Commission was one of the first reviews that truly assessed the quality and issues pertaining to personnel, describing the DoD workforce as "...Compared to its industry counterparts, this workforce is undertrained, underpaid, and inexperienced...It is vitally important to enhance the quality of the defense acquisition workforce, both by attracting qualified new personnel and by improving the training and motivation of current personnel."³ Perhaps even more significant was the Commission's position regarding Congress' role in the acquisition process:

Chances for meaningful improvement will come not from more regulation but only with major institutional change. Common sense must be made to prevail alike in the enactments of Congress and the operations of the Department. We must give acquisition personnel more authority to do their jobs. If we make it possible for people to do the right thing the first time and allow them to use their common sense, then we believe that the Department can get by with far fewer people.⁴

Furthermore, the Commission recommended that clear accountability be established for acquisition execution along with “business-related education and experience criteria...which will provide a basis for the professionalism of their career paths.”⁵ The recognition of existing acquisition personnel qualifications and identification of acquisition-related functions became a fundamental part of impending legislation and most certainly is applicable to the proposed integration of subject USAR and ARNG personnel into the “total Army Acquisition Corps.”

In July 1989, Secretary of Defense Richard Cheney in DoD’s Defense Management Review (DMR) reported similar problems in the workforce and recommended a series of specific management initiatives to improve the acquisition process and more effectively manage DoD resources. Amidst the ongoing concern over the growing complexity and cost of DoD systems, their procurement, and the results of prior studies, Congress tasked the House Armed Services Committee to conduct an in-depth study of the DoD acquisition community. The subject study was exhaustive in nature and examined the levels of education, tenure of employment, experience levels, and training of the various elements of the DoD acquisition workforce. Its overall conclusions substantiated the findings and recommendations of previous studies, and indicated that significant changes were warranted in order to improve the qualifications, morale, and efficiency of the DoD acquisition workforce.⁶

III. DEFENSE ACQUISITION WORKFORCE IMPROVEMENT ACT

GENERAL

In response to the persistent criticisms of the DoD acquisition structure and process, Congress enacted as a part of the Fiscal Year 1991 National Defense Authorization Act, the Defense Acquisition Workforce Improvement Act (DAWIA, H.R. 4739, Public Law 101-510, Title XII, 104 Stat 1656, Sections 1201-1211, codified in 10 U.S. Code 1701-1764) on 5 November 1990. The legislation, also known as the Mavroules Act (after its major proponent, Representative Nicholas Mavroules) represents a formal attempt to finally professionalize DoD's acquisition workforce by establishing education, training, and experience requirements over a three-year period, beginning 1 October 1991.

Fiscal year 1994 was the first year in which all of the act's provisions and requirements were to be mandatory throughout the DoD. The act permitted DoD officials to waive specific qualification requirements on two conditions: (1) unusual circumstances justify the waiver, or (2) the individual's qualifications obviate the need for meeting the requirements. Additionally, the Government Accounting Office was to conduct annual audits and submit reports to Congress on the individual military department's compliance and waiver requests to the DAWIA.⁷

STATUTORY PROVISIONS

For the purpose of our research we examined five subchapters of the DAWIA: General Authorities and Responsibilities, Defense Acquisition Positions, Acquisition

Corps, Education and Training, and General Management Provisions. A summary of the major aspects of each subchapter follows.

SUBCHAPTER I - GENERAL AUTHORITIES AND RESPONSIBILITIES

(a) Section 1701. Management policies: directs the Secretary of Defense to establish policies and procedures for the management of persons assigned to acquisition positions in the DOD. The management of these personnel includes their accession, education, training, and career development. Furthermore, the Secretary is required to “ensure that, to the maximum extent practicable,” all workforce policies and procedures established are “uniform in their implementation throughout the DOD.”

(b) Section 1704. Service acquisition executives; authorities and responsibilities: designates the Assistant Secretary of the Army for Research, Development, and Acquisition as service acquisition executive for the “Total Army,” who is given full authority to “carry out all powers, functions, and duties” of the Secretary of the Army concerning the acquisition workforce and ensure that the policies of the Secretary of Defense established in accordance with the DAWIA are implemented throughout the three components of the Army.

SUBCHAPTER II - DEFENSE ACQUISITION POSITIONS

(a) Section 1721. Designation of acquisition positions: requires the Secretary of Defense to designate acquisition positions in regulations, and as a minimum, all acquisition-related positions in the following areas must be included: (1) Program management; (2) Systems planning, research, development, engineering, and testing;

(3) Procurement, including contracting; (4) Industrial management; (5) Logistics; (6) Quality control and assurance; (7) Manufacturing and production; (8) Business, cost estimating, financial management, and auditing; (9) Education, training, and career development; (10) Construction; and (11) Joint development and production with other government agencies and foreign countries.

(b) Section 1722. Career development: requires the Secretary of Defense to establish and publish career paths for both civilians and military personnel who wish to pursue acquisition as a career. These are identified in terms of the education, training, experience, and assignments necessary for career progression of both civilians and military personnel to the most senior acquisition positions. Additionally, the Secretary is required to identify and justify acquisition positions that may only be filled by military personnel. Furthermore it requires "a substantial increase in the proportion of civilians (as compared to armed forces personnel) serving in critical acquisition positions in general."⁸

(c) Section 1723. General education, training and experience requirements: requires that the Secretary of Defense "establish education, training, and experience requirements for each acquisition position that are based on the level of complexity of duties carried out in the position."⁹ The required implementation date was no later than 1 October 1993. Additionally, not more than one year of academic training or education in acquisition may be credited toward satisfying the experience requirements established by this chapter.

(d) Section 1724. Contracting positions: qualification requirements: establishes the minimum experience and civilian education requirements for personnel serving as

contracting officers in acquisition positions (that award or administer contracts for amounts above the small purchase threshold) on or after 1 October 1993.

SUBCHAPTER III - ACQUISITION CORPS

- (a) Section 1731. Acquisition Corps: in general: requires the Secretary of Defense to establish an Acquisition Corps for each of the military departments.
- (b) Section 1732. Selection criteria and procedures: establishes eligibility and selection criteria for membership in the Acquisition Corps.
- (c) Section 1733. Critical acquisition positions: requires the Secretary to designate and publish a list of all critical acquisition positions (CAP). These positions are required to be filled by GS-14 or above (including SES) for civilian positions, and by lieutenant colonel or above for military positions.
- (d) Section 1734. Career development: requires that all personnel assigned to a CAP must remain in that position for a minimum of three years unless waivered by the Secretary of the Army. Additionally, the Secretary of the Army, acting through the service acquisition executive, “is responsible for making assignments of civilian and military members of the Acquisition Corps...to critical acquisition positions.”¹⁰
- (e) Section 1735. Education, training and experience requirements for critical acquisition positions: establishes the education, training, and experience requirements for program managers, deputy program managers, program executive officers, general officers, flag officers, civilians in equivalent positions, and senior contracting officials.

SUBCHAPTER IV - EDUCATION AND TRAINING

This subchapter provides for several educational assistance programs in order to facilitate its emphasis on improving the overall educational standards of the acquisition workforce. It provides for an intern program, a cooperative education program, a scholarship program, a tuition reimbursement program, and lastly, one which will repay student loans.

SUBCHAPTER V - GENERAL MANAGEMENT PROVISIONS

(a) Section 1761. Management information system: requires the Secretary of Defense to prescribe regulations to insure that the military departments establish a management information system that provides standardized information on personnel in acquisition positions.

(b) Section 1762. Report to Secretary of Defense: requires the Under Secretary of Defense for Acquisition to submit an annual report to the Secretary of Defense on the general status of the defense acquisition workforce from 1991 through 1998. The report includes the number of acquisition positions that are restricted to military personnel only and which ones are vacant, the total number of personnel serving in the Acquisition Corps broken down by civilian and military by grade level and specialty, the total number of CAPs broken down by civilian and military, the promotion rates for officers in the Acquisition Corps as compared to other functional areas, the number of times that a waiver for any requirement relating to the acquisition workforce was granted, the number of employees certified by an acquisition career program board, and many other items of information regarding the status of the acquisition workforce.

IV. ARMY ACQUISITION CORPS

GENERAL

The Army Acquisition Corps (AAC) was formally established in January 1989, in response to the recommendations and direction contained in Secretary of Defense Cheney's submission of the DMR to the president in July 1989 and the impending DAWIA legislation. The DMR required each of the Services to establish a dedicated corps of military acquisition specialists whose career development would provide the proper blend of operational and acquisition experience.¹¹ The Congressional intent to initiate the first stages of acquisition reform was obvious. The DMR even prescribed the key tenets that members of the "acquisition corps" were to possess (Figure 1).¹² Although the original AAC has grown to include civilian members, philosophically, these tenets should reflect the attributes of all members, to include potential members of the USAR and ARNG.

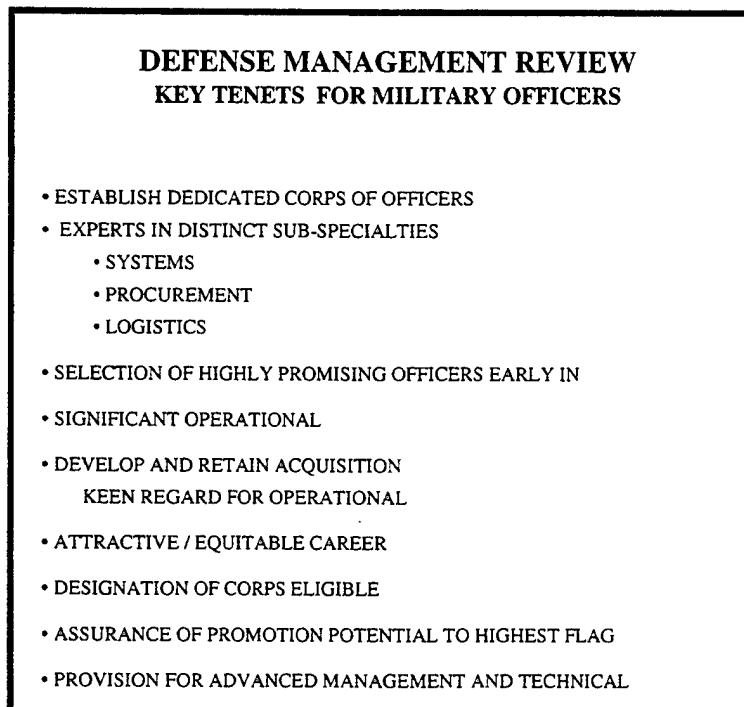

Figure 1. Acquisition Corps tenets.

A joint announcement from the Army Chief of Staff and the Secretary of the Army, stated “(the AAC) would provide a corps of dedicated professionals who are experts in systems development and procurement...and would integrate education, training, experience, selection, and promotion processes for all military and civilian members of the acquisition corps.”¹³ At that time, an Army pamphlet reflected the charter of the AAC as:

The Army depends on the quality of its material and weapons systems to meet its national security responsibilities. It is imperative that our development and acquisition processes permit us to exploit fully the great promise of American technology while at the same time maintaining the streamlined and efficient management structures. In light of this, the Army Acquisition Corps was formed to attract, select, develop and retain the most capable members of the workforce to fill our critical acquisition positions.¹⁴

Over the course of the next eight years, the AAC evolved to meet the growing modernization requirements of the Army. The current vision of the AAC is presented in Figure 2.¹⁵

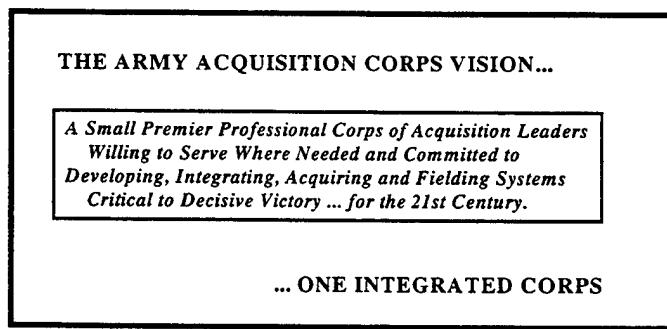

Figure 2. Army Acquisition Corps vision.

As with most other organizations throughout the Army, the AAC has also been dramatically impacted by the effects of the overall downsizing within the DoD. A historical trace of this evolution would serve no purpose at this time. However, over the

past year, there have been significant modifications to both the structure and policies of the AAC. Accordingly, the *status quo* of the AAC will be presented to serve as a benchmark from which proposed implementation plans, recommendations and conclusions for the integration of respective USAR and ARNG components into the AAC will be based.

STRUCTURE

The AAC is a sub-component of the Army Acquisition Workforce (AAW). The AAW is comprised of all those personnel, both within the active Army and the Department of the Army civilian force structure, that are performing acquisition-related functions and missions. These range from basic research and system development to contracting for supplies, facilities, and services for life-cycle support of weapons and other systems which enable our soldiers to perform their various missions. Differences between membership in the AAW and the AAC are defined by DoD Instruction 5000.58, *Defense Acquisition Workforce*. (This differentiation will be taken into consideration when the respective military and civilian members of the USAR and the ARNG (particularly those with individual state and territory employment status) are addressed later in this paper.)

Acquisition Workforce - The personnel component of the acquisition system. The acquisition workforce includes permanent civilian employees and military members who occupy acquisition positions or assignments, who are members of an Acquisition Corps, or who are in acquisition development programs. The Army maintains a Civilian Acquisition Position List (CAPL) which is a listing of all the authorized civilian positions throughout the Army that provide direct support to the Army's acquisition mission: these encompass all of the AAW positions.¹⁶

Acquisition Corps - A subset of the acquisition workforce, composed of selected military officers in grades O-4 or above and civilian personnel in grades GS-13 or above, who are acquisition professionals. There is an Acquisition Corps for each military Department and one for all other DoD components (including the OSD and the Defense Agencies). Individuals must meet the requirements established by law to become an Acquisition Corps member.¹⁷

As the CAPL comprises all authorized civilian positions throughout the AAW, a Military Acquisition Position List (MAPL) exists for those associated military positions. In both cases, positions are validated on an annual basis by a review board and approved by the Director, Acquisition Career Management (DPCM). The composition of the CAPL is facilitated by the Acquisition Position Review System (APRS) which provides organizations throughout the acquisition community to electronically access, review, and submit their position data.¹⁸ Currently authorized positions and personnel strengths of the CAPL and MAPL are presented in Figures 3 and 4, respectively.¹⁹

Army Acquisition Workforce (Positions)

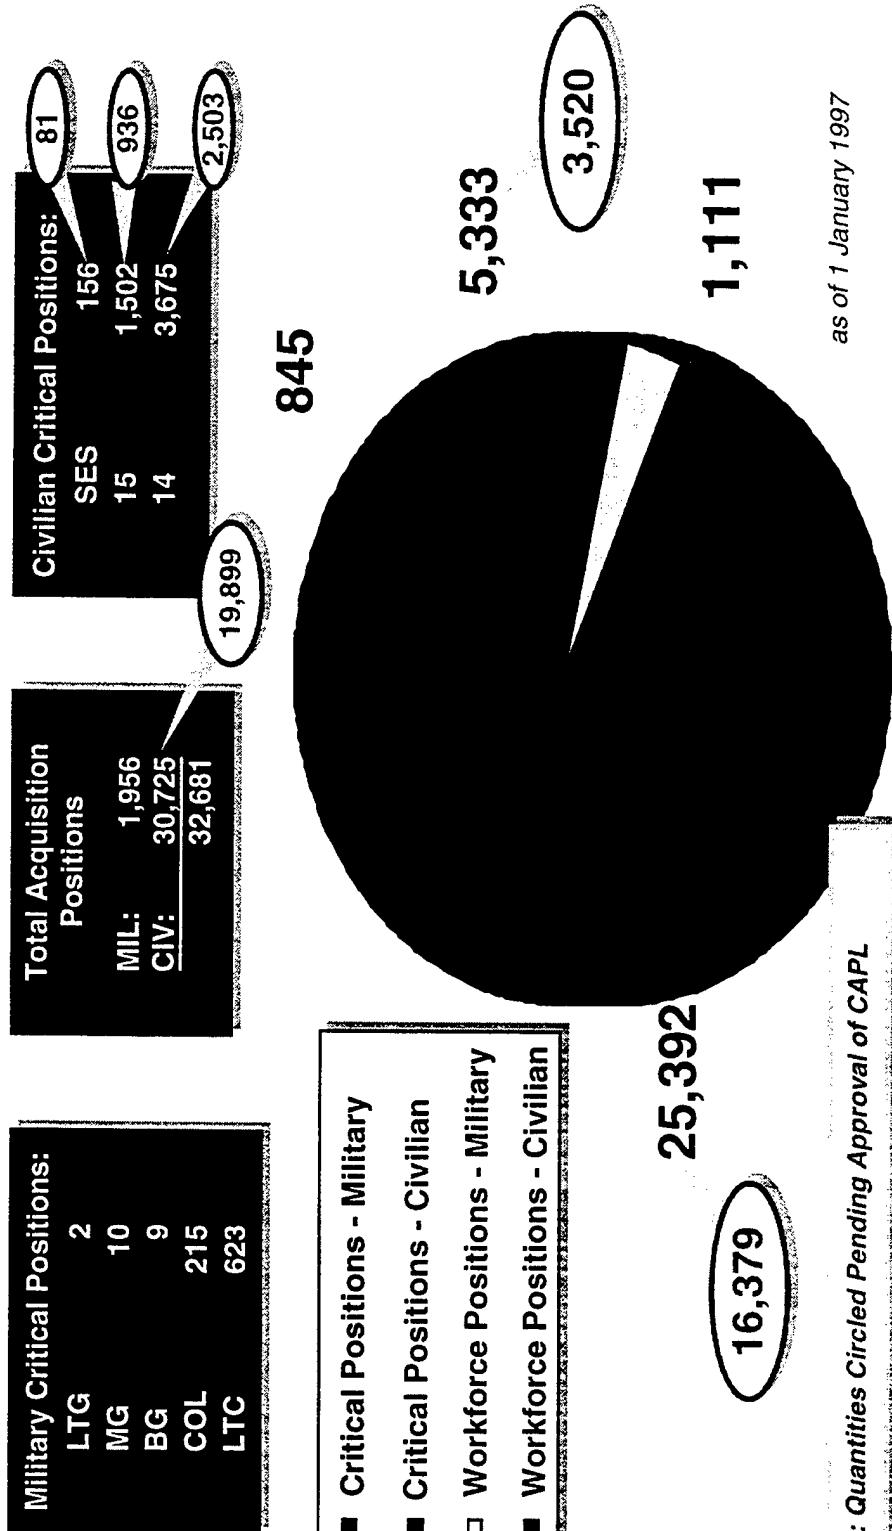

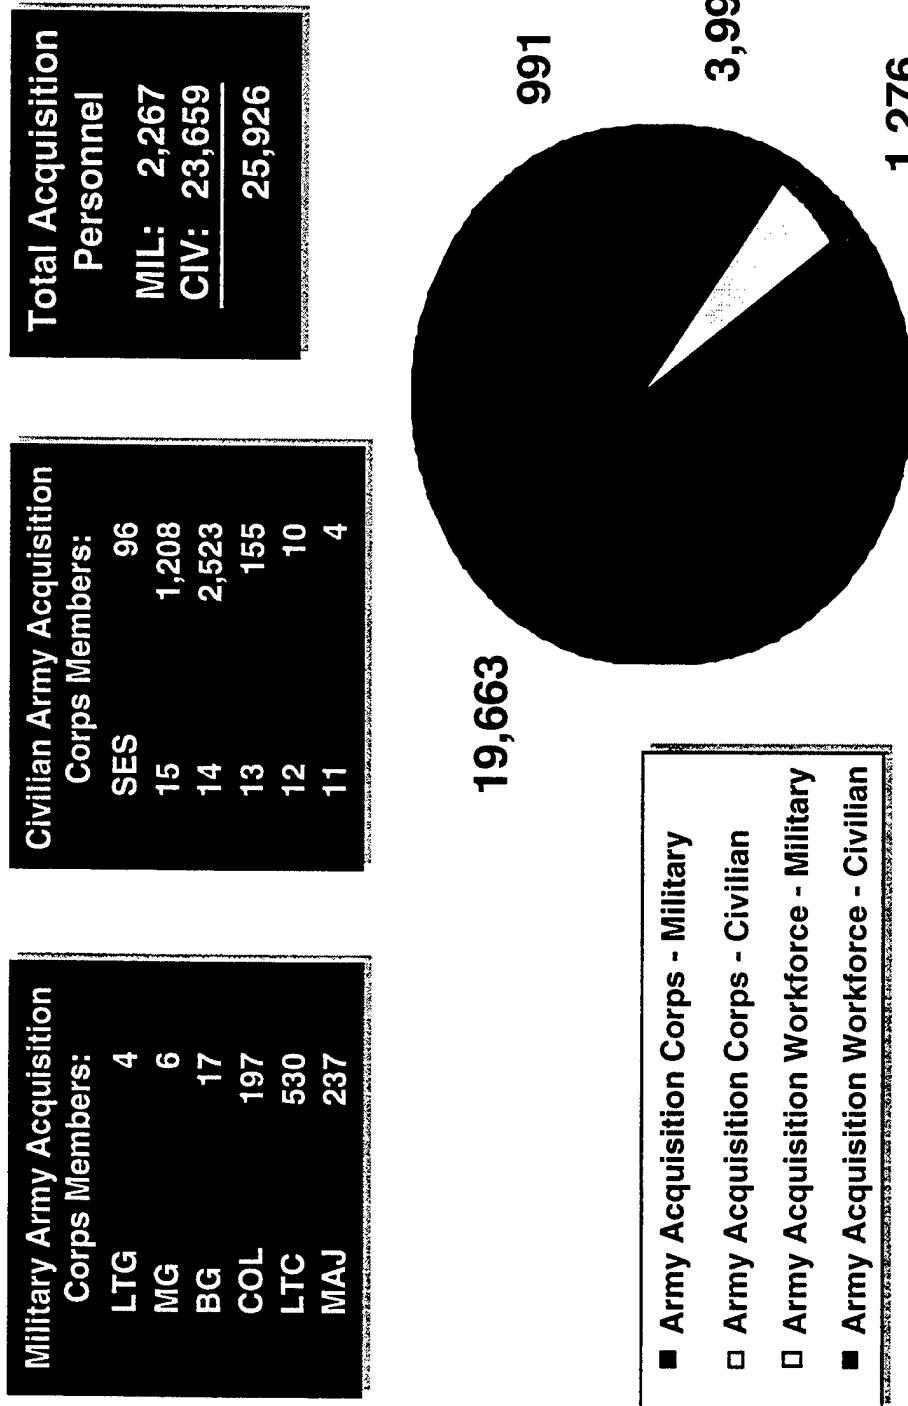

Figure 3.

Army Acquisition Workforce (Personnel)

as of 1 Jan 97

Figure 4.

As the Army has been downsized, the overall strength of the active-duty commissioned officer authorizations within the AAC has been programmed for reduction. A previously approved glidepath for MAPL reductions is presented in Table 1.²⁰

	<u>FY92</u>	<u>FY95</u>	<u>FY96</u>	<u>FY00</u>
COL	241	235	235	215
LTC	567	568	597	506
MAJ	821	809	835	734
CPT	<u>607</u>	<u>581</u>	<u>467</u>	<u>545</u>
	2236	2193	2134	2000

Table 1. MAPL Authorizations

Currently, further reductions to the MAPL are anticipated, with projections as low as 1,935 total active duty members.²¹ Accordingly, many functional positions being filled by uniformed AAC members will be “civilianized” and transferred to the CAPL. However, the CAPL contains an “authorized strength cap” and it should be readily apparent that one result that cannot be compensated for will be the indeterminable amount of outstandingly qualified military expertise that will be lost from the Army’s acquisition arena. Relative to this “green suiter” experience and functional involvement in the acquisition process is where significant roles may be served by reserve component personnel, which will be subsequently discussed in this paper.

ACQUISITION CAREER FIELDS

Personnel, both military and civilian, in the AAW represent a multi-disciplined team across various commands and organizations throughout the Army and joint assignments. The majority of the force is in Program Executive Offices within the Headquarters, Department of the Army; the Assistant Secretary of the Army for Research, Development and Acquisition staff (ASARDA); U.S. Army Training and Doctrine Command (TRADOC); U.S. Army Space and Strategic Defense Command (USASSDC), Army Operational Evaluation Command (OEC); and the Army Materiel Command (AMC). The AAW performs a wide range of functions from basic research to test and evaluation, as well as contracting for supplies facilities, and services to life cycle support and disposal of equipment. The DAWIA as implemented by DOD Instruction 5000.28 established twelve (12) acquisition career fields and fourteen (14) acquisition career positions, as presented in Figure 5, encompassing functions across the AAW.

ACQUISITION CAREER FIELDS	ACQUISITION POSITION CATEGORIES
<ul style="list-style-type: none">• PROGRAM MANAGEMENT• COMMUNICATIONS-COMPUTER SYSTEMS• CONTRACTING• PURCHASING• INDUSTRIAL PROPERTY MANAGEMENT• SYSTEMS PLANNING, RESEARCH DEVELOPMENT, AND ENGINEERING• TEST & EVALUATION ENGINEERING• MANUFACTURING AND PRODUCTION• QUALITY ASSURANCE• ACQUISITION LOGISTICS• BUSINESS, COST ESTIMATING, AND FINANCIAL MANAGEMENT• AUDITING	<ul style="list-style-type: none">• PROGRAM MANGEMENT• COMMUNICATIONS - COMPUTER SYSTEMS• CONTRACTING• PURCHASING• INDUSTRIAL PROPERTY MANAGEMENT• SYSTEMS PLANING, RESEARCH DEVELOPMENT, AND ENGINEERING• TEST & EVALUATION ENGINEERING• MANUFACTURING AND PRODUCTION• QUALITY ASSURANCE• ACQUISITION LOGISTICS• BUSINESS, COST ESTIMATING, AND FINANCIAL MANAGEMENT• AUDITING• PROGRAM MANAGEMENT OVERSIGHT*• EDUCATION, TRAINING, AND CAREER DEVELOPMENT*

* Used only as position categories and cannot be used as personnel career fields.

Figure 5. DAWIA acquisition disciplines.

These acquisition career fields and position categories should serve as a template for the USAR and ARNG structures for the identification of their respective positions and functions that qualify for inclusion within the AAW/AAC.

Army officers selected for accession into the AAW/AAC retained their basic branch designation (e.g., Infantry, Aviation, Military Intelligence, etc.), however, individuals no longer competed for assignments or command positions within those basic branches. For military members of the AAW/AAC, three functional areas were established for the management and career development of these officers: FA51 - Research, Development and Acquisition; FA53 - Systems Automation; FA97 - Contracting and Industrial Management. A brief description of each of these functional areas (FA) follows.

(a) FA51 - Research, Development and Acquisition (RD&A) officers manage the activities of the combat and materiel developer organizations involved in the conception, research, development, acquisition, testing and fielding of materiel, and the disposal of obsolete systems. They participate in all aspects of systems acquisition from the review of mission area analysis, battlefield development plans, modernization plans, and the Army Modernization Memorandum resulting in materiel solutions. RD&A officers manage materiel throughout all life cycle systems management model phases outlined in AR 70-1.

(b) FA53 - Systems Automation officers serve in positions requiring technical competence in the fields of systems automation management, systems automation engineering, and systems automation acquisition. FA53 officers manage computer systems and provide automation expertise at all command levels, including commanders and officials in combined, joint, and service agencies. They manage the development of software systems; integration of software, hardware, and data communications; automated systems and related services; and serve

as advisors to the commander and staff on automation policy and technical matters. This includes, planning, organizing, directing, coordinating, controlling, and budgeting for automated systems and services supporting functional users, commanders and staffs.

Included in this functional area are command, immediate supervisory, advisory and technical responsibilities for data processing units, installations and activities, engineering, acquisition, construction, installation, operation and maintaining computer systems. FA53 officers serve in information management staff positions; supervise and perform systems analysis, design, development, testing, prototyping, training and systems installation; acquire systems components; integrate systems components; and manage systems implementation for much of the Army.

(c) FA97 - Contracting and Industrial Management officers accomplish the procurement function that provides the materiel and services required to accomplish Army and DoD missions, through execution of contracts, related contract management responsibilities, and production. The FA97 officer performs those functional duties which use the productive capabilities of government and industry to provide the weapons, ammunition, aircraft, missiles, vehicles, electronics, and other essential materiel and services required by the Army and DoD. Typical examples of functional duties are contract formulation, negotiation and award; contract administration; contract management; production management; technical data management; quality control and product or program management.²²

It should be noted that a recent decision from the Department of the Army initiates the consolidation of these three functional area identifiers into a single “FA 51” designation. Reclassification will be accomplished by an additional alpha identifier for both AAW and critical AAC personnel, depending on particular skills. Accordingly, “acquisition-related” positions will be designated as 51_ (e.g., 51A Systems Development, 51C Contracting and Industrial Management, 51R Systems Automation Acquisition, 51S Research and Engineering, 51Z Acquisition, etc.) This revision also seeks to achieve a closer alignment of military AAW/AAC members with their basic branch affiliations in order to ensure optimum contribution of the officer’s branch expertise with the affiliated

system development.²³ As will be discussed in more detail later, this measure may facilitate reserve component officer integration within the AAW/AAC and enhance potential competitiveness with their peers within the limitations of basic branch and unit affiliations in the USAR and ARNG.

Shortage of Science and Engineering Skills

“Force XXI” as the vision for the Army of the next century will require leaders who have the technical competency to optimize the combat leverage provided by the complex, modern digitized weapon systems. Recently, the Army Science Board (ASB) concluded that, paradoxically, this reliance on modern weapon systems and technology has been growing while the Army has been reducing its cadre of technology-literate line officers and science, mathematics, and engineering (SM&E) educated officers.²⁴

Approximately 30 percent of all AAC positions are in scientific, technical, or engineering fields.²⁵ Within the next decade, the rate of technological change will be an order of magnitude greater than in the past, and will continue to accelerate. Coinciding with the current downsizing initiatives, the Army will certainly be confronted with a predicament of increasing shortages in SM&E personnel to meet its needs across the spectrum of the acquisition arena and to ensure that the Total Army can assimilate and adapt to rapid technological change.

The ASB study addressed Army officer requirements in the areas of entry-level requirements, career development and training, and position requirements. The following are selected ASB comments pertaining to the diminishing SM&E core in the Army.²⁶

Many officers entering today's Army have not taken a sufficient number of SM&E college courses to exploit current and emerging microchip-based information technologies, and thereby advance the evolving mission of the Army.

The Army appears to be pursuing "second class" SM&E talent...

Diverse personnel requirements and time compression assignment policies are pernicious to SM&E assignments, education, and advancement.

SM&E-educated officers are pushed through the warrior personnel management template, with adverse results for both warriors and those officers.

There are inadequate and dwindling numbers of SM&E-educated officers in key assignments in the Training and Doctrine Command (TRADOC), the Army Materiel Command (AMC), the line Army, and the Program Executive Officer (PEO) system.

Table of Organization and Equipment (TOE) and Table of Distribution and Allowance (TDA) officer spaces do not stipulate SM&E education designations.

No personnel program exists to provide incentives to career SM&E-educated officers (dual- and single-track officers).

The Total Army has the immediate and future need for qualified SM&E expertise.

As an institution, the Army needs its SM&E officers to more effectively bridge combat development, materiel development, and technology implementation in field operations.

This "bridging" has not been adequately addressed as a capability of enormous value to the Army...and its potential has not materialized in an Army whose strength has traditionally been derived from its people and its technology.²⁷ Undeniably, extensive

SM&E expertise is resident within the USAR and ARNG. As the Total Army evolves with a greater segment of missions, roles, and functions being performed by the reserve component, the traditional modes of integration and perceptions in which these elements have been regarded must change. As will later be identified, the USAR and ARNG can significantly contribute to mitigating this growing loss of SM&E talent and enhance the overall AAW/AAC community.

LEVELS OF CERTIFICATION

The DAWIA and DoD Instruction 5000.52-M established three (3) levels of certification for both military and civilian members of the acquisition workforce based on professional qualifications within a given career field. Level 1 is the most junior and Level 3 is the most senior. It also identifies specific qualification requirements for progression in each acquisition position. Particular criteria are based on education, experience, and military/civilian grade levels. These career path criteria are presented in Appendix 2. For the purposes of this paper, only the certification of military personnel, from the standpoint of AAW and AAC qualification, will be discussed. Level I is comprised of officers in the grades of O-1 through O-3 and is characterized by fundamental qualifications and expertise. Level II consists of officers in grades O-3 through O-4, with standards emphasizing specialization in the individual's career field. The senior career status, Level III, is comprised of officers in the grade of O-4 and above who have fulfilled all mandatory training and education requirements, and developed an in-depth knowledge of their functional area and the DoD acquisition process. Provisions exist for an 18 month period in which to qualify personnel. However, Level II and III positions stipulate that mandatory requirements be met prior to assignment of personnel.

A significant consideration for the integration of reserve component personnel will be the manner in which both military and private sector experience is equated. The DAWIA groups experience into the following four categories.²⁸

- (a) Program Office or Similar Organization (P time). This type of experience is gained by working in positions on the MAPL in organizations directly involved in acquisition programs. These organizations are involved in planning, managing, and/or executing acquisition programs governed by DoD Directive 5000.1 and DoD Instruction 5000.2.
- (b) Acquisition Related Education (E time). Education experience is gained through the completion of an advanced degree program (master's or higher) in an acquisition-related discipline or through the completion of military acquisition courses. Appendix C contains the listing of the advanced civilian degrees that qualify as education experience. All military courses which fall under the Defense Acquisition University (DAU) qualify as education experience. In addition, the Materiel Acquisition Management Course (Army Logistics Management College) and the Systems Automation Courses (U.S. Army Computer Science School) also qualify as education experience. The maximum "E time" any officer can have is 12 months.
- (c) Other Acquisition Related Experience (O Time). Other experience is any acquisition experience that does not fall under the preceding categories. This experience is gained by working in positions on the MAPL in organizations other than those gaining "P time." Time spent in the Training with Industry (TWI) Program, as an assignment officer or instructor are examples which are included in this category.
- (d) Total Acquisition Experience (T time). An officer's total acquisition experience is the sum of the officer's P, E, and O time credit.

Acquisition experience, other than education, is primarily obtained through assignment to validated positions on the MAPL. MAPL positions are coded in the PERSCOM data base as either P or an O position based on the category of relative experience that it produces. Periodically, the assignment history of each officer within the AAW is audited,

with a compilation of total monthly experience in each of the categories subsequently annotated on the individual's Officer Record Brief.

All individuals working in designated MAPL positions are in the AAW. However, they may not necessarily be in the AAC. Acquisition corps membership as prescribed by the DAWIA consists of the following criteria:²⁹

1. The officer must be a major or above.
2. The officer must have a baccalaureate degree.
3. The officer must have at least 24 semester credit hours (or equivalent) from among the following disciplines:

- Accounting	- Economics
- Business Finance	- Industrial Management
- Law	- Marketing
- Contracts	- Quantitative Methods
- Purchasing	- Organization and Management
4. The business hour requirement stated above is also satisfied if the officer has 24 semester credit hours in his acquisition career field and 12 semester credit hours from among the disciplines listed above. (For example, a FA 51 officer with an engineering degree would only need 12 credit hours from the above disciplines to meet this requirement.)
5. The officer must have at least four years of experience in an acquisition position.
6. Requirements 2 and 3 are also satisfied if the officer had at least 10 years of acquisition experience as of 1 October 1993.
7. The DoD Instruction 5000.58 imposes the further requirement that after 1 October 1993 an individual must have completed the training required for Level 2 certification in their career field.

The process for determining reserve component participation in the AAW/AAC has yet to be defined. However, steps have been previously taken for the identification of potential

candidates incorporating the aforementioned criteria. Additional caveats given in the event that items 1, 2, and 3 could not apply are:³⁰

- a. Have 10 years acquisition experience as of 1 October 1991; or
- b. Are a member of another Service acquisition corps or AAC as a civilian employee.

In March 1995 a panel of functional experts reviewed the records of more than 550 USAR officers for possible inclusion in the AAW/AAC, recommending 369 USAR officers for accession. LTG William H. Forster, then Director, Army Acquisition Corps, approved the recommendations on April 8, 1995. A breakout of that USAR inventory follows:

<u>ACQUISITION CORPS</u>				
FA	MAJ	LTC	COL	TOTAL
51	65	59	8	132
53	16	16	0	32
97	<u>51</u>	<u>55</u>	<u>9</u>	<u>115</u>
Total	132	130	17	279

<u>ACQUISITION WORKFORCE</u>					
FA	CPT	MAJ	LTC	COL	TOTAL
51	15	18	4	0	37
53	4	5	2	0	11
97	<u>26</u>	<u>9</u>	<u>6</u>	<u>1</u>	<u>42</u>
Total	45	32	12	1	90

Table 2. USAR Army Acquisition Corps Accessions³¹

The selection of these USAR personnel for accession into the AAW/AAC was a significant step towards potential integration of both USAR and ARNG personnel into the Total Army acquisition arena. However, this validated *individual qualifications*, and virtually no action was subsequently taken towards formally instituting the acquisition specialty across the USAR and ARNG. It is essential that it be recognized that individuals throughout the Reserve Component not only possess acquisition-related skills, but are performing a wide variety of acquisition functions on a daily basis.

Aside from acknowledging that acquisition missions, activities and functions are an integral part of their organizations, the USAR and ARNG are compelled to institute a formal acquisition structure to meet the statutory requirements and provisions of the DAWIA.

STATUTES, POLICIES AND COMPLIANCE REQUIREMENTS

The essence of overall acquisition reform relating to the institution of service-wide “acquisition corps” has previously been identified within the DAWIA. However, specific requirements and guidance have been prescribed through numerous DoD instructions, as well as Department of the Army regulations. Unfortunately, past interpretations of a variety of these items have resulted in considerable deviance and misunderstanding of provisions and requirements pertaining to the integration of reserve components into the AAF/AAC.

DoD instructions complementing the DAWIA, and the associated Army Regulation pertinent to the management of the AAW/AAC are as follows:³²

- DoDI 5000.52M, Career Development Program for Acquisition Personnel, describes each acquisition career field and defines the three acquisition career fields. The appendices to DoDI 5000.52M prescribe the specific requirements for each career level in each career field.
- DoDI 5000.58, Defense Acquisition Workforce, is the DoD document for implementing the DAWIA.
- DoDI 5000.55, Reporting Management Information on DoD Military and Civilian Acquisition Personnel and Positions, establishes the acquisition reporting requirements for the services.
- AR 70-1, Army Acquisition Policy, sets forth and implements the Army's acquisition policy and assigns responsibilities to Army organizations for execution and compliance with DoD directives, instructions, and policies.

Under the provisions of AR 70-1, the Assistant Secretary of the Army (Research, Development, and Acquisition) (ASARDA) serves as the Army Acquisition Executive (AAE). Within the scope of duties and responsibilities of the AAE are the following specific functions:³³

- Carry out all powers, functions, and duties of the Secretary with respect to the acquisition workforce within the Army, subject to the authority, direction, and control of the Secretary of the Army.
- Establish and maintain the Army Acquisition Corps, and act as the final authority on all matters reflecting the Army's acquisition system, except as limited by statute or higher level regulation.
- Establish a streamlined acquisition structure for managing Army acquisition programs.

- Approve the establishment and termination of all Program Management Offices (PMO) and Program Executive Offices (PEO). The AAE has the authority to designate a system for intensive, centralized management and prescribe the appropriate level of management at any point in the program management process...

The preceding provisions clearly establish the AAE's leadership role in managing the overall systems acquisition process, as well as the AAW and AAC. Reference to the DAWIA and associated DoD instructions expressly state that inclusive provisions are applicable to the Reserve Components of the military departments with one exception. The language of the initial DoDI 5000.58 stated that "...the National Guard is excluded from designating critical acquisition positions outside National Guard Bureau (NGB) Headquarters." Impending changes to this instruction in FY 97 purportedly will eliminate this exclusionary provision for the 54 military departments of the individual states and territories.

Existing law and DoD guidance do not differentiate between members of the active and reserve component acquisition workforces. Uniform requirements are established for all DoD elements and agencies involved in the acquisition process. Overall, the individual services have been afforded limited authority for deviation in the implementation of the DAWIA. It is incumbent for the USAR and ARNG to comply with the provisions and requirements of the DAWIA.³⁴

Accordingly, the AAE has directed that the ASARDA staff undertake the coordinated development of a detailed plan for the integration of the USAR and ARNG

into the *Total Army Acquisition Corps*. Several actions have been initiated and completed towards accomplishing this objective. The first was the consummation of memorandum of agreement(s) (MOA) between LTG Ronald V. Hite (DACM) and MG Max Baratz, Chief, Army Reserve (CAR) and MG William A. Navas, Director of the Army National Guard (DARNG)(Appendices D and E, respectively), which provided the basis of understanding for the establishment and operation of a system to have the reserve components comply with the DAWIA. The second action was the establishment of a Army Acquisition Corps Reserve Components Process Action Team (PAT) comprised of members from OASARDA, USAR, and ARNG. Co-chaired by appointees of the CAR and DARNG, the PAT is tasked to review and provide recommendations for the establishment, integration, training, management, and utilization of Reserve Component AAC members. The responsible coordination elements for each organization lies within the logistics area, DAAR-LO (OCAR) and NGB-ILE (ARNG). The charter of the PAT is presented in Appendix F. Inherent to this tasking is identifying the particular nature of the USAR and ARNG, and the respective issues and concerns that may necessitate different approaches to their implementation of the DAWIA and integration into the AAW/AAC.

V. UNITED STATES ARMY RESERVE

GENERAL

Since its creation as the Medical Reserve Corps in 1908, and the passage of the National Defense Act of 1916 which created the Officer's Reserve Corps, Enlisted Reserve Corps and Reserve Officer Training Corps (ROTC), the United States has continually depended on the citizen-soldier to meet its growing level of military preparedness and strength. While the Korean Conflict was still under way, Congress transformed the Organized Reserve Corps into the United States Army Reserve (USAR). This new organization was divided into a Ready Reserve, Standby Reserve and Retired Reserve. At that time, reserve units were authorized 24 inactive duty training days a year and up to 17 days of active duty (called annual training). During the late 1950s, the Army Reserve became increasingly combat support and combat service support oriented. A subsequent reorganization during that period called for the Army Reserve and Army National Guard to provide supplemental forces to the active Army (the Army Reserve's role included individuals as well as units). Several call-ups of the Reserves were characterized by numerous problems, including old equipment, lack of equipment, shortage of unit soldiers, and difficulty locating individual soldiers. The Army Reserve reorganizations of 1967 and 1968 resulted in the USAR being composed primarily of combat support and combat service support units, with combat arms units concentrated in the Army National Guard.³⁵

With the end of the draft in 1973, the United States initiated the "Total Force Policy," which called for maintaining an active duty force capable of ensuring peace and

deterring aggression. Those forces would be reinforced, when necessary, by a well-trained, well-equipped Reserve Component. The effect of an all-volunteer active Army and the Total Force Policy was a shift of some responsibilities and resources to the Army Reserve.³⁶ Since that time, the United States has experienced a growing number of deployments, with each becoming more significant in that the active Army simply could not provide enough qualified personnel for specific tasks, given its other responsibilities. Accordingly, the use of USAR personnel became essential.

Today, the Army Reserve has almost 40 percent of the Army's combat support (CS) and combat service support (CSS) units. With over 92 percent of those units assigned a role under Army regional operational plans, the USAR is positioned to support almost any Army mission worldwide. The National Strategy will continue to rely heavily on USAR participation. The shift from full to partial mobilization enhances peacetime and operational readiness. In logistics, Army Reserve initiatives will increase equipment-on-hand, expand the use of commercial practices and dealer networks, and improve capabilities through technological advancements.³⁷ The Army Reserve of the 21st century, with its core competency resident in CSS, must be a relevant and capable cornerstone of the Army and our nation's defense. Combining civilian acquired skills with Army values and military training and experience, personnel of the USAR represent an asset that is prime to supporting worldwide Army missions, particularly within the acquisition arena.

ORGANIZATION

The USAR consists of all Reserves of the Army who are not soldiers of the Army National Guard of the United States (ARNGUS). This includes the Selected Reserve, the Individual Ready Reserve (IRR) and the Retired Reserve, totaling more than 1,000,000 reservists. The Selected Reserve is composed of active guard and reserve (AGR), troop program units (TPUs) and individual mobilization augmentees (IMAs). The current drawdown USAR program entails an end strength of 208,000 soldiers by 1998. For the purposes of this discussion, aspects of integrating AGR, TPU and IMA personnel into the AAW/AAC will be addressed.

The Total Army mission is supported by three Army Reserve management bodies. At the Pentagon, the Office of the Chief, Army Reserve (OCAR) is advisor to the Army Chief of Staff on all matters pertaining to the USAR. Additionally, the OCAR serves as the Commander of the United States Army Reserve Command (USARC) and as the Deputy Commander of the United States Forces Command (FORSCOM) for Reserve Forces. The OCAR develops and executes Army Reserve plans, policies and programs, administers USAR personnel, operations and construction funds and commands the Army Reserve Personnel Center (ARPERCEN).

Located in Saint Louis, MO, the ARPERCEN serves as a field operating agency of OCAR, and provides career management and training to approximately 374,000 soldiers in the Individual Ready Reserve (IRR). Additionally, ARPERCEN is responsible

for management of the IMA program and the Standby Reserve and Retired Reserve (which includes retirees from both the National Guard and Active Army).

The United States Army Reserve Command (USARC) is based in Atlanta, GA, and commands all continental United States (CONUS) Army Reserve units except for civil affairs and psychological operations units (which are under the U.S. Army Civil Affairs and Psychological Operations Command). There are three Army Reserve Commands (ARCOMS) outside the CONUS, located in Hawaii, Puerto Rico and Germany. USARC recently reorganized its command and control structure to enhance its CSS competencies. The new structure consists of 10 Regional Support Commands (RSCs), three Regional Support Groups (RSG) and 37 specialized commands. The RSCs command, control and support units in a geographical area, with new responsibilities in depot maintenance and base operations and installation management. The RSCs are based in California, New York, Alabama, Minnesota, Kansas, Arkansas, Massachusetts, Utah, Pennsylvania, and Washington state. The RSGs are located in Georgia, Indiana, and Texas, providing command, control and support units in specific functions, such as medicine, logistics, engineering and training.³⁸

Recently, the USARC established Garrison Support Units (GSUs) in order to provide a more robust power projection capability. These units are to be ready on the first day of any contingency with the primary mission to backfill active Army installation base operations and logistical activities vacated by deploying active component

organizations during contingency operations. The GSUs additionally provide peacetime support to their respective active component counterparts.

Troop Program Units

In fulfilling its mission of meeting DA mobilization requirements, the USAR provides units that are sufficient in strength, state of training and equipment readiness to be deployed with a minimum of post-mobilization training in addition to providing trained individual officer and enlisted soldier reinforcements for units. Troop program units (TPUs) are those USAR elements of the Selected Reserve organized to serve as units (both Table of Organization and Equipment (TO&E) and Table of Distribution and Allowances (TDA)).³⁹ TPUs consist of units with drilling reservists and full-time unit support (FTUS) personnel. FTUS may be manned by Active Guard and Reserve (AGR) personnel or members of the active component. With the recent USAR reorganization, all TPUs are under the command and control of the respective RSC in which they are located.

Personnel assigned to TPUs deploy with their respective units upon mobilization. They meet the Ready Reserve annual training requirements through participation in unit training assemblies. The annual training requirements for these officers as prescribed by AR 140-1 and Title 10 USC 270(A)(1) are:⁴⁰

- a. Participate in no more than 48 scheduled periods of training or drills and serve on “annual training” (AT) for not less than 14 days (exclusive of travel); or
- b. Serve on AT for not more than 17 days.

Active Guard Reserve

Active Guard Reserve (AGR) are members of the ARNG or USAR serving in a full-time active duty capacity (other than for training) for 180 days or more. Traditionally they are involved in the daily functions of organizing, recruiting, training or executing the administration of Reserve Component units. Additionally, AGR personnel are assigned to the TDA structures at the OCAR, USARC and ARPERCEN.

Individual Mobilization Augmentees

Individual USAR officers who are members of the Selected Reserve may also serve as individual mobilization augmentees (IMAs). Traditionally, IMAs have been assigned to key positions in the Department of Defense, Army agencies, active Army units, and other governmental agencies that require rapid fills during periods of mobilization. Objectively, IMAs represent a highly skilled group of individuals that augment active component (AC) organizations in order to meet expanded mission requirements. Accordingly, IMAs are selectively assigned to these AC positions and to respective IMA detachments based on individual qualifications.⁴¹

There is no prescribed organizational structure for IMA detachments. Consisting of a minimum of five IMA officers with related training (and, theoretically, similar qualifications), an IMA detachment is a functional non-TPU assigned the mission of supporting the particular requirements of its sponsoring or proponent AC agency.

Members of the IMA detachment provide their support to these organizations on the basis

of Inactive Duty for Training (IDT) for the purposes of acquiring retirement points and receive no military pay in the performance of the duty. On an annual basis, individual drilling IMA officers are normally authorized to perform at least 24 additional periods, in addition to a dedicated 12 day (excluding travel) AT requirement in their mobilization billet with the proponent agency, unless appropriate exceptions are granted.⁴² IMA detachment training specifically relates to the mission, organization, functions and activities of its proponent agency.

Over the past several years the IMA program has experienced significant reductions in authorized positions and will continue to be reduced through FY99. In many organizations that participated in the IMA program, these reductions resulted in a virtual elimination of all IMA support. As an example, in FY96 the OASA(RDA) sponsored 52 IMA positions. For FY97, they were authorized only 8 individuals. Overall IMA program reductions are presented in Figure 6. The long-term impact of these reductions may be difficult to quantify. Most assuredly, it represents an unfortunate consequence for the individual IMA officers. Additionally, it deprives the supported organization of exceptionally qualified individuals, who, over the tenure of their annual assignments to the position, surely acquired expertise in the mission and functions of the organization.

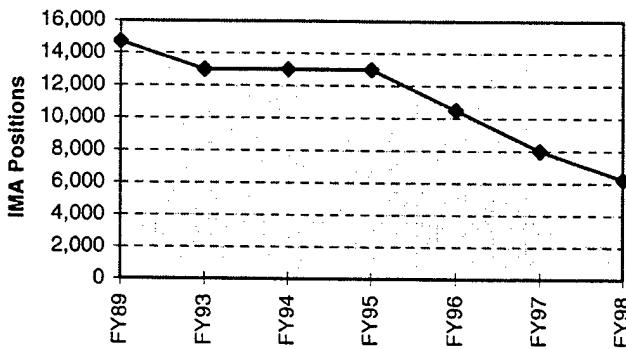

Figure 6. IMA reductions.⁴³

Individual Ready Reserve

An additional source of reserve manpower is the Individual Ready Reserve (IRR). Comprised of soldiers with a remaining service obligation or those who have voluntarily elected to be a member, the IRR represents a group of individuals with a broad range of previous military training and experience.

Members of the IRR can be activated involuntarily for up to 15 days a year. However, during a time of national emergency, the President may mobilize the IRR for a period of up to 24 months. If Congress declares war or a state of national emergency, the President is authorized to involuntarily activate the Ready Reserve, to include the IRR, for the duration of the crisis plus an additional six months.⁴⁴

MANAGEMENT

Among the numerous changes that are taking place in the USAR is the establishment of a new Army Reserve Personnel Command (ARPC) in St. Louis which is

to replace the existing ARPERCEN and the Full Time Support Management Directorate in October 1997. Since May 1996, Army Reserve personnel management was converted from a branch or functional area-based system to one organized by regional teams. The ARPC will utilize a team concept to provide total life-cycle career management for Army reserve soldiers throughout the force, thereby supporting the RSCs by helping to maintain unit readiness and providing responsive support to our soldiers.

As a complement to this personnel management change, the ARPC will implement the Personnel Electronic Record Management System (PERMS). This system will convert paper and microfiche personnel records to a modern electronic system which will significantly increase efficiency by allowing immediate multiple user access to individual personnel records.⁴⁵

Reserve Officer Personnel Management Act

Perhaps the most far-reaching change that will impact the management of the Reserve Component has been the passage of the Reserve Officer Personnel Management Act (ROPMA), which went into effect 1 October 1996. ROPMA is the first major legislative change affecting personnel management for reserve commissioned officers of all services, including the National Guard, since 1954. The objectives of ROPMA are twofold. First, it standardizes reserve officer personnel management across the military. Second, it aligns the reserve system with that used by the active component.

Several provisions of the ROPMA significantly change the promotion process and warrant specific mention due to their potential influence in the formulation of any integration plan for Reserve Component personnel into the AAW/AAC. These are:

Creation of a reserve active-status list (RASL), a single list of all officers who are actively participating members of the Army Reserve, including those in the IRR, and the Army National Guard. The RASL ranks officers within each grade and competitive category. An officer must be on the RASL in order to be considered for promotion. Officers who return to the RASL after being in inactive status must be on the list for at least one year before they can be promoted.⁴⁶

Elimination of the mandatory time-in-service (TIS) and time-in-grade (TIG) requirements for promotion. There will now be a minimum and maximum TIG for each rank with a date of rank falling in between.⁴⁷

Below zone promotions may be based on “needs of the service” for captains, majors, and lieutenant colonels. ROPMA bases promotions on “best qualified” standards instead of “fully qualified.” In order to be recommended for promotion by a mandatory board, an officer must be “fully qualified” (minimum TIG, education, etc.). Of those “fully qualified,” the board selects those officers it feels are “best qualified.”⁴⁸

If an officer is recommended for promotion by a mandatory board, ROPMA allows for that officer to voluntarily delay promotion for up to three years. At the end of this period the officer must accept the promotion, transfer to the USAR (IRR) and be promoted, or decline the promotion. Declining promotion, the officer is considered a one time non-select for promotion. Officers who become non-selects twice are subject to separation.⁴⁹

Officers may be promoted to a “position vacancy” (formerly “unit vacancy”) prior to their first mandatory selection board. In order to be promoted to fill a position vacancy at the next higher grade, an officer must meet the minimum TIG requirements established by the regulation. The officer must be “fully qualified” in all other respects. If an officer appears before a mandatory selection board, he must be selected before a position vacancy promotion is permitted. Waiver authority to this requirement is the Secretary of the Army alone if it is found that the officer is the only one qualified to fill the vacancy.⁵⁰

As will be subsequently discussed, these provisions may greatly facilitate the career development of Reserve Component officers, particularly those with specialized skills or limited positions, within the acquisition corps. Overall management of USAR officers is governed by the statutory requirements and guidance contained in Title 10, United States Code 270 and Army Regulation 140-1.

ACQUISITION-RELATED USAR ACTIVITIES

In conjunction with the changes that have been made to its structure, a revitalized focus of the USAR has been arming the force with the best possible equipment. In doing so, the USAR has made significant progress toward improving the equipment-on-hand status of its units by targeting Army Reserve procurement, purchasing USAR-unique equipment, redistributing equipment and increasing depot maintenance funding. The CAR has stated that "...maximum use of available funds to upgrade and rebuild Army Reserve equipment has been an ongoing priority."⁵¹

Within depot maintenance programs, activities are not limited to simply overhauling the equipment for purposes of extending service life, but rather entail the incorporation of product improvements and modernization. Current programs consist of the U-21 aircraft modernization and refurbishment program, generator and trailer conversions, computer refurbishment and upgrade, trailer and tanker modernization, HMMWV remodeling, and watercraft and marine remodeling and upgrade programs. Integral to these activities, the USAR has pursued a greater reliance and interaction with industry for equipment maintenance, repair and remanufacture. Specific areas that have

been identified include: remanufacture, with technology insertions and product improvements; end item repair and return; parts distribution; maintenance engineering; leasing; new procurement; and production surge.⁵² It is intuitively obvious that these activities correlate to the acquisition career fields and position categories that are identified by the DAWIA, as previously presented in Figure 5.

The most significant acquisition-related USAR activity resides in the Dedicated Procurement Program (DPP). The DPP consists of specifically programmed Congressional funding through the “National Guard and Reserve Equipment Appropriation” (NGREA) for the purpose of procuring equipment for the Reserve Component in order to improve unit readiness. Established in 1981, NGREA is “over and above” the President’s Budget. Army implementation of the NGREA is through the “Reserve Components Dedicated Equipment Distribution Program” accomplished through AR 700-140. The DPP consists of prioritized requirements that have not been met by previous procurements of the active Army. This may result from changing or unprogrammed requirements and Army funding shortfalls. Since FY81 through FY97, the total DPP appropriations have exceeded \$1.55B. In FY97, the DPP was approximately \$115M. The prioritized listing of requested DPP normally reflects the difference between validated requirements of the Reserve Component and the projected fieldings of modernized equipment or the availability of that being “cascaded” from the active Army down to the USAR and ARNG.⁵³

The CAR is overall Program Director of the USAR DPP. The responsible activity within the OCAR for planning and programming the DPP is Chief, Logistics Division (DAAR-LO). However, the determination of USAR requirements and actual equipment fielding is accomplished by the USARC DCSLOG. From FY95-FY97, approximately 68.4 percent (\$193.0M) of the total DPP (USAR) was allocated solely for trucks and trailers.⁵⁴ A listing of the FY97 DPP items is presented in Appendix G.

VI. ARMY NATIONAL GUARD

GENERAL

The Army National Guard (ARNG) is our nation's oldest military organization predating the founding of the nation and a national military force by almost a century and a half. The tradition upon which the National Guard was founded is that for able-bodied citizens, it is both a privilege and responsibility to serve in the common defense of their community and nation. Guardsmen have performed these duties in virtually every conflict that America has experienced up through *Operation Desert Storm* and today's peacekeeping roles, such as *Operation Joint Endeavor*.

The ARNG vision statement reflects the responsive and evolutionary nature of the National Guard's capabilities to ensure it remains a relevant force to meet changing missions and requirements that our nation is faced with today, and reads:

“A relevant force...mission across the spectrum of contingencies... structured and resourced to accomplish its missions...capable and accessible when called...with trained citizen-soldiers committed to preserving the timeless traditions and values of service to our nation and communities.”⁵⁵

The Guard fulfills a vital role in our national defense and emergency preparedness systems. The Guard has emerged as the foremost reserve of the Army. Under the Total Force Policy, the Guard is capable of providing organized and trained units to engage in missions along with the active Army. Throughout our history, the Guard has been an integral component of the defense and domestic emergency-response networks of communities, the States and the United States.

The National Defense Act of 1903, commonly known as the Dick Act, affirmed the National Guard as the nation's primary organized reserve. With the National Defense Act of 1916, the Guard's role was expanded and guaranteed the status of the State militia as the Army's primary reserve force, mandating that it be referred to as the "National Guard." The President was authorized in the case of war or national emergency to mobilize the National Guard for the duration of the emergency. As a part of the legislation, the required yearly drill periods increased from 24 to 48, and annual training from 5 to 15 days. For the first time drill pay for individual guardsmen was authorized.⁵⁶

In 1920, further amendments to the National Defense Acts established the Chief of the Militia Bureau, which later became the National Guard Bureau, and assigned National Guard officers to the general staff. With the National Guard Mobilization Act of 1933, the National Guard of the United States became a component of the Army at all times, which could be ordered into active Federal service by the President whenever Congress declared a national emergency. The Total Force Policy of 1973 intended to involve a significant segment of the American public by mobilizing the National Guard from its thousands of locations throughout the United States. This policy requires that all active and reserve military organizations of the United States be regarded as a single integrated force. The Total Force Policy reflects the intent of the framers of our Constitution that a small standing army be complemented by its citizen-soldiers. Our present federal law sets forth the ARNG federal role:

...to provide trained units and qualified persons available for active duty in the armed forces, in time of war or national emergency and at such other times as the national security requires, to fill the needs of the armed forces whenever, during, and after the period needed to procure and train additional units and qualified persons to achieve the planned mobilization, more units and persons are needed than are in the regular components.⁵⁷

It is federal law that determines the number of authorized National Guard personnel and force structure (unit mix) across the country. The governors of each state possess the authority to locate their units and headquarters. Federal officials may not change any branch, organization, or allocation located entirely within a state without the concurrence of the respective governor.

The organization and operation of the National Guard are governed by detailed federal statutes and regulations. Regulations issued by the National Guard Bureau (NGB) define the policies, procedures, and responsibilities of the Guard. Additionally, they provide guidance for the employment of units, personnel and equipment in support of state and local government authorities. It has been noted that "...the Federal government's relationship to the wide range of state activities and responsibilities has evolved over the years, so too have the federal and state roles of the National Guard changed in order to meet the national interest as well as the particular needs and circumstances of each state and territory."⁵⁸ Reflecting on this observation shows that while it is true that by constitutional, statutory, and military responsibilities, both the National Guard and active Army are closely integrated, the ARNG is a partially independent entity. This unique status is exemplified by the fact that Guard soldiers,

unlike their counterparts in the active Army or Army Reserve, take an oath to their state constitutions secondary to their oath to the United States Constitution.⁵⁹

The strategic planning of our national defense integrates ARNG units into vital combat, CS and CSS elements of our nation's total force structure. The National Guard provides a trained, capable, and cost-effective military force with the capability of providing rapid augmentation, reinforcement, and expansion in times of emergency and mobilization.

ORGANIZATION

The ARNG is organized in units throughout all the 50 states, Puerto Rico, Guam, the Virgin Islands and the District of Columbia. With an authorized strength of 387,000 soldiers, the ARNG operates and maintains 3,360 installations that support training, aviation, administration, and logistics to sustain and maintain the National Guard's readiness throughout the United States and its territories. The result of the 1993 DoD Bottom-Up Review and revised National Military Strategy identified the need for highly trained and equipped, combat-ready reserve forces in order to win two nearly simultaneous major regional conflicts. This planning prescribed ten active Army divisions and 15 ARNG enhanced brigades as a component of that combat force. Additionally, a strategic reserve is provided by eight ARNG divisions, one armored brigade, one infantry brigade and one scout group. Further Army planning entails force reductions/realignments that will result in a programmed ARNG end strength of 367,000

soldiers by the end of FY98 (coincidentally, the USAR will have an end strength of 208,000).⁶⁰

The current composition of the ARNG consists of 51 percent combat, 16 percent CS and 24 percent CSS, with a 9 percent mobilization base. However, in FY99, the ARNG will be composed of 54 percent combat, 16 percent CS, and 21 percent CSS. The mobilization base will remain the same. In doing so, the ARNG will be configured as a balanced land force, capable of providing more than one-half of the Total Army's combat power, and more than one-third of its CS and CSS structure.⁶¹

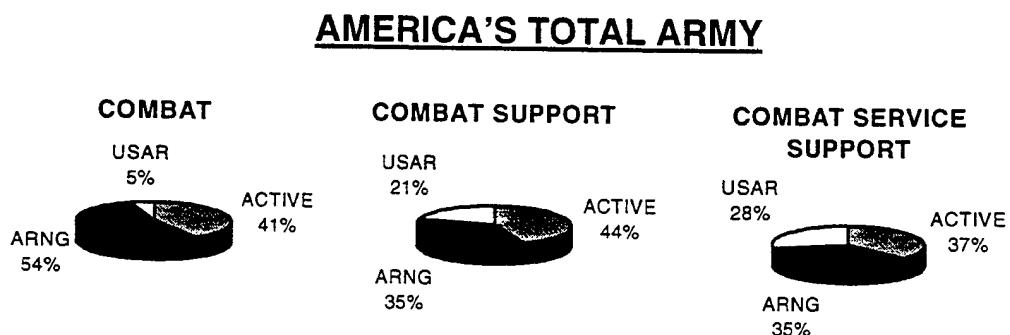

Figure 7. Projected FY99 force structure.

Full Time Support

The ARNG Full Time Support (FTS) Program conducts the organization, administration, recruitment, training, and maintenance of ARNG units. These individuals represent a cadre of Military Technicians (excepted civil service) and AGR soldiers who accomplish the daily operations and are essential for maintaining unit readiness. Excepted civil service personnel are required to be military members of the ARNG state

military department that they support. The NGB receives FTS authorizations each year in the Defense Authorization Act and allocates resources to the states and territories based on a “tiered readiness” methodology - the premise of “first to fight...first to resource.” As with funding reductions experienced throughout the rest of the DoD, the NGB FTS military technician program has the following projected reductions:

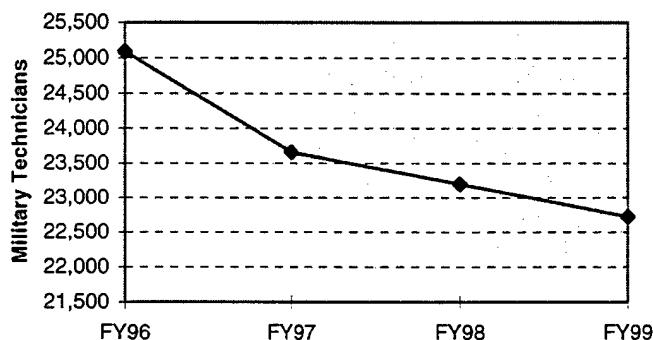

Figure 8. NGB military technician downsizing.⁶²

The AGR program has two categories, those FTS personnel with federal positions and then, those in state-affiliated positions. Under the provisions of Title 10, United States Code, there are AGR soldiers that serve at the NGB headquarters and other major commands, ranging from the USARC and ARPERCEN, to the Army Materiel Command and throughout the warfighting force. In the second category, there are AGR soldiers serving in selected positions within the individual military departments of each state and territory. These AGR soldiers serve at the convenience of The Adjutant General (TAG) under the provisions of Title 32, United States Code. Both categories of personnel receive pay and benefits commensurate to the status of an active duty military member.

The AGR component is programmed to decline from 67 percent to 56 percent by FY99. This represents a reduction of 1,640 AGR personnel over a four-year period.⁶³

State Employees

In addition to these federally-sponsored positions within the ARNG, selected states and territories have indigenous employees who have full-time employment but have no military status or federal affiliation. However, these “state employees” may be performing key functions (potentially including those that are acquisition related) throughout the respective military department.

Traditional Guardsmen

The last category of ARNG personnel is that of the “Traditional Guardsmen.” These individuals comprise approximately 85 percent of the ARNG TO&E and TDA units. They are required to conduct up to 48 IDT periods and one 14-day AT per year.

MANAGEMENT

The Chief, National Guard Bureau (CNSB) is a three-star general officer appointed by the President and confirmed by the Senate. The CNSB is responsible for administering the ARNG, as well as the Air National Guard (ANG), in all 50 states, the District of Columbia, and the three territories. Additionally, the CNSB serves as the Reserve Component representative to the four-star level Commander’s Conference. Within the NGB, the Director, ARNG (DARNG) oversees the administration of the budgeted resources among all of the ARNG structure. (The DARNG does not exercise

command and control over the 54 ARNG military departments.) At each of the state/territory levels, the individual military departments and units are under the direct command and control of TAG, an individual appointed by the governor of most of the states and territories.

The major military department within each state/territory is the State Area Command (STARC). The STARC exists for the primary purpose of providing trained and ready units capable of performing military support missions. These missions may be in support of state emergencies or disasters, or the STARCs might conduct them following federal mobilization and activation in support of a national purpose. There are seven enabling functions performed by the STARC for the purpose of ensuring that the assigned ARNG units are capable of accomplishing their state and federal missions, as presented in Figure 9.

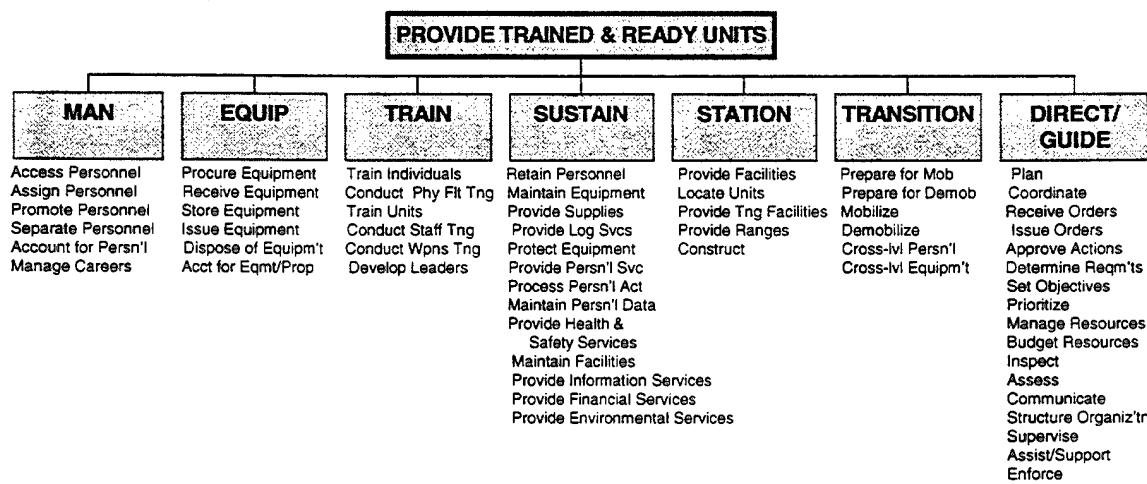

Figure 9. STARC mission enabling functions.⁶⁴

With the implementation of the Total Force Policy, the role of the STARC will evolve. STARCs will be required to balance increasing demands, set priorities, and ensure their assigned units remain trained and ready. It will be imperative that they accomplish these tasks within a cycle of continuous mobilization, deployment, demobilization, and retraining of selected units, while still providing responsive military support during state emergencies and disasters.⁶⁵ Ensuring that the STARC is manned with appropriately qualified personnel, particularly those in acquisition-related positions, will enhance the capability of the STARCs in meeting these mission requirements.

ACQUISITION-RELATED NGB/ARNG ACTIVITIES

The NGB, and specifically the ARNG, have numerous activities and programs that constitute functions that are “acquisition-related” as defined by the DAWIA (Figure 5). At the Headquarters, NGB, the most notable is the organization under the Principal Assistant Responsible for Contracting (PARC). Among the subordinate directorates of the Office of the DARNG are the Logistics (NGB-ARL) and Information Systems (NGB-AIS). Within the individual STARCs the corresponding principal activities would be with the organizations of the United States Property and Fiscal Office (USPFO) and the Director of Information Management (DOIM). Additionally, there are two discrete developmental projects, the Reserve Component Automation System (RCAS) and the Distance Learning Initiative that require acquisition corps qualified personnel.

Principal Assistant Responsible for Contracting

The office of the PARC (NGB-AQ) is the senior staff official responsible for oversight and administration of the National Guard contracting function and is the alter ego of the head of the contracting activity for all delegated responsibilities described in the Army Federal Acquisition Regulations (FAR) supplement. The contracting functions include all contracting procedures associated with coordination and execution of federal contracts, cooperative agreements and small business programs throughout all 50 states, the three territories and the District of Columbia.⁶⁶ The PARC is responsible for oversight of all the state/territory USPFO contracting activities.

Presently the office of the PARC has been the principal advocate within the NGB for integration of subject personnel into the AAW/AAC. The Field Support Branch (NGB-AQP-F) has completed the identification of personnel throughout the ARNG for certification and continued education and training in order to comply with the requirements of the DAWIA. The majority of these personnel are assigned to the USPFO within each of the STARCs.

Logistics Directorate, ARNG

The Logistics Directorate (NGB-ARL) is responsible for conducting the ARNG's DPP. As previously described, within the USAR (p. 41) the ARNG utilizes the DPP to offset its equipment shortfalls and requirements. With the advent of the Total Army concept and the transition of major shares of the force structure to the ARNG, the necessity for NGB-ARL to effectively execute all facets of the DPP process will be critical. Data pertaining to the ARNG DPP is presented in Appendix H.

United States Property and Fiscal Office

The USPFO serves as an agent of the CNGB, providing financial and logistical resources for support of both ARNG and ANG units at the state/territory, as well as custodianship and maintenance of federal property that is provided to the state/territory. The acronym “USPFO” is typically synonymous with the individual who is in charge of the organization. As such, the USPFO is normally an officer in the grade of Colonel (O-6) with a background in contracting. The position of the USPFO is designated as a United States Field Element National Guard Bureau (under the provisions of Title 10, USC), although the physical presence is at each STARC. However, as a point of interest, the USPFO is appointed by the state/territory TAG, despite being responsible to the CNGB.

The overall duties and functions of the USPFO consist of the following:

...Receipts and accounts for all funds and property of the United States in possession of the National Guard of the State. Makes returns and reports on Federal funds and property as directed by the Chief, National Guard Bureau, and the service Secretary, Army or Air Force. Requisitions, receives, stores, (maintains), and issues supplies and equipment in accordance with applicable Army and National Guard regulations. Performs the duties of purchasing and contracting in matters involving the use of Federal appropriated funds only. Furnishes the financial and fiscal support required in connection with military and technician pay and allowances. Issues the documents required for authorized transportation of Federal property and military and technician personnel of the National Guard of the State. Maintains required financial records and accounts and, on order of the Chief, National Guard Bureau, acts as an authorized Class B Agent Officer of the servicing Army finance and accounting office. Examines and verifies installation and organizational property books. Performs necessary examinations of financial management matter. Maintains files and performs required administrative tasks.⁶⁷

The notional organization of the USPFO structure at each state/territory is depicted in Figure 10.

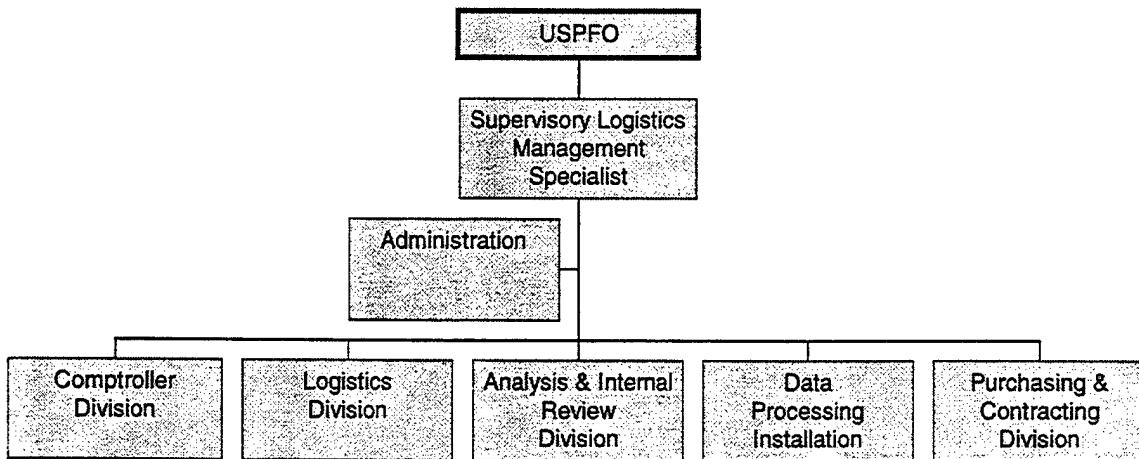

Figure 10. USPFO organizational structure.⁶⁸

Information Management

The Information Management (IM) function entails all facets of information resources and activities executed at the STARC for acquisition, development, collection, processing, integration, transmission, dissemination, distribution, maintenance, security, and other activities related to management of information. Information resources include the doctrine, policies, data, equipment, and software applications, as well as the related personnel, services, facilities, and organizations. The IM processes support the overall STARC mission to “provide trained and ready units” and the enabling functions by “providing automation support and services” (sustaining), and “managing IM programs” (directing/guiding). IM also includes elements of providing and maintaining equipment,

which supports the STARC equipping and sustaining functions. The overall IM functions are presented in Figure 11.

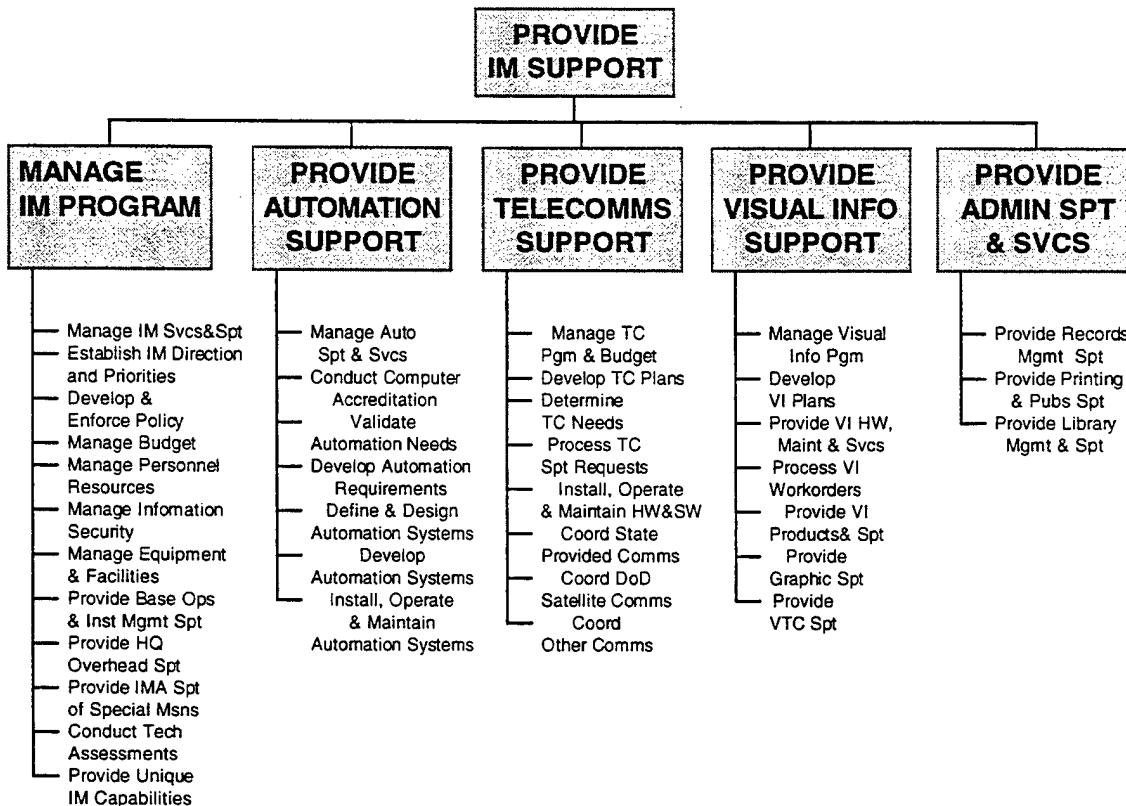

Figure 11. STARC information management functions.⁶⁹

Each Informational Management organization within a STARC has a Director of Information Management (DOIM) and a Data Processing Installation (DPI). The DOIM reports to the Chief of Staff, while the DPI reports to the USPFO. DPI organizations are normally staffed with operations management personnel, systems analysts, systems administrators, and database administrators. The DOIMs are typically staffed with a variety of automation, telecommunications, maintenance, and administrative personnel. It is readily apparent that a discontinuity of effort and redundancy exists within the

structure, functions and relationship between the DPI and DOIM. This observation will subsequently be discussed.

Program Management

Associated with the overall state of information management organization and functions within the ARNG has been the development of the Reserve Component Automation System (RCAS) over the past ten years. Additionally, a recent project pertaining to "Distance Learning" has been initiated. In both cases, strong arguments reflect the need for the Reserve Component to have qualified AAW/AAC personnel as integral members of the program efforts.

Established by a congressional mandate in FY87, the development of the RCAS was delegated to the CNGB. Initial requirements entailed the system to be a commercial off-the-shelf procurement with minimal new developmental effort. RCAS was to incorporate integrated hardware, software, telecommunications, and multi-level security provisions with the objective of supporting peacetime operations linking 8,000 Reserve Component units across 4,300 separate locations. The baseline cost estimate for the RCAS in FY91 was estimated to be \$1.7B which grew to \$2.1B by FY94, with a life-cycle cost estimate between \$3B and \$4B. At the same time, the scheduled completion of system fielding was extended by six years accompanied by reduced capabilities (requirements being met) of software blocks while incurring an increased number of projected software modifications and versions.⁷⁰

Of particular interest was the fact that the RCAS Program Management Office (PMO) was comprised of AGR personnel from the USAR and NGB, Department of the Army civilian personnel and extensive contractor support, and utilized no matrix support from outside agencies. With almost three times the number of personnel of the next largest information system PMO, the RCAS PMO represented the largest PMO structure in the Army. The RCAS was not required to follow either the DoD 5000 or 8000 series directives for acquisition systems.⁷¹ Due to the significant number of RCAS PMO personnel without acquisition experience, the absence of a rigorous set of guidelines resulted in major RCAS deficiencies and problems. A Department of the Army Inspector General (DAIG) report specifically stated "...more acquisition professionals are needed for the Reserve Components if they are to have responsibility for acquisition programs."⁷²

In response to the recommendations made by the DAIG, numerous measures have been taken to rectify the RCAS program. However, the lessons learned surely reflect that in the future the Reserve Component must fully be integrated into the Army Acquisition Corps and ultimately have its respective members trained, experienced and managing its acquisition-related activities.

VII. IMPLEMENTATION OF A “TOTAL ARMY ACQUISITION CORPS”

GENERAL

Through the preceding segments of this document an attempt was made to provide a cursory background to the salient nature, requirements and/or issues that respectively surround the Army Acquisition Corps, the United States Army Reserve and the Army National Guard, relative to their integration as a “Total Army Acquisition Corps.” In the course of researching background material to this effort, it became readily apparent that it had the potential to become an undertaking of significant proportions. Within the limitations of research capabilities and the available timeframe to conduct this effort, an encompassing compilation that addresses all identifiable factors was not feasible. In fact, it was discovered that since the inception of the DAWIA, numerous studies and other papers have addressed the subject of instituting the acquisition specialty within the Reserve Component in varying degrees and conclusions. Albeit, in many cases, the conclusions bear great similarity.

Accordingly, the remainder of this paper will present a variety of observations and findings, related factors and issues, as well as recommendations for approaches to implementing the acquisition specialty within the Reserve Component. Many points may appear to be redundant to the reader who has been associated with this objective over the past several years. These redundancies, although not intentional, may very well be the ongoing case. Issues and notional implementation steps which were readily identified by the authors at the preliminary stages of this research effort are fundamental in nature. As this and other studies have concluded, the key to implementation of the measures for

integration of the Reserve Component into the "Total Army Acquisition Corps" lies with overcoming institutional inertia and paradigms that impede change.

AAC/RESERVE COMPONENT PROCESS ACTION TEAM

The establishment of the AAC/Reserve Component Process Action Team (PAT) represented a significant move towards undertaking the necessary steps to identify and evaluate the requirements, as well as formulating the recommended actions towards integrating the Reserve Component into the AAC. As of the end of May 1997, the PAT has convened twice. The initial meeting was in December 1996 and the second in February 1997. Although there has been ongoing activity at the action officer level, the overall process has been observed to be progressing relatively slowly. This has been partially a result of the fact that the designated action officers must pursue the objectives of the PAT in addition to performing their normal duties. Additionally, key personnel who have been integral members of the PAT effort since its inception have changed, resulting in a loss of continuity for the overall effort. Given the scope of requirements and necessary coordination that must be accomplished between the Department of the Army, OCAR, and the ARNG, the current PAT approach will entail a protracted schedule to achieve objectives.

RECOMMENDATION: That OASA(RDA), OCAR and ARNG identify and assign selected personnel to serve as full-time members of a provisional integration team to perform the necessary staff requirements to achieve the development, coordination, and approval of a "Total Army Acquisition Corps" plan. Subsequent to the completion of this

task, these selected personnel may potentially be utilized to perform acquisition proponency functions within their respective components, or be assigned as their respective component's representative within the Acquisition Career Management Office (ACMO) at OASA(RDA).

RESERVE COMPONENT ACQUISITION PROPOGENCY ADVOCATES

Within the active Army, the Military Deputy to the ASA(RDA) fulfills an additional responsibility as the DACM. In being the DACM, he serves as the senior military officer in the AAC representing the senior leadership for acquisition issues and mentorship for the AAC, both military and civilian alike. The DACM assists the AAE in the implementation of the DAWIA and DoD regulations and guidance pertinent to the AAW. The DACM's implementation strategy includes ensuring that the requisite education, training, and other career development opportunities are provided to the AAW to enhance technical competencies and leadership qualifications. To this end, the establishment and recognition of an "Assistant DACM" to be an advocate of respective acquisition corps members and issues within both the USAR and ARNG would be of immeasurable benefit. Such an entity would facilitate the development and coordination of an acquisition implementation plan by the AAC/Reserve Component PAT or the aforementioned proposed provisional integration team. It is understood that within the OCAR, the assignment of such a function to a USAR flag officer (IMA) has been made and forwarded to the OASA(RDA) for approval.

RECOMMENDATION: The CAR and DARNG identify and formally appoint an acquisition certifiable individual of flag rank to serve in the capacity of their respective component's A/DACM. Consideration should be given to potentially having a single individual fulfilling the responsibilities for both the USAR and ARNG with the position being of rotational nature between the two components.

RESERVE ACQUISITION POSITION LIST

An ongoing task of the AAC/Reserve Component PAT has been the composition of an acquisition position list for the USAR, commonly referred to as the "Reserve Acquisition Position List (RAPL)." Through a series of solicitations distributed throughout the USAR and the MACOMs of the active force structure, attempts have been made to identify and document those positions with missions, roles and functions that are "acquisition-related" for inclusion on the RAPL. The degree of success to which these efforts have captured these positions is questionable. In some cases, within both the acquisition community and among the various Commander-in-Chief (CINC) organizations, there was either no response or they responded with no requirements or functions. When subsequently queried by the responsible PAT members regarding readily identifiable acquisition-related positions among these organizations (e.g., IMA managers, Contingency Contracting elements), secondary responses ranged from minimal comprehension of the criteria provided in the solicitations for identifying positions, to that of indifference or outright refusal to provide any response. One can only assume that the perception may be widely held throughout elements of the active force and reserve

components alike of an “acquisition corps” that is encroaching on an already finite, if not declining, number of at-large military positions.

In conjunction with the most recent active Army MAPL review conducted in late February of this year, the first RAPL validation board was conducted. Composed of an integrated active Army and Reserve Component membership, the board reviewed approximately 50 positions and certified 43 to be listed on the FY98 RAPL.⁷³ Additionally, these certified positions were then ranked by an order of merit list (OML) for criticality of requirements and need. The listing of these proposed positions which have been submitted for approval is presented in Appendix I.

Review of the FY98 RAPL composition reflects that the overwhelming majority of certified positions are identified as FA97 - Contracting/Industrial Management, and the remainder being two FA53 (Information Management), and three FA21 - Corps of Engineers (despite FA21 not being included by the DAWIA/DoD Instruction 5000 series as an “acquisition-related” specialty). An obvious omission are those positions that are directly involved in DPP management. Perhaps even more disconcerting is that over the past several years ad hoc efforts had composed an iterative listing of candidate positions for FY97 RAPL certification which totaled 831 positions. These positions reflected AGR, IMA, TPU(TDA) and TPU(MTOE), and are presented in Appendix J. ARNG positions were not included. One must paradoxically question, “Through what mechanism were only 50 positions submitted to the RAPL validation board?” If compilation of candidate RAPL positions relies upon responses from organizations in the

field, then conclusively a chronic and systemically flawed problem persists with this survey process. For the purposes of this discussion, the RAPL pertains to both military and civilian acquisition-related positions within the Reserve Component.

The AAC/Reserve Components PAT has been in the process of identifying positions for the FY99 RAPL Board. Preliminary data reflecting the composition of this next RAPL are presented in Appendix K.⁷⁴ Concurrently, the Logistics Division of the ARNG (NGB-ARL-SF) has issued a solicitation to all STARCs requesting a review of all TDAs in accordance with the position category descriptions contained in DoD 5000.52-M (Appendix B) for integration into the acquisition workforce. NGB-ARL-SF tasking message is presented in Appendix L.

Inherent deficiencies with the efforts regarding the composition of a legitimate RAPL are twofold. First is the recognition that the methodology for identification of a subject position must be based on requirements, given its mission, roles and functions description. Positions do not qualify or disqualify due to the qualifications of an incumbent who may be in a particular billet. Rather, each position description must be reviewed in accordance with the prescribed criteria set forth by the DAWIA and DoD Instruction 5000.52-M. It is recognized that this process may prove to be laborious and require significant coordination with numerous organizations in order to successfully compile a thorough listing of both military and civilian positions. It is essential that the PAT (or the proposed provisional integration team), as the recognized subject matter experts (SMEs), conduct this detailed review and composition of qualifying positions.

The second problem exists with artificially constraining a RAPL due to external constraints. It previously has been reported that the Army has identified upwards of 4,000 positions within the Reserve Component that are acquisition-related, with only 917 of these positions authorized and filled.⁷⁵ The firsthand source or timeframe for this data could not be identified. However, if the breadth of acquisition-related activities of the USAR and ARNG (e.g., PARC/USPFO structures) previously outlined was to be quantified, the number could potentially approach several thousand individuals performing acquisition functions. At this point, it is assumed that the differentiation between uniformed or civilian members of the Reserve Component among those positions has not been made or at a minimum, is not current.

There are several considerations that should be addressed in undertaking the composition of a comprehensive RAPL:

- The RAPL should ultimately be composed of both USAR and ARNG positions. Assuming the programmed transition of the total force structure continues, the potential for selected positions to cascade appropriately from the active to the Reserve Component is probable.
- TO&E and TDA organizations within the USAR and the ARNG should be screened for acquisition-related missions, roles and functions. Both existing and recently restructured organizations have acquisition activities that may not be readily identifiable (e.g., USAR - USARC, RSCs, RSGs; ARNG - DPI [within the USPFO], DOIM).

- Initial categorization of positions should be made on the basis of whether it is a FTS (AGR, DAC, or Military Technician), IMA, IRR, Traditional Guardsman or state employee.

- Given the existing manning structures within the USAR and ARNG, some acquisition-related functions potentially are being performed by either warrant officers or enlisted personnel. These cases by exception (e.g., full-time USAR DAC with USAR status as IMA/IRR; ARNG Military Technicians) must be appropriately identified in order to ensure that both the position and as a follow-on, its incumbent employee, are accounted for in organizational mobilization plans.

- Reconciliation of current IMA acquisition-related positions with those that were previously authorized and future programmed reductions. In that prior IMA reductions occurred in the absence of a comprehensive and validated RAPL, the potential exists that viably important IMA acquisition positions were eliminated. (Subsequently, correlation should be made pertaining to tenured incumbents who have been cut and potentially possess critical SM&E skills that are presently or in the future required by the Army.)

RECOMMENDATION: Empower the AAC/Reserve Component PAT as the authoritative entity for the coordinated survey of the USAR and ARNG structures and compilation of a comprehensive RAPL. Furthermore, the next RAPL review board should appropriately identify positions as AAW, AAC and CAP, along with ranking their respective OML.

MANAGEMENT

Since the inception of the DAWIA and until recently, the Reserve Components have demonstrated little, if any, compulsion to be integrated into a “Total Army” AAC. Although previously subject to arbitrary interpretation by the Reserve Components, the requirements and provisions of the DAWIA and associated DoD instructions, along with Department of the Army policies and guidance, finally appear to be embraced by the USAR and ARNG. The major efforts to accomplish the integration of respective USAR and ARNG elements into the AAC has been led by their headquarters logistics divisions, as evidenced by the respective logistics directors serving as co-chairmen of the AAC/Reserve Component PAT.

As previously noted, the identification of a flag officer to fulfill the role of an A/DACM and acquisition advocate for the USAR is commendable. However, a need exists within the respective Reserve Component headquarters to identify staff members to serve as the functional principals regarding policies, personnel and other related issues in order to facilitate the implementation of the “Total Army” AAW/AAC. The first requirement is to designate a counterpart to the Director, ACMO, within the OCAR and ARNG to serve as the respective component’s primary acquisition advocate on a daily basis. The overall nature of this initiative, in both sensitivity and criticality, mandates that these individuals be senior officers reporting directly to the CAR and DARNG.

The USAR has recently completed a critical step in establishing a required staff functionary in the designation of a position titled “Acquisition Functional Area Personnel

Management Officer (PMO)" at ARPERCEN. This individual will be charged with the oversight of the USAR AAC personnel certification, training and acquisition assignments, in addition to developing the USAR Acquisition Corps database. The memorandum establishing this function from the Deputy Chief, Army Reserve (Appendix M) acknowledges the need for the USAR to become "...a full partner in the Army Acquisition Corps" and the essential support that must be given to this effort.

At this time, it is not feasible and would be premature to prescribe a discrete management approach or structure for acquisition elements of the Reserve Components. As previously stated, in its entirety, this implementation action is predicated on the determination and validation of a legitimate RAPL that captures all of the acquisition-related missions, roles and functions that are being performed within the USAR and ARNG. Additional factors that should be considered include:

- That the ARNG establish a position similar to the USAR Acquisition PMO in order to adequately provide for integration of ARNG personnel into the AAW/AAC. (The NGB PARC currently performs associated personnel management functions for acquisition training and certification of individuals within the contracting areas of the ARNG/USPFO structures. The database for tracking personnel experience and certification developed by the NGB PARC is presented in Appendix N.)
- It has been found that among the active and Reserve Component that the management of acquisition personnel is seen primarily as a mobilization issue, rather than the performance of acquisition-related functions on a daily basis.

- The overall composition of a validated RAPL that captures all acquisition-related positions is required for the identification of overall grade structure distribution among Reserve Component personnel categories (e.g., AGR, Military Technician, IMA, IRR) for determination of single versus dual-track specialty designations, formulation of career development paths and development of associated promotion issues.

- Upon establishment of the RAPL and identification of the Reserve Component AAW/AAC population density, a determination can be made regarding promotability issues of the Reserve Component members. With the consolidation of the three FA designations within the AAW/AAC into a single "51_" designation and the inherent mobility that the USAR officer can exercise (e.g., transitioning between AGR tours and IMA positions), accrual of a variety of acquisition experience that is certifiable would be facilitated. However, due to the nature of the Reserve Components that varies assignments among functional areas, dual-tracking of the officer with his basic branch and the allowance to leave an AAC position would ensure the individual's ability to compete for position vacancy promotions in either FA, as detailed in the ROPMA.

- Pursuit of the aforementioned factors are highly dependent upon the development of a database(s) to adequately track acquisition positions and personnel (both qualifications and certification). Databases must possess compatibility in order to facilitate both management functions and reporting requirements for all AAW/AAC personnel within the active and Reserve Component. These capabilities must include provisions for discrimination of an individual's multiple status, specific qualifications (e.g., SM&E skills), and certification status. Additionally, the database must correlate to those utilized for mobilization planning and personnel assignments.

RECOMMENDATION: That the CAR and ARNG, respectively designate appropriate staff officer positions to meet functional requirements to adequately support the development, implementation and management of the AAW/AAC within the Reserve Component.

CERTIFICATION OF PERSONNEL

Significant concern has existed regarding the procedures that potentially will be followed in the certification of both military and civilian employees of the Reserve Component as members of the AAW/AAC and ensuring that provisions are made for DAWIA mandated education and training. In accordance with the DAWIA, all training opportunities are directly tied to, and authorized by, individual positions that have been certified on the MAPL and CAPL. Accordingly, the full spectrum of acquisition-related positions must be identified and approved on a validated RAPL. With this accomplished, an effort to correlate incumbents in those positions to the DAWIA certification criteria (Appendix B) can be initiated. A review of the certification criteria (to include the basis for credit due to experience) reflects that the criteria is relatively straightforward.

A major concern that repeatedly has been noted is the potential difficulty that Reserve Component officers (specifically, IMA/IRR/Traditional Guardsmen) will have in obtaining Level III certification within the AAC. The magnitude of this perceived problem may be exaggerated in that the number of positions within the RAPL that qualify as CAPs may be extremely small. Furthermore, these positions may predominantly be

filled by FTS personnel who will have the flexibility to attend required training courses to attain prescribed certification.

Within the active AAW/AAC, the DACM is the certifying authority for all career levels. Certification authority for Levels I and II has been delegated to the Chief, Military Acquisition Management Branch (OPB-E) at the Total Army Personnel Command. OPB-E forwards recommendations for Level III certification of officers to the DACM for approval.⁷⁶ A similar methodology can be followed by the Reserve Component. The recently established Acquisition PMO at ARPERCEN (and the recommended counterpart at ARNG) can serve as the component waiver authority for Levels I and II certification. It would be appropriate that with the appointment of an A/DACM (whether in joint capacity or in each component), Level III certification requests would require A/DACM endorsement and subsequent forwarding to the DACM for approval. In this manner, extenuating circumstances and mitigating factors that are unique to the member of the particular Reserve Component can be appropriately addressed.

It is widely recognized that undertaking the certification of the AAW/AAC within the Reserve Component will entail a significant commitment to resourcing required education and training for individuals. DoD components are required to ensure that military and civilian members of the AAW/AAC receive the education and training necessary to achieve full competencies to perform the duties of their assigned positions, within available resources. The Defense Acquisition University (DAU) Mandatory

Training Program is the vehicle for Army personnel to accomplish their Levels I, II, and III mandatory training prescribed for retention in an acquisition position. Funding for training is provided by the DAU.⁷⁷ Once a comprehensive RAPL is validated for USAR and ARNG positions (military and civilian), training allocations may be approved through the use of the Army Training Requirements and Resources System (ATRRS) which is already in place and utilized throughout the USAR and ARNG.⁷⁸ The establishment of an appropriate acquisition advocate at the OCAR and DARNG can ensure that required policy and resourcing issues, as well as their component priorities, are recognized at the ACMO at OASA(RDA).

An outstanding issue will exist with regard to the feasibility of providing the required education and training opportunities for non-FTS personnel within the USAR and ARNG. Essentially, the shortage of available resources for pay and allowances required to fund an individual's active duty for training (ADT) status may serve as a major impediment toward accomplishing training requirements for certification within a reasonable timeframe. This problem is compounded by the ongoing programmed reduction in funding across all accounts and the restrictive provisions for reprogramming funding therein.

RECOMMENDATION: Notwithstanding the completion of a comprehensive RAPL, the USAR Acquisition PMO (and recommended ARNG counterpart) should initiate a preliminary survey of candidate AAW/AAC officers for identification of existing certification status. A tentative projection of required funding to provide for additional ADT to meet anticipated mandatory training should be accomplished as soon as possible for inclusion as an additional line item within pay and allowances in the USAR/NGB budget request.

VIII. RESERVE COMPONENT ACQUISITION PILOT PROGRAMS

GENERAL

As previously identified there are numerous areas throughout the USAR and ARNG in which acquisition-related functions are being performed *status quo without the acknowledgment as such*. At the outset of this research effort, a preliminary objective, in light of ongoing and anticipated resource cuts, included the identification of additional acquisition roles in which the attributes of the Reserve Component could be leveraged to the overall benefit of the “Total Army.” Throughout the research effort and in the coordination with various individuals who have been a part of the effort to develop an acquisition implementation plan for the Reserve Component, it was readily recognized that the scope of this original objective was impractical. Accordingly, a decision was made to constrain recommendations for acquisition pilot programs to the existing structure of the USAR and ARNG, as well as other identified activities within the Army. The following discussion will not prescribe specific organizational restructuring or detailed changes in management approaches for the Reserve Components.

USAR/ARNG TDA STRUCTURE

Within each of the existing USAR and ARNG TDA structures are several organizations that are patently involved in executing missions, roles and functions that inherently can be categorized as “acquisition” under the provisions of the DAWIA. As the Army as a whole is confronted with resource reductions, each of the Reserve Components will assuredly be faced with impending decrements and the need to achieve greater efficiencies. Through the provisions of the DAWIA, extensive education and

training opportunities are available for our personnel to acquire enhanced qualifications and experience which will allow them to contribute to the overall pursuit of these needed efficiencies. As previously stated, the first step is the identification of these respective positions throughout the existing TDAs and their redesignation, a process which inherently is not a complicated one. In that these functions are being performed by FTS personnel, their qualification and certification as AAW/AAC members should be easily accomplished.

The selected overview of acquisition-related activities being conducted by the USAR (Section V) and the ARNG (Section VI) identified a significant number of areas that should be redesignated with acquisition positions. Within most of these organizations, the reclassification of these positions does not necessarily entail a requirement to totally reorganize. In the case of the ARNG, existing conditions and deficiencies within the information management areas of the USPFO (DPI) and DOIM have been recognized. A recent effort entitled "STARC Redesign Study" contains numerous findings and recommendations that identify the need to have the STARCs acquire qualified personnel and change the processes within the key and critical area of information management. If the ARNG is to be successful in meeting the challenges and its required posture and role in the Force XXI Army, it must overcome its generational and institutional resistance to change.⁷⁹

The DPP constitutes one area in which serious consideration should be given to significantly changing its organization and manner of operation. In every respect the

execution of the DPP represents an acquisition function. It would be extremely difficult, if not naive, to deny the fact that the DPP in its entirety constitutes program management activities. Accordingly, the notional structure of respective project offices for mission area products (e.g., Tactical Wheeled Vehicles, Armored Systems, Aviation, etc.) with qualified and certified Reserve Component AAC members is most appropriate, especially as the Army transitions to the "Total Force Structure" and the Reserve Component becomes the main user of selected products/systems. These designated Reserve Component project management offices should potentially reside within the respective commodity commands of the Army Materiel Command (AMC).

CONTINGENCY CONTRACTING

As the active Army has experienced overseas deployments ranging from combat operations such as DESERT SHIELD/DESERT STORM to an ever-increasing number of operations other than war (OOTW) in locations such as Bosnia and Haiti, the Reserve Component has attempted to fulfill a critical role in meeting contingency contracting requirements. Initial observations from Operation VIGILANT WARRIOR have indicated that the lack of a deployable TO&E contracting command has forced the Army to form an ad hoc contracting organization to support the deployed contingency force.⁸⁰ In the most fundamental sense, contingency contracting consists of the provision of those needed essential supplies and services to sustain the mission, including emergency contracting within CONUS and OCONUS. However, the existing force structure and operational planning has no provisions for contingency contracting nor was there recognition of ad hoc support.

In that USAR personnel have been utilized in the capacity of FA97 - Contracting and Industrial Management to meet these shortfall requirements, it was readily identified that these ad hoc positions qualify for certified AAC individuals. In response to this recognized requirement a plan was developed which provided USAR support in the form of deployable management teams entitled "Team LOGCAP." LOGCAP stands for Logistics Civil Augmentation Program. The objective of LOGCAP is to leverage civilian corporate resources as combat support and combat service support (CS/CSS) multipliers for U.S. Army force capabilities, provide a rapid and responsive "Green Suit" Team LOGCAP contract capability, support exercises conducted by Army Commands, and exercise the contractor.⁸¹

In a joint decision, the Chief of Staff, OCAR, USAMC Reserve Component advisor, and the Project Manager, LOGCAP, agreed that establishment of a USAR TPU was the most desirable approach to meeting the LOGCAP support objectives. To accomplish this mission, a TPU strength of sixty-one operational personnel and approximately five administrative personnel are required. Manpower requirements are seven FTS (AGR) with the remaining personnel serving in a drilling status. Additional FTS support will be provided by up to an anticipated twelve temporary tour-active duty (TTAD)/active duty-special work (ADSW) man-years annually, provided by this TPU drilling reserve pool and other Reserve Component logistics functional commands.⁸² A detailed briefing outlining the overall LOGCAP concept and use of the USAR is provided in Appendix O.

In the process of researching information regarding contingency contracting issues, the LOGCAP initiative was inadvertently discovered and apparently is not widely known by elements of the OCAR that are working the issues regarding the USAR integration into the AAW/AAC. It is recommended that the respective positions in the LOGCAP TPU be submitted for inclusion in the next RAPL.

IMA/IRR PERSONNEL

Presently the IMA and IRR authorizations and management programs are undergoing significant reductions and change. Inquiries and requests for definitive information from authoritative sources were either respectfully denied or responded to in an ambiguous manner. It is suspected that given the overall climate of further anticipated reductions and preliminary recommendations of the Quadrennial Defense Review, that the IMA program in particular will be negatively impacted. Recent policy changes have converted IMA positions into IRR, with four associated levels of status. Sources at the Department of the Army and OCAR requesting anonymity for non-attribution, have indicated that the Army will be required to reduce the Reserve Component by as much as 30,000 soldiers and that this may completely decimate the IMA program.

Accordingly, any formulation of proposals in which IMAs would augment the acquisition mission would be futile. The fact remains that individual IMAs still represent a viable resource that should be properly utilized to the maximum extent possible. AAC-certified IMAs organized into specialized IMA detachments could serve as adjunct

personnel in satellite locations. With current communications technology, the IMAs could augment PEO/PM organizations in a variety of capacities. Over a negligible period of time and experiencing relatively little turnover, these IMA personnel would represent a credible knowledge base for the PEO/PM organization that could fulfill either local or offsite requirements ranging from selected functions within integrated process teams, special studies, source selection efforts and SMEs in support of test and evaluation programs. It is recognized that resourcing of the IMA program is an issue. Uncertainties exist about the feasibility of reprogramming RDT&E funding to provide for TTAD/ADSW tours for IMA personnel. Further development and support of the "Points for Projects" Program may provide an alternative means of capitalizing on IMA resources.⁸³ Upon clarification of programmed resources it is recommended that an effort be dedicated to the development of a revised IMA utilization program.

IX. CONCLUSION

Undertaking this research project as a joint effort between Senior Service College Fellows of the active Army and Army National Guard, we, the authors, approached the subject of Reserve Component integration into the Army Acquisition Corps, which has been acknowledged to be an extremely emotional matter, with the intent of ensuring impartiality and objectivity in providing the factors, issues and concerns of each component that is involved with this action, those being, the OASA(RDA), OCAR, and ARNG. The format that was followed in structuring this document sought to provide an understanding of the perspectives and characteristics of these organizations, so that pertinent issues would be readily understood by all components. In the course of our efforts to obtain information, whether written or verbal, every attempt was made to ensure the accuracy of material and afford various elements of each organization the opportunity to comment or provide supplementary information, particularly when issues were identified to be controversial. Additionally, it was found that pursuit of all factors and relative issues would be of such a scope and magnitude that it would prove to be well beyond the limitations afforded this research project. It is recommended that existing, as well as emerging, issues and requirements pertaining to the integration of the Reserve Component into the AAW/AAC be researched (perhaps as a group) by the multi-component Senior Service College Fellows in residence at the Center for Professional Development and Training at The University of Texas at Austin. However, any such tasking must have the dedicated and authoritative endorsement from the leadership of each component in order to empower the researchers and overcome the institutional resistance that was repeatedly encountered in the course of this effort.

It is readily apparent that throughout the USAR and ARNG, both military and civilian personnel are performing acquisition-related functions on a daily basis. In the overwhelming majority of cases, these personnel have not been provided the necessary education and training or the acknowledgment and certification that their experience deserves, as prescribed by law. To that end, the provisions and requirements of the law and the associated DoD instructions are abundantly clear. The DAWIA has as an objective not only to overcome the historical flaws of the DoD acquisition process, but also to provide for enhanced professionalism throughout the acquisition workforce. The applicability of the DAWIA is not subject to interpretation at will by the Reserve Component. Throughout the USAR and ARNG there are numerous indications of institutional resistance to any change and the persistence to conduct business in a disjointed and parochial manner.

The “Total Army” has undergone and will experience further change. Confronted with dwindling resources and the need to achieve greater efficiencies to accomplish its missions, *the active Army, the USAR and the ARNG must embrace these challenges.* Modernization and life-cycle support of systems are a critical part of our soldiers’ ability to accomplish their missions, whether in peacetime, contingency, or mobilization. The acquisition functions that are being performed throughout the Reserve Component necessitate that the workforce be the best qualified - and this is only possible by affording them the education and training that is available by becoming a part of the *Total Army Acquisition Workforce.*

Congress and DoD have mandated that the services comply with the requirements of the DAWIA. Within the Army, the AAE has expressed the imperative to have the provisions of the DAWIA enforced throughout the Total Army Acquisition Workforce. The time has come for the leadership to seize this imperative - *the DACM, CAR and DARNG must pronounce the “Total Army Acquisition Corps” in unison throughout their components and ensure that all personnel can make their maximum contribution to the enhancement of the Total Army.*

Appendix A:
List of Acronyms

LIST OF ACRONYMS

AAC	Army Acquisition Corps
AAE	Army Acquisition Executive
AAW	Army Acquisition Workforce
AC	Active Component
ACMO	Acquisition Career Management Office
A/DACM	Assistant Director, Acquisition Career Management
ADSW	Active Duty-Special Work
ADT	Active Duty for Training
AGR	Active Guard Reserve
AMC	Army Materiel Command
ANG	Air National Guard
APRS	Acquisition Position Review System
ARCOMs	Army Reserve Commands
ARNG	Army National Guard
ARNGUS	Army National Guard of the United States
ARPC	Army Reserve Personnel Command
ARPERCEN	Army Reserve Personnel Center
ASARDA	Assistant Secretary of the Army for Research, Development and Acquisition
ASB	Army Science Board
AT	Annual Training
ATRRS	Army Training Requirements and Resources System

CAP	Critical Acquisition Position
CAPL	Civilian Acquisition Position List
CAR	Chief, Army Reserve
CINC	Commander-in-Chief
CNGB	Chief, National Guard Bureau
CONUS	Continental United States
CS	Combat Support
CSS	Combat Service Support
DA	Department of the Army
DACM	Director, Acquisition Career Management
DAIG	Department of the Army Inspector General
DARNG	Director of the Army National Guard
DAU	Defense Acquisition University
DAWIA	Defense Acquisition Workforce Improvement Act
DMR	Defense Management Review
DoD	Department of Defense
DoDI	Department of Defense Instructions
DOIM	Director of Information Management
DPI	Data Processing Installation
DPP	Dedicated Procurement Program
FAR	Federal Acquisition Regulation
FORSCOM	United States Forces Command
FTS	Full Time Support

FTUS	Full Time Unit Support
GAO	Government Accounting Office
GSU	Garrison Support Unit
IDT	Inactive Duty for Training
IM	Information Management
IMA	Individual Mobilization Augmentee
IRR	Individual Ready Reserve
LOGCAP	Logistics Civil Augmentation Program
MAPL	Military Acquisition Position List
MOA	Memorandum of Agreement
NGB	National Guard Bureau
NGREA	National Guard and Reserve Equipment Appropriation
OASA(RDA)	Office of the Assistant Secretary of the Army for Research, Development and Acquisition
OCAR	Office of the Chief, Army Reserve
OEC	Army Operational Evaluation Command
OML	Order of Merit List
OSD	Office of the Secretary of Defense
PARC	Principal Assistant Responsible for Contracting
PAT	Process Action Team
PEO	Program Executive Office
PERMS	Personnel Electronic Record Management System
PERSCOM	U.S. Army Personnel Command

PMO	Program Management Office
QDR	Quadrennial Defense Review
RAPL	Reserve Acquisition Position List
RASL	Reserve Active-Status List
RC	Reserve Component
RCAS	Reserve Component Automation System
RD&A	Research, Development and Acquisition
RDT&E	Research, Development, Test and Evaluation
ROPMA	Reserve Officer Personnel Management Act
ROTC	Reserve Officer Training Corps
RSC	Regional Support Command
RSG	Regional Support Group
SES	Senior Executive Service
SME	Subject Matter Expert
SM&E	Science, Mathematics and Engineering
STARC	State Area Command
TAG	The Adjutant General
TDA	Table of Distribution and Allowances
TIG	Time-in-Grade
TIS	Time-in-Service
TOE	Table of Organization and Equipment
TPU	Troop Program Unit
TRADOC	U.S. Army Training and Doctrine Command

TTAD	Temporary Tour-Active Duty
TWI	Training with Industry
USAR	United States Army Reserve
USARC	United States Army Reserve Command
USC	United States Code
USPFO	United States Property and Fiscal Office
USSASSDC	U.S. Army Space and Strategic Defense Command

Appendix B:
Position Category Descriptions

Appendix A.

Position Category Description

Program Management

Typical Duties: Manage a defense acquisition program. Responsibilities may be broad (e.g., PM, DPM, or PEO) or focused (e.g., Assistant PM for a particular function), and may be line or staff in nature. The execution of the duties of those positions is guided by DoD Directive 5000.1, DoD Instruction 5000.2, DoD 5000.2-M, DoD Directive 8120.1, and DoD Instruction 8120.2 (references (a), (b), (e), (f), and (u)), or related issuances governing acquisition programs in the DoD Components. Not covered in this category are basic research programs. Positions providing oversight rather than management of DoD acquisition programs fall under the Program Management Oversight position category.

Typical Career Codes ¹			
Civilian Series	Army Area of Concentration (AOC)	Navy Additional Qualification Designator (AQD)	Air Force Specialty Code (AFSC)
0301, 0334, 0340, 0343, 0391, 0560, 08XX, 1101, 13XX, and 1515	51, 53B, 53C, and 97	AA (Any AQD beginning with AA)	60CX, 26LX, 33SX, and 63AX

Representative Job Titles:

Line: CAE, PEO, Program Director, PM, direct reporting PM (DRPM), Deputy PM or Deputy DRPM, and Project Manager Staff: Designated position on the Acquisition Commander's Staff, Assistant PM, designated personnel on the PEO or the PM's Staff, Program Analyst, Program Integrator (PI) or Representative

Representative Office Locations: Offices responsible for managing one or more defense acquisition programs (whether called a "system program office", "program office", "project office", or by another name). Offices of the CAE, PEO and similar organizations, such as DRPM offices and offices having PEO-like charters in materiel and similar acquisition organizations. Depending on the organizational structure of a component, positions in that category shall also be found in functionally structured offices that provide matrix support to defense acquisition programs, including both headquarters (e.g., system command and field activities (e.g., warfare centers, Supervisors of Shipbuilding and Defense Contract Management Command (DCMC) elements). Barring exceptional circumstances, all positions in that category would be found in acquisition organizations.

¹ Possession of one of those career codes does not necessarily mean inclusion in the acquisition workforce or the program management career field.

Career Path Program Management

Level and/or Typical Grade	Typical Assignments	Experience	Education	Training ¹
Level I GS-6 through GS-9 O-1 through O-3	Program office, PEO staff, or program management staff PI or program analyst 0.1 through 0.3	<p>Mandatory: One year of program management experience</p> <p>Desired: Baccalaureate degree preferably with a major in engineering, systems management, or business administration</p>		<p>Mandatory: One basic (Level I) DAU course in systems acquisition management</p> <p>Desired: One basic (Level I) DAU course in another functional area</p> <p>Desired: One intermediate (Level II) DAU course in systems acquisition management</p>

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for that career field.

Career Path Program Management

<u>Level and /or Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level II GS-9 through GS-12 O-3 through O-4	Program office staff officer, branch chief, or project leader Acquisition command program management, engineering, test, acquisition logistics, and financial and/or resource management staff Broadening or operational assignment Education and/or training with industry PI or program analyst	Mandatory: Two years of acquisition experience; at least 1 year of this experience must be in program management Desired: An additional 2 years of acquisition experience, preferably in a systems program office or similar organization	Desired: Master's degree, preferably with major in engineering, systems management, business administration, or a related field	Mandatory: One intermediate (Level II) DAU course in systems acquisition management Desired: One intermediate (Level II) DAU course in another functional area Desired: Intermediate level management and leadership training

Career path note: Upon achieving Level II or III, an individual should plan on meeting the criteria for the Acquisition Corps. Criteria for selection into the Acquisition Corps for civilian personnel include serving in a position graded GS-13, and above and in the case of officers includes serving in the grade of O-4, and above. Criteria further include: (1) Four years acquisition experience; (2) A baccalaureate or certification by an ACPB; and (3a) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization, and management; or, (3b) At least 24 semester credit hours in the individual's career field, and 12 semester hours or equivalent training in the disciplines listed above; or, (3c) Pass an equivalency exam².

¹Refer to current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for this career field.

²See Appendix M for specific requirements for Acquisition Corps admission. Credit by examination is directed by 10 U.S.C. 1732(c) and covered in DoD Instruction 6000.58 (references (d) and (e)).

Career Path Program Management

Level Typical Grade	Typical Assignments	Experience ¹	Education ¹	Training ^{1, 2, 3}
Level III GS-13, and above O-4, and above	PEO PM or project manager or DPM or deputy project manager Service HQ staff Acquisition command HQ director, division chief, and acquisition staff PI or program analyst	<p>Mandatory: Four years of acquisition experience; of which at least 2 years must have been in a program office or similar organization (defined as dedicated matrix support to a PM or PEO; DCM/C PI, or Supervisor of Shipbuilding)</p> <p>Desired: Two additional years of acquisition experience</p>	<p>Desirable: Systems acquisition management education as demonstrated by: (1) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (2) At least 24 semester credit hours in the individual's career field and 12 semester credit hours in the disciplines listed above</p> <p>Desired: Master's degree in engineering, systems acquisition management, business administration, or a related field</p>	Mandatory: One Advanced (Level III) DAU Course in program management

¹PEO, PMs, or, DPMs of ACAT I and II programs, CAPs, and Acquisition Corps members have specific experience, education and training requirements. A General, Flag officer, or, SES must have at least 10 years experience in acquisition positions. At least 4 years of that experience must have been performed while assigned to a CAP. See Appendix M for additional information.

²Individuals not certified at Level III as of the effective date of this Manual have until October 1, 1998, or 18 months after assignment to a new or different Level III position (whichever is later) to meet this standard for certification.

³Refer to the current edition of reference (o) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for this career field.

Career path note: CAPs may only be filled by members of an Acquisition Corps.

Appendix B.

Position Category Description

Communications-Computer Systems

Typical Duties: Provide direct support for the acquisition of automated information systems (AIS) and interconnecting components (to include hardware, software, firmware products, or other items) used to create, record, produce, store, retrieve, process, transmit, disseminate, present, or display data or information. Includes computers, ancillary equipment, software, telecommunications, and other related services. Identify requirements, write and/or review specifications, identify costs, obtain resources (manpower, funding, and training), test, evaluate, plan, obtain, and manage life cycle support (operations, maintenance, and replacement). To be an acquisition position, those duties must be accomplished under the authority of DoD Directive 8120.1 and DoD Instruction 8120.2 (references (t) and (u)). If the duties required by a position do not meet that criterion, then it is not normally an acquisition position.

Typical Career Codes¹				
Civilian Series	Army AOC	Navy AQD	Air Force AFSC	Marine Corps MOS
0301, 0334, 0343, 0391, 0392, 0801, 0854, 0855, 1101, 1515, and 1550	53B and 53C	AR (Any AQD beginning with AR)	33SX, 61SXA, 62EXC, 63AXB, and comparable enlisted AFSCs	4002, 9646, 2502, 2602, and 2802
Representative Job Titles: Information Management Specialist or Officer, Software or Automation Specialist or Officer, Information Systems Staff Officer, Computer Scientist and Systems Automation Engineer, Telecommunications Specialist, Computer Engineer, Computer Systems Analyst, Materiel Acquisition Officer, PM				
Representative Office Locations: Major Command HQ, Service Component HQ, Software Development Centers, Directories of Information Systems for Command, Control, Communications, and Computers, Program Management Office, DoD Acquisition Agencies, DCMC				

¹Possession of one of these career codes does not necessarily mean inclusion in the acquisition workforce or the communications computer career field.

Career Path Communications-Computer Systems

<u>Level and/or Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level I GS-5 through GS-9 O-1 through O-3	PEO office staff Communication and/or computer staff PM office staff Systems engineering staff Software development staff	Mandatory: One year of acquisition experience in communication and computer systems	Desired: Baccalaureate degree, preferably with a major in computer science, management of AIS, business administration, or a related field	Mandatory: One basic (Level I) DAU course in systems acquisition management Mandatory: One basic (Level I) DAU course in AIS acquisition management

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for that career field.

Career path note: CAPs may only be filled by members of an Acquisition Corps.

Appendix C.

Position Category Description

Contracting (including Construction)

Typical Duties: Develops, manages, supervises, or performs policies and procedures involving the procurement of supplies and services; construction, research, and development; acquisition planning; cost and price analysis; selection and solicitation of sources; preparation, negotiation, and award of contracts through sealed bidding or negotiation procedures, and all phases of contract administration, termination, or close out of contracts. Requires knowledge of the legislation, policies, regulations, and methods used in contracting, and knowledge of business and industry practices, sources of supply, cost factors, cost and price analysis techniques, and general requirements characteristics.

Typical Career Codes ¹			
Civilian Series	Army AQCs	Navy AQD	Air Force AFSCs
1101 and 1102 ²	67K and 97A	AC (Any AQD beginning with AC)	64PX, 6COX1, and comparable enlisted AFSCs

Representative Job Titles: Procurement Analyst, Administrative Contracting Officer, Contract Price and/or Cost Analyst, Contracting Officer, Contract Negotiator, Contract Specialist, Contract Administrator, Contract Termination Specialist, Procurement Contracting Officer, and Termination Contracting Officer.

- ¹All contracting officers are included in this category regardless of function or series
²Civilian Occupational Series 1102 is always included in the Acquisition Contracting position category and career field regardless of organization.

Career Path

Contracting (including Construction)

Level and/or Typical Grade	Typical Assignments	Experience ¹	Education ¹	Training ²
Level I GS-5 through GS-9	Contract specialist Contract administrator	Mandatory: One year of contracting experience	Mandatory: (1) Baccalaureate degree; or, (2) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization, and management; or, (3) Pass equivalency exam(s); or, (4) Have at least 10 years acquisition experience as of October 1, 1991; ³	Mandatory: One basic (Level I) DAU course in contracting
O-1 through O-3 E-3 through E-4	Contract cost and/or price analyst Procurement analyst			Mandatory: One basic (Level I) DAU course in contract pricing

¹See Appendix M, sections M. and N., for specific requirements for contracting personnel.

²Credit by examination is directed by 10 U.S.C. 1724 and covered in DoD Instruction 5000.58 (reference (d) and (g)).

³Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (e)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for this career field.

Career Path Contracting (including Construction)

<u>Level and /or Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education¹</u>	<u>Training²</u>
Level II GS-9 through GS-12	Contract specialist Contract administrator	Mandatory: Two years contracting experience Desired: An additional 2 years of experience in contracting	Mandatory: (1) Baccalaureate degree; or, (2) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (3) Pass equivalency exam(s); or, (4) Have at least 10 years acquisition experience as of October 1, 1991 ³	Mandatory: One intermediate (Level II) DAU course in contract law Mandatory: One intermediate (Level II) DAU course in cost and price analysis Mandatory: One intermediate (Level II) DAU course depending on contracting orientation specialty (e.g., pre-award or post-award)
O-3 through O-4 E-6 through E-9	Contract cost and/or price analyst Contracting officer Procurement analyst			Desired: Graduate studies in business administration or procurement

Career path note: Upon achieving Level II or III, an individual should plan on meeting the criteria for the Acquisition Corps. Criteria for selection into the Acquisition Corps for civilian personnel include serving in a position graded GS-13, and above, and in the case of officers includes serving in the grade of O-4, and above. Criteria further include: (1) Four years acquisition experience; (2) A baccalaureate degree or certification by an ACPB; and (3a) At least 24 semester credit hours from among the following disciplines, i.e., accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (3b) Pass equivalency exam(s).⁴

¹Education requirements are not applicable to individuals with at least 10 years of acquisition experience (as of October 1, 1991) in Government or industry acquisition positions. (See 10 U.S.C. 1724 (c), reference (d).)

²Credit by examination is directed by Section 1724 of reference (d) and covered in DoD Instruction 5000.68 (reference (g)).

³Refer to current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for this career field. One or more Level II DAU courses may be mandatory, depending upon functional specialty but not required for career certification.

⁴For individuals whose duties do not clearly fall into one of those orientation specialties, the Component shall assign them to the orientation specialty most closely approximating the greatest portion of their duties.

⁵See Appendix M for specific requirements for Acquisition Corps admission. Credit by examination is directed by Section 1732(c) of reference (d) and covered in DoD Instruction 5000.68 (reference (g)).

Level III	Procurement analyst	Mandatory: Four years contracting experience	Mandatory: (1) Baccalaureate degree; or, (2) At least 24 semester credit hours from among the following disciplines, i.e., accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (3) Pass equivalency exam(s); or, (4) Pass pre-award or post-award ³	Mandatory: One advanced (Level III) DAU course in executive contracting ⁴
GS-13, and above	Branch head			
O-4, and above	Division director	Desired: An additional 4 years of contracting experience		Mandatory: One advanced (Level III) DAU course in primary contract orientation (e.g., pre-award or post-award).
	Director of contracts			
	Supervisory contracting officer		Desired: Have at least 10 years of acquisition experience as of October 1, 1991 ⁵	Desired: Two weeks management and leadership training

Appendix C. 1.

Position Category Description

Industrial and/or Contract Property Management

Typical Duties: Manages, supervises, performs, or develops policies and procedures for professional work involving the acquisition, control, management, use, and disposal of Government-owned property used by contractors or in storage to support future contractual requirements. Responsibilities include providing guidance, counsel, and direction to Government and contractor managers and technicians on regulatory and contractual requirements for managing Government property; participating in pre-award surveys and post-award reviews; reviewing contracts assigned for property administration; evaluating contractor's property management system and approving the system or recommending disapproval; developing and applying property systems analysis programs to assess the effectiveness of contractor's Government property management systems. Those functions are normally performed by property administrators, as part of the contract administration office team, and as required by Parts 42.3, 45, and 245 of the FAR, and the DPARS (references (c) and (J)). Plant clearance officers are responsible for performing the duties necessary to dispose of excess and surplus contractor inventory in accordance with Part 45.6 of reference (c) and Part 245.6 of reference (J) requirements. Civilian occupational series 1103 ("Property Administration and Plant Clearance") is always included in the "Industrial Property Management" career field, regardless of organization. GS-1102 and GS-1150 series, and others, that are performing industrial and/or contract property management as a primary job function must meet the education and training standards for that acquisition career field, besides their own career field.

Typical Career Codes¹

Civilian Series	Army AOC	Navy AQD	Air Force AFSC	Marine Corps MOS
1103 (always), 1102 and 1150 (if performing industrial and/or contract property management responsibilities) and others	97C	AD (Any AQD beginning with AD)	64PQ	None

Representative Job Titles: Industrial Property Management Specialist, Property Administrator, Industrial Plant Clearance Specialist, Plant Clearance Officer, Contract and Industrial Specialists (if assigned property management responsibilities).

¹ Possession of one of these career codes does not necessarily mean inclusion in the acquisition workforce (except for 1102s who are always included in the contracting position category and career field, regardless of organization) or, the industrial and/or contract property management career field.

Career Path Industrial and/or Contract Property Management

<u>Level and/or Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>

¹A General, Flag officer, or, SES must have at least 10-years experience in acquisition positions. At least 4 years of that experience must have been performed while assigned to a CAP.

²Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for this career field.

³See Appendix M for specific requirements for Acquisition Corps admission.

⁴Two courses, "Executive Contracting" and "Contract Property Management Seminar," should be taken as refresher courses every 3 to 5 years but do not have to be repeated to maintain certification.

Career path note: CAPs may only be filled by members of an Acquisition Corps.

Appendix C. 2.

Position Category Description

Purchasing and Procurement Technician

Typical Duties: Purchase, rent, or lease supplies, services, and equipment through either formal open-market methods or formal competitive bid procedures, with the primary objective of the work being the rapid delivery of goods and services in direct support of operational requirements. Requires knowledge of commercial supply sources and of common business practices for roles, prices, discounts, deliveries, stocks, and shipments.

Typical Career Codes			
Civilian Series	Army AQC	Navy AQD	Air Force AFSC
1105 and 1106	97A	AE (Any AQD beginning with AE)	64PX and 6COX1
Representative Job Titles:			
Purchasing: Purchasing Agent, Supervisory Purchasing Agent, and Procurement Technician			

Career Path Purchasing

<u>Level and/or Typical Grade</u>	<u>Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level I GS-5 E-1 through E-2		Mandatory: One year of experience in purchasing	Desired: Sixteen semester hours of undergraduate work, with emphasis in business	Mandatory: One basic (Level I) DAU course in purchasing
Level II GS-6 through GS-8 E-2 through E-3		Mandatory: Two years of experience in purchasing	Desired: Thirty-two semester hours of undergraduate work, with emphasis in business	Mandatory: One intermediate (Level II) DAU course in purchasing
Level III GS-9 E-4		Mandatory: Three years of experience in purchasing	Desired: Sixty-four semester hours of undergraduate work, with emphasis in business	

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet that training standards for this career field.

Career Path Procurement Technician

<u>Level and/or Typical Grade</u>	<u>Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level I GS-3 through GS-6		Desired: One year of clerical or office experience	Desired: High school diploma or high school equivalency	
Level II GS-6 through GS-7		Desired: Two years of clerical or office experience in a contracting office	Desired: Sixteen semester hours of undergraduate work, with emphasis in business	Desired: If job is base or post oriented, one basic (Level I) DAU course in small purchasing
Level III				No level III standards for that series

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for that career field.

Career path note: Effective March 31, 1996, the "procurement technician" career path shall no longer be covered by the Defense Contracting Career Management Board

Appendix D.

Position Category Description

Acquisition Logistics

Typical Duties: Acquisition logistics personnel include individuals, regardless of civil service series or military occupation specialty, who are involved in integrated logistics support (ILS) activities defined in DoD Directive 5000.1, and DoD Instruction 5000.2, (references (a) and (b)), or who manage logistics associated with the procurement, integration, and fielding of support systems and/or environment for weapon systems and/or equipment or for system modifications.

Typical Career Codes ¹				
Civilian Series	Army AOC	Navy AQD	Air Force AFSC	Marine Corps MOS
0346, 08XX, 1516, and others	61, 53B, 53C, and 97A	AL (Any AQD beginning with AL)	20CX, 21AQ, 22MQ, 23SQ, 24TQ, 26LX, 62EX, 63AX, and comparable enlisted AFSCs	0402, 3002, 3502, 9662, 6602, 9967, 9958, and 9959
Representative Job Titles: Director of Acquisition Logistics (DAL), DPM for Logistics (DPML), and Assistant PM for Logistics, (APML), ILS Officer, and ILS Manager (ILSM), Logistics Element Manager (LEM), Logistics or General Engineer, and Logistics Management Specialist (LMS).				
Office Location: System program offices, program offices, management support staffs, or within other logistics activities responsible for conducting ILS program reviews or for establishing acquisition logistics policies and procedures.				
¹ Individuals with various job series and job titles perform acquisition logistics functions. Those are the most common, but not all inclusive, civilian occupational codes, military specialties, job titles and office locations. The exact duties and responsibilities of the position determine whether it should be designated as an "acquisition position."				

Career Path Acquisition Logistics

<u>Level and/or Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level I GS-5 through GS-9 O-1 through O-3	ILSM LEM ILS staff specialist LMS	Mandatory: One year of acquisition experience	Desired: Baccalaureate degree in technical, scientific, or managerial field	Mandatory: One basic (Level I) DAU course in systems acquisition management Mandatory: One basic (Level I) DAU course in acquisition logistics ² Desired: One intermediate (Level II) DAU course in logistics support analysis ²

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference(o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for that career field.

²Attendance at technical courses assumes students have acquired competencies equivalent to those in the basic systems acquisition management course (core course).

Career Path

Acquisition Logistics

<u>Level and/or Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training*</u>
Level II GS-9 through GS-12	Deputy or assistant PM for logistics (non-major) ILSM	Mandatory: Two years of acquisition logistics experience Desired: An additional 2 years of acquisition logistics experience	Desired: Baccalaureate degree in technical, scientific, or managerial field!	Mandatory: One intermediate (Level II) DAU course in systems acquisition management
O-3 through O-4	LEM ILS staff officer Acquisition logistics branch chief	Mandatory: Two years of acquisition logistics experience Desired: An additional 2 years of acquisition logistics experience	Mandatory: One intermediate (Level II) DAU course in reliability and maintainability ³	Mandatory: One intermediate (Level II) DAU course in reliability and maintainability ³

Career path note: Upon achieving Level II or III, an individual should plan on meeting the criteria for the Acquisition Corps. Criteria for selection into the Acquisition Corps for civilian personnel include serving in a position graded GS-13, and above, and in the case of officers includes serving in the grade of O-4, and above. Criteria further include: (1) Four years acquisition experience; (2) A baccalaureate degree or certification by an ACPB; and (3a) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (3b) At least 24 semester credit hours in the individual's career field and 12 semester hours or equivalent training in the disciplines listed in 3a above; or, (3c) Pass an equivalency exam.¹

¹See Appendix M for specific requirements for Acquisition Corps admission. Credit by examination is directed by 10 U.S.C. 1732(c) and covered in DoD Instruction 6000.6B (reference (d) and (g)).

²Refer to current edition of the OUSD(A&T) DAU Catalog (reference (e)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for this career field.

³Attendance at technical courses assumes students have acquired competencies equivalent to those in the basic and intermediate course in systems acquisition management (core courses).

Career Path Acquisition Logistics

Level and/or Typical Grade	Typical Assignments	Experience ¹	Education	Training ³
Level III GS-13, and above O-4, and above	DAL DPML or APML for major programs Acquisition logistics branch or division chief	Mandatory: Four years of acquisition logistics experience Desired: An additional 4 years of acquisition logistics experience	Desired: ² Master's degree in technical, scientific, or managerial field	Mandatory: One advanced (Level III) DAU course in acquisition logistics management ⁴

¹A General, Flag officer, or SES must have at least 10-years experience in acquisition positions. At least 4 years of this experience must have been performed while assigned to a CAP.

²See Appendix M for specific requirements for the Acquisition Corps and CAPs. Credit by examination is directed by 10 U.S.C. 1732(c) and covered in DoD Instruction 5000.58 (references (d) and (g)).

³Refer to current edition of the USD(A&T) DAU Catalog (reference(o)) for a list of mandatory and desired courses and approved equivalencies that can be used to meet the training standards for that career field.

⁴Attendance at this course assumes students have acquired competencies equivalent to those contained in all Level I and Level II mandatory courses.

Career path note: CAPs may only be filled by members of an Acquisition Corps.

Appendix E.

Position Category Description

Business, Cost Estimating, and Financial Management

Typical Duties: Financial planning, formulating financial programs, administering budgets, accounting for obligation and expenditure of funds, cost performance management of contractors, cost estimating, and advising or assisting commanders, PMs and other officials in discharging all aspects of their responsibilities for business management, in direct support of the Defense acquisition process. This position category includes various disciplines that are divided into two tracks for career planning purposes: "Business and Financial Management (B&FM)," and "Cost Estimating (CE)."

Typical Career Codes ¹			
Civilian Series	Army AOC	Navy AQD	Air Force AFSC
0110, 0301, 0343, 0501, 0605, 0510, , 0560, 08XX, 1101, 1615, 1520, and 1630	N/A	AK (Any AQD beginning with AK)	66FX, 66WX, and 63AX 3402, 3404, 3406, 3410, and 9644

Office Location: Those positions are found in the acquisition organizations such as Program Executive Offices, Program Management Offices and major activities in direct support of acquisition organizations. The incumbents spend the majority of their time in direct support of the acquisition process, as governed by DoD Directive 5000.1, (reference (a)), performing tasks enumerated under typical duties above.

¹Positions may be identified in, but are not limited to the occupational series listed. Each service can provide further guidance as required.

Career Path Business, Cost Estimating and Financial Management

<u>Level/ Typical Grade</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level I GS-5 through GS-9	Analyst Team leader Program control staff	Mandatory: One year of acquisition experience in BCE&FM	Desired: Baccalaureate degree	Mandatory for all: One basic (Level I) DAU course in systems acquisition management Mandatory for B&FM (Complete one of the following): One basic (Level I) DAU course in contract performance management (CPM); or, one basic (Level I) DAU course in CE Mandatory for CE: One basic (Level I) DAU course in CE

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory courses and approved equivalencies that can be used to meet the training standards for that career field.

Career Path Business, Cost Estimating and Financial Management

Level and or Typical Grade	Typical Assignments	Experience	Education	Training ¹
Level II GS-9 through GS-12	Branch chief Director of Resource Management Chief, Program Control Division Program control staff Senior analyst Analyst, acquisition command staff	Mandatory: Two years of acquisition experience in BCE&FM Desired: An additional 2 years of experience in BCE&FM	Desired: Baccalaureate degree ²	Mandatory for all: One intermediate (Level II) DAU course in systems acquisition management Mandatory for all: One intermediate (Level II) DAU course in systems acquisition funds management Mandatory for B&FM: Complete at least three DAU courses in the following areas: CPM; cost analysis or estimating; selected acquisition reporting (SAR) contract, or finance Mandatory for CE: One intermediate (Level II) DAU course in CE; and at least two of the following: CPM; SAR, contract finance or other specialized CE courses ³
O-3 through O-4				Career path note: On achieving Level II or III, an individual should plan on meeting the criteria for the Acquisition Corps. Criteria for selection into the Acquisition Corps for civilian personnel includes serving in a position graded GS-13, and above, and in the case of officers includes serving in the grade of O-4, and above. Criteria further include: (1) Four years acquisition experience; (2) A baccalaureate degree or certification by an ACPB; and (3a) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (3b) At least 24 semester credit hours in the individual's career field and 12 semester hours or equivalent training in the disciplines listed in 3a above; or, (3c) Pass an equivalency exam ³ .

¹Refer to current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory courses and approved equivalencies that can be used to meet the training standards of this career field. The catalog lists a menu of options to satisfy the 3 additional mandatory course requirement.

²See Appendix M for specific requirements for Acquisition Corps admission. Credit by examination is directed by 10 U.S.C. 1732(c) and covered in DoD Instruction 6000.58 (references (d) and (g)).

Career Path Business, Cost Estimating and Financial Management

Level and/or Typical Grade	Typical Assignments	Experience ¹	Education	Training ²
Level III GS-13, and above	OSD or service secretary staff Director of Program Control Division chief Director of Resource Management Senior analyst Branch or Division Chief, Acquisition Command Component performance management focal point	Mandatory: Four years of acquisition experience in BCE&FM	Desired: Baccalaureate degree with 24 semester hours in accounting, business finance, law con- tracts, purchasing, economics, industrial management, mar- keting, quantitative methods, and organization and manage- ment. ³	Mandatory: One advanced (Level III) DAU course in BCE&FM ⁴
O-4, and above		Desired: An additional 4 years of acquisition experience in BCE&FM		Mandatory: Complete at least one DAU course if not previously taken in the following areas: CPM, cost analysis, or, contract finance
			Desired: Master's degree	Desired: One advanced level (Level III) DAU course in program management

¹A General, Flag officer, or, SES must have at least 10-years experience in acquisition positions. At least 4 years of that experience must have been performed while assigned to a CAP.

²Refer to current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory courses and approved equivalencies that can be used to meet the training standards of that career field.

³See Appendix M for Acquisition Corps and CAP criteria.

⁴That course becomes mandatory for certification at Level III when developed.

Career path note: CAPs may only be filled by members of the Acquisition Corps.

Appendix F.

Position Category Description

Manufacturing and Production

<p>Typical Duties: Acquisition-related manufacturing and production duties vary greatly in managerial, administrative, and technical content. Duties nearly always involve program management or monitoring the manufacturing and production efforts at private sector contractor or Government industrial facilities. Functions include, but are not limited to the following:</p> <ul style="list-style-type: none"> a. Assess readiness and availability of information, energy, raw material, human, and physical resources to produce defense goods. b. Assess the reasonableness of contractor methodology, efficiency, cost and/or schedule estimates or data and provide recommendations. c. Assembly and analysis of past performance, manufacturing planning, surveillance, production readiness reviews, and dissemination of results. d. Monitor status of weapon system development and production contracts. e. Assess the impact in changes to weapon system development and production contracts. f. Review contractor manufacturing facilities, organization, policies, procedures, practices, processes, and methods. g. Manage programs and contracts for development of new, or tailoring of existing, manufacturing technology. h. Analyze or monitor planning of alternative production processes or resources necessary to meet alternative production schedules. i. Design a management system to monitor manufacturing functions and input and output of a contractor's system. j. Monitor the determination of make or buy decisions to balance overall manufacturing resource requirements; or k. Analyze the production base to identify risks associated with limited availability and sole source dependencies. l. Participate from the onset in the integrated product and process development of the weapon system.

Representative Job Titles: Supervisory or production engineer, supervisory or manufacturing engineer, supervisory or industrial engineer, production management specialist, production officer, supervisor or industrial specialist, general engineer, aerospace engineer, electronic engineer, mechanical engineer.

Representative Office Locations: Acquisition-related manufacturing and production positions are normally located in a major HQ's staff, an acquisition organization's staff, in a program office, some laboratory activities, and within the DCMC of the DLA.

¹Only when the incumbent performs the functions described in items (a) through (l).

Position Category Description

Quality Assurance

Typical Duties: Manages QA processes to establish essential quality standards and controls. Develops and executes plans that focus on quality of design, quality of conformance, and fitness for use. Integrates quality plan(s) into the system engineering process. Develops policies, procedures and test provisions, and quality requirements in specifications, standards, and solicitations. Evaluates QA during the acquisition process such as in design reviews, functional and physical configuration audits, production readiness reviews, and the milestone review supporting the Milestone Decision Authority. Performs process and product oriented reviews and audits. Issues and manages continuous improvement opportunities, corrective action requests, and product quality deficiency reports. Performs quality engineering functions to implement design of experiments, determine test adequacy, clarity of requirements, and measurement to demonstrate process capability and compliance. Supervises, directs and manages the workforce responsible for QA functions. Provides support to other functional personnel and personnel performing in plant duties. Accepts and fields material for U.S. and foreign customers.

Typical Career Codes			
Civilian Series	Army AOC	Navy AQD	Air Force AFSC
0018, 0028, 0334, 0414, 0660, 08XX, 13XX, 15XX, and 1910 ¹	51, 53B, 53C, and 97 with AH	AH (Any AQD beginning with AH)	64PQ, 62EQ, and 63AQ 9630

Representative Job Titles: Supervisory or QA Specialist, Staff QA Specialist, Mathematical Statistician, QA Representative, Supervisory or QA Representative, Staff QA Specialist, Product Line Specialist, QA Director, or Division Chief, or Branch Chief, or Section Chief, QA Surveillance Representative, Engineering Technician, Entomologist, Computer Specialist, Product Auditor, Aircraft, Aerospace, Ammunition, Automotive, Chemicals, Clothing, Electronics, Materials, Mechanical, Medical, Nuclear, Processes, Shipbuilding, Computer Software, or Subsistence QA Specialist; Aerospace, Electronics, or Mechanical Engineer.

Office Location: QA personnel perform in a variety of acquisition areas; e.g., contracting, development and/or production, contract administration, and storage. The series requires knowledge of regulations and methods used in contracting, business and industry practices, and technical practices applicable to specific commodities.

¹The 1910 Civilian Occupational Series in an acquisition organization is normally an acquisition position.

Career path note: CAPe may only be filled by members of the Acquisition Corps.

Appendix H. Position Category Description Test and Evaluation

Typical Duties: Plan, monitor, and conduct T&E of prototype, new, or modified weapon systems, equipment or materiel; analyze, assess, and evaluate test data and results; prepare assessments of test data and test results, and write reports of findings. Work typically includes the following:
a. Modify, adapt, tailor, or extend standard T&E guides, precedents, criteria, methods, and techniques.
b. Categorize test data, equipment, materiel, or system deficiencies.
c. Design and use new test equipment, procedures, and approaches.
d. Certify equipment, materiel or system readiness for operational testing.
e. Conduct and evaluate and/or analyze test results.
f. Perform staff assignments such as technical consultant, planner, evaluator-advisor, and/or coordinator in a T&E organization.
g. Monitor related activities at contractor facilities.
h. Writing, editing and staffing a Test and Evaluation Master Plan.

Typical Career Codes¹

Civilian Series ²	Army AOC	Navy AQD	Air Force AFSC	Marine Corps MOS

Career path note: CAPs may only be filled by members of the Acquisition Corps.

Appendix I.

Position Category Description

Auditing

Typical Duties: Perform contract auditing and provide accounting and financial advisory services to the Department of Defense and other Government Agencies in negotiation, administration, and settlement of contracts, and subcontracts. The basic nature of auditing is to plan and scope the audit based on an assessment of risk, perform such tests and analysis as necessary to gather sufficient evidential matter, evaluate the results and reach logical, well supported conclusions. The contract auditor's duties include evaluating information about contractor economic assertions, comparing those assertions to established criteria and reporting the results to interested third parties. The types of audits performed include audits of contractor proposal submissions, incurred cost, compliance with the "Truth in Negotiations Act," 10 U.S.C. 2306a (reference (w)), compliance with Cost Accounting Standards, contract terminations, claims for abnormal conditions, contractor financial condition and contractor systems and operations. Contract auditors also assist Government trial attorneys in the development, analysis, and presentation of Government positions before the Armed Services Board of Contract Appeals, and United States Court of Federal Claims as well as testify as factual or expert witnesses. Contract auditors function as consultants to various organizations under the Defense Acquisition Regulatory Council such as the Cost Principles, Pricing, Finance, and Contract Administration Committees. Contract auditors must comply with Generally Accepted Government Auditing Standards, which incorporate the American Institute of Certified Public Accounts Auditing Standards, on the auditor's professional qualifications, the quality of audit effort (including planning, supervision, exercise of due professional care, obtaining sufficient competent evidential matter), and the characteristics of professional and meaningful audit reports.

Typical Career Codes

Civilian Series	Army AQC	Navy AQD	Air Force AFSC	Marine Corps MOS
GS 6111 ¹	N/A	N/A	N/A	N/A

Representative Job Titles: Besides field auditor positions, a number of procurement liaison auditor^s are assigned at major buying commands to facilitate coordination and communication between field auditors and the procurement community. Staff auditor positions are found in the Defense Contract Audit Agency (DCAA) regional offices and HQs. They involve technical guidance and audit policy formulation.

Office Locations: The DCAA performs all necessary contract audits for the Department of Defense and provides accounting and financial advisory services on contracts and subcontracts to all DoD Components responsible for procurement and contract administration (DoD Directive 6105.36 (reference (x)) and to other Federal Agencies on a reimbursable basis. Over 10,000 contractors throughout the United States and abroad are audited. The Agency has approximately 400 field audit offices, and suboffices (including 31 resident offices, 77 branch offices, and 305 suboffices). Auditors at resident offices are on-site full-time at a given contractor location. Branch offices service all contractors within a given geographical area (except resident offices) and generally provide coverage on a mobile basis. Suboffices are established at significant contractor locations that do not warrant a resident office.

¹That series includes positions whose duties are to manage, supervise, or perform work consisting of a systematic examination and appraisal of financial records, financial and management reports, management controls, policies, and practices affecting or reflecting the financial condition and operating results of an activity; or analytical work related to the development and execution of audit policies and programs when such work requires the application of professional accounting knowledge, standards, and principles.

Career Path Auditing

<u>Level</u>	<u>Typical Assignments</u>	<u>Experience</u>	<u>Education</u>	<u>Training¹</u>
Level I GS-6 through GS-7 O-1 through O-3	Auditor trainee I Auditor trainee II	Mandatory: Meet the standard in U.S. OPM Qualification Standards for General Schedule Positions (reference (n)) for entry into the series. A baccalaureate degree with 24 hours in accounting may be substituted for experience Desired: Accounting and/or auditing work experience in industry or public accounting	Mandatory: (1) A baccalaureate degree, in accounting, or (2) A baccalaureate degree in a related field such as business administration or finance that included or was supplemented by 24 semester hours in accounting; or (3) At least 4 years experience in accounting; or (4) An equivalent combination of accounting experience, college education, and training	Mandatory: DAU course - AUD 1130, "Technical Indoctrination" Desired: DAU course - AUD 1124, "Audit Applications of FAR, Part 31" Desired: DAU course - AUD 1111, "Orientation to Contract Auditing" Desired: DAU course - AUD 6116, "Effective Report Writing"

¹Refer to the current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies (provided by the Defense Contract Audit Institute (DCAI)) that may be used to meet the training standards for that career field.

Career Path Auditing

Level and/or Typical Grade	Typical Assignments	Experience	Education	Training ^a
Level II GS-9 through GS-12	(Line or staff assignments) Junior auditor or Semi-senior auditor	Mandatory: Auditing experience of increasing complexity and responsibility	Mandatory: Entry below GS-9: Completion of Level I requirements; OR, if entry at GS-09: Mandatory: (1) In addition to completion of level I requirements, Complete requirements for a master's degree or equivalent; or (2) two full years of graduate education	Mandatory: One of the following DAU courses - AUD 4120 Statistical Sampling; OR, AUD 4230 Graphic, Computational and Improvement Curve Analysis Techniques; OR, AUD 1320 Intermediate Contract Auditing

Career Path note: On achieving Level II or III, an individual should plan on meeting the criteria for the Acquisition Corps. Criteria for selection into the Acquisition Corps for civilian personnel include serving in a position graded GS-13, and above and in the case of officers includes serving in the grade of O-4, and above. Criteria further include: (1) Four years acquisition experience; (2) A baccalaureate degree or certification by an ACPB; and (3a) At least 24 semester credit hours from among the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, organization and management; or, (3b) At least 24 semester credit hours in the individual's career field and 12 semester hours or equivalent training in the disciplines listed in 3a above; or, (3c) Pass an equivalency exam.^b

^cProfessional certification includes: Certified Public Accountant, Certified Management Accountant, Certified Internal Auditor, and Certified in Information Systems Auditing

^dRefer to current edition of the OUSD(A&T) DAU Catalog (reference (o)) for a list of mandatory and desired courses and approved equivalencies provided by the DCAI that can be used to meet the training standards for this career field

^eSee the OUSD(A&T) DAU Catalogue (reference (o)) for a list of courses that will satisfy this requirement

^fSee Appendix M for specific requirements for Acquisition Corps admission. Credit by examination is directed by 10 U.S.C. 1732(c) and covered in DoD Instruction 6000.68 (reference (d) and (g)).

Career Path Auditing

Level and/or Typical Grade	Typical Assignments	Experience ¹	Education	Training ²
Level III GS-13, and above	(Line or staff assignments) Director or deputy director Assistant director and/or deputy assistant director principal staff element	Mandatory: All Level I and II required qualification from U.S. OPM Qualification Standards for General Schedule Positions (reference (n)). Desired: Master's degree in accounting, business administration, management, or other related field Supervisory auditors must also meet additional OPM required qualifications	Mandatory: Completion of Level II requirements	Mandatory: For Supervisory Positions: DAU course - AUD 8660, "DCAA Supervisory Skills Workshop" Desired: DAU course - AUD 4030, "Quantitative Methods"; or AUD 6640, "Electronic Data Processing for Managers"; or AUD 1276, "Advanced Cost Management Systems"; or an executive seminar
O-4, and above	Regional director or deputy regional director Regional audit manager or HQ division chief or special program manager or manager, DCAM	 Desired: Assignments in a variety of organisational settings	 Desired: One advanced (Level III) DAU course in Executive Contracting	

¹A General, Flag officer, or, SES must have at least 10-years experience in acquisition positions. At least 4 years of that experience must have been performed while assigned to a CAP

²Credit by examination is directed by 10 U.S.C. 1732(c) and covered in DoD Instruction 6000.58 (references (d) and (g)).

Career Path note: CAPs may only be filled by members of the Acquisition Corps.

Appendix J.

Position Category Description

Program Management Oversight

Typical Duties: Perform oversight and/or direct management or staff support of the DoD acquisition system. The execution of the duties of those positions is guided by DoD Directive 6000.1, DoD Instruction 5000.2, DoD 5000.2-M, and DoD 5000.2-R. (reference (a), (b), (c) and (u)), or related issuances governing acquisition programs in the DoD Components. Those duties require an individual who is qualified at the highest level in one of the acquisition career fields, often program management. A position in that category normally is nonspecific as to acquisition function, requiring an individual with a broad background and perspective. That is a position category only, as described in DoD Directive 6000.58. (reference (g)).

Typical Career Codes ¹			
Civilian Series	Army AOC	Navy AQD	Air Force AFSC
0301, 0334, 0340, 0343, 0346, 0391, 06XX, 08XX, 11XX, 13XX, 1516, and 1910	51, 53B, 53C, and 97	AV (Any AQD beginning with AV)	60 CX, 2SLX, 33SX, and 63AX

Representative Job Titles: CAE, PEO, Acquisition Commanders, Program Analyst, and Policy Directors.

Office Locations:

1. Use of that position category is reserved exclusively for the management HQ activities and the management HQ support activities (who are GS-15, or O-6, and above), as defined by, and listed in DoD Directive 6100.73. (reference (f)).
2. Program management oversight positions are generally located in a CAE organization, in the headquarters element of an acquisition organization; with the Chairman of the Joint Chiefs of Staff; and in the OSD.

¹Possession of one of those career codes does not necessarily mean inclusion in the acquisition workforce or the program management career field.

Appendix K. Position Category Description Education, Training, and Career Development¹

Typical Duties: Faculty and educational administrators who manage, develop, conduct, and evaluate acquisition education, training, and career development programs to include curriculum planning; research and consulting; evaluation and analysis of curriculum materials, training methodology, and instructional systems; and instructing students in acquisition subjects. Developmental acquisition positions are used to provide a period of supervised acquisition experience and/or on-the-job training. Such positions may be at any grade level. Specifically excluded from being designated as a developmental acquisition position are the positions of PEOs, PMs, DPMs, positions in which the duties involve managing or supervising acquisition personnel, and other positions that are essential to the acquisition process. If a developmental position is a CAP, the assignment of a person who is not a member of an Acquisition Corps shall require a waiver.

Career Codes			
Civilian Series	Army AQC	Navy AQD	Air Force AFSC
Any	Any	AX (Any AQD that starts with AX)	Any
			MOS Any

Representative Job Titles: "Professor," "instructor," "executive-in-residence," "executive director," "director," "dean," "DACM," and for student or developmental positions, any acquisition-related position title.

Office Location: Acquisition schools (to include the DAU), offices of the DACM, and, in the case of developmental acquisition positions, any acquisition organization.

¹That is a position category only and not a separate career field. That category may be used for faculty in acquisition schools, for management and oversight of acquisition education training and career development programs, for student positions, for developmental acquisition positions, and for similar assignments. Such positions may instead be placed in a functional position category particularly when the continued emphasis and requisite background for the position is in a specific discipline, such as contracting or program management.

Appendix L.

Position Category Description

DLA Multifunction Management

Typical Duties: Perform direct management, supervision of staff, technical leadership, support of acquisition functions within the DLA. Supervise a multifunctional team to interpret and implement policy and procedures in support of the DoD acquisition process. The duties require an individual who is certified at the appropriate level in one of the acquisition career fields. The duties in this category are normally nonspecific as to acquisition function, requiring an individual with a broad acquisition background and perspective.

Typical Career Codes¹

Civilian Series	Army AQC	Navy AQD	Air Force AFSC	Marine Corps MOS
1101, 301, and any other occupation series	51, 53B, 53C, and 97	AV (Any AQD beginning with AV)	33SX, 62EX, 63AX, 64PX, and 65WX	9958 and 9959

Representative Job Titles: Operations and technical assessment group leader, operations support manager, multifunctional team leader, customer service chief, materiel management chief, and supervisory commodity business specialist.

Qualification Standards: Mandatory: according to the level of the position, Level II or III certification in an acquisition career field relevant to the duties of the position. ACQ 201 also is mandatory. Desired: Cross-functional training and experience in other career field(s) related to the duties of the position; Level I and II core acquisition courses. Certification in more than one career field is desirable. Program management experience is not accrued when serving in this position category.

Office Locations: DLA and its subordinate commands; other Components if similarly organized. If used by other Components this position category is called "Multifunction Management."

¹Possession of one of these career codes does not necessarily mean inclusion in the acquisition workforce or the acquisition management career field.

MEMORANDUM OF UNDERSTANDING
AMONG
CHIEF, ARMY RESERVE
AND
DIRECTOR FOR ACQUISITION CAREER MANAGEMENT
FOR

establishment and operation of a system to meet the requirements of the Defense Acquisition Workforce Improvement Act (DAWIA) within the Army Acquisition Workforce for U.S. Army Reserve (USAR) personnel.

Purpose. This Memorandum of Understanding (MOU) is established to provide a common basis of understanding on the identification, selection, training, and management of USAR personnel subject to the provisions of DAWIA (Title XII of Public Law 101-510). Additionally, this MOU provides a framework for the development of a comprehensive acquisition policy which will be tailored to the unique and specialized needs of the USAR and remains compliant with existing law, DoD and Army guidance.

Scope. The provisions of this MOU are applicable to military personnel, including members of the Selected Reserve, technicians and civilian personnel within the USAR serving in positions subject to the provisions of DAWIA.

Responsibilities.

A. The Chief, Army Reserve will:

1. Manage in coordination with the Director, Acquisition Career Management (DACM), the development of acquisition workforce career management policy, consistent with Army and USAR operational requirements in personnel training and utilization, that meets DAWIA provisions DoD 5000.52, DoDI 5000.55, DoDI 5000.58 and DoD 5000.52-M. Ensure that all policy is compatible with the requirements of DAWIA, recognizes the unique capability and constraints of the USAR and is coordinated with the DACM.

2. Identify acquisition positions within the Office, Chief Army Reserve (OCAR) and Army Reserve Command including Troop Program Units, the Active Guard/Reserve (AGR) and the Individual Mobilization Augmentee (IMA) Programs. Manage acquisition related personnel qualification, selection, training, utilization and reporting requirements within the existing USAR infrastructure and for all acquisition functional specialties possessed by individuals as either Primary or Secondary skills.
3. Identify appropriate USAR personnel/positions to interface with the office of the DACM in the development of a comprehensive USAR acquisition career management program.
4. Ensure that policies, procedures and guidance which develop as a result of execution of this MOU are fully implemented within the USAR.
5. Provide IMA support to the Army Acquisition Workforce (AAWF) based on the Office of Deputy Chief of Staff of Operations established requirements and priorities.
6. Execute staff responsibilities for AAWF personnel accession, management, training and leader development in accordance with DAWIA, DoDD 5000.52M, Army Regulations and approved polices through existing Army Reserve personnel systems.
7. Execute the military and civilian career management programs of the Army Acquisition Corps within existing Army Reserve personnel management framework.
8. Provide feedback on execution of USAR acquisition responsibilities.

B. Director of Acquisition Career Management will:

1. Execute the responsibilities of the DACM to include certification of qualified personnel recommended by the USAR Acquisition Specialties Functional Board(s).

2. Provide overall AAWF program direction, oversight for USAR acquisition program offices and USAR provided support for mobilization.
3. Monitor OCAR execution of the USAR acquisition responsibilities.
4. Evaluate and approve USAR proposed policies for compliance with DAWIA requirements and synchronization with Army objectives.
5. Provide equal access to all levels of Army, DoD and non-governmental acquisition training and education program opportunities for USAR program enrollees.
6. Identify acquisition positions within the AAWF which require augmentation via IMA/AGR support.
7. Support development of policy for USAR individuals and organizations.
8. Evaluate and approve OCAR and DACM proposed policies for synchronization with Army plans and objectives.
9. Advise/assist OCAR, as needed, in the identification of acquisition positions.

**Appendix E:
Memorandum of Understanding DARNG/DACM**

**MEMORANDUM OF UNDERSTANDING
BETWEEN
CHIEF, NATIONAL GUARD BUREAU
DIRECTOR, ARMY NATIONAL GUARD
AND
DIRECTOR, ACQUISITION CAREER MANAGEMENT
FOR**

Establishment and operation of an acquisition program compliant with the requirements of the Defense Acquisition Workforce Improvement Act (DAWIA) within the Army Acquisition Workforce for Army National Guard (ARNG) personnel.

Purpose. This Memorandum of Understanding (MOU) is established to provide a common basis of understanding on the identification of acquisition positions and the selection, training, and management of Army National Guard personnel subject to the provisions of DAWIA (Title XII of Public Law 101-510). Additionally, this MOU provides a framework for the development of a comprehensive acquisition policy which will be tailored to the unique and specialized needs of the ARNG and remains compliant with existing law, DoD and Army guidance.

Scope. The provisions of this MOU are applicable to military personnel, technicians and civilian employees within the ARNG serving in positions subject to the provisions of DAWIA.

Responsibilities.

A. The Chief, National Guard Bureau will:

1. Coordinate with the Army Director of Acquisition Career Management (DPCM) in the formulation and administration of acquisition career management policy which is consistent with DAWIA, DoD 5000.52, DoDI 5000.55, DoDI 5000.58 and DoD 5000.52-M, Army Regulations and the needs of the National Guard Bureau (NGB) and the ARNG.
2. Identify acquisition position requirements within the NGB staff.
3. Identify appropriate personnel and positions within NGB to interface with the office of the DPCM in the development of a comprehensive ARNG acquisition career management program.
4. Ensure that policies, procedures and guidance which develop as a result of execution of this MOU are fully implemented within the ARNG.
5. Provide feedback on implementation and execution of ARNG acquisition responsibilities.

B. Director, Army National Guard will:

1. Manage the development of acquisition workforce policy, consistent with Army, NGB and ARNG operational requirements in personnel training and utilization, that meets DAWIA provisions. Ensure that all policy is compatible with the requirements of DAWIA and coordinated with the DACM.
2. Identify, in coordination with the DACM, acquisition workforce and critical acquisition ARNG positions. Manage acquisition related personnel qualification, selection, training, utilization, and reporting requirements within the existing ARNG personnel infrastructure.
3. Identify appropriate ARNG positions to interface with the DACM office.
4. Execute staff responsibilities for AAC ARNG personnel accession, management, training and leader development in accordance with DAWIA, DoDD 5000.52M, Army regulations and approved policies through existing ARNG personnel systems.
5. Execute the military and civilian career management programs of the Army Acquisition Workforce within existing ARNG personnel management framework.
6. Develop a tailored management information system that supports acquisition career management of ARNG personnel.

C. Director of Acquisition Career Management will:

1. Execute the responsibilities of the DACM to include certification of qualified personnel recommended by the ARNG Acquisition Specialties Functional Board(s).
2. Provide overall AAWF program direction, oversight and support the development of a coordinated acquisition program policy that is consistent with law, regulation and ARNG unique needs.
3. Evaluate and approve ARNG proposed policies for compliance with DAWIA requirements and synchronization with Army objectives.
4. Provide equal access to all levels of Army, DoD and non-governmental acquisition training and education program opportunities for ARNG acquisition workforce program enrollees.
5. Monitor execution of ARNG acquisition responsibilities.
6. Evaluate and approve NGB and ARNG proposed policies for synchronization with Army plans and objectives.

16 OCT 1996

SARD-ZAC

MEMORANDUM FOR CHIEF, ARMY RESERVE
CHIEF, NATIONAL GUARD BUREAU
DEPUTY DIRECTOR, ACQUISITION CAREER
MANAGEMENT

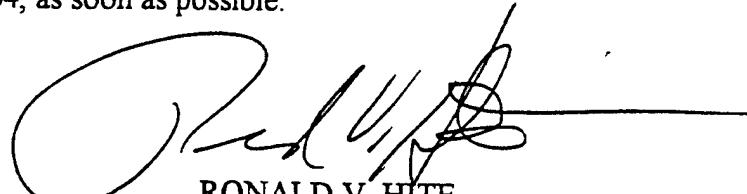

SUBJECT: Army Acquisition Corps Reserve Components Process Action Team

The Army Acquisition Corps (AAC) represents the Total Army, both Active and Reserve Components (RC). The Army National Guard and Army Reserve contribute much to our Army Acquisition Workforce (AAF) in day to day peacetime operations, during contingencies, and in times of mobilization. We must have certified acquisition professionals in the RC. To this end, we must provide education, training, and acquisition work experience opportunities for the RC comparable to that which is provided to Active Component personnel.

I am directing the formation of a Process Action Team (PAT) to review and provide recommendations for the establishment, integration, training, management, and utilization of RC AAC members. This PAT will review and identify RC AAC requirements to include critical acquisition positions, workforce positions, developmental positions, active duty training positions, and individual mobilization augmentee positions, accession requirements, and career development paths. In so doing, the PAT must ensure that the RC members can meet the requirements of the Defense Acquisition Workforce Improvement Act (DAWIA) or recommend ways to achieve the required certification, training, and experience. The PAT charter is enclosed.

I want the PAT to produce a report that recommends well thought out options for enhancing meaningful participation of the RC in the AAC, provides proposed initiatives and policies, and recommends an implementation plan and timeline. I am asking that the Chief of the Army Reserve and the Chief of the National Guard Bureau appoint co-chairmen of this PAT. The Director, AAC Policy will provide all necessary help and assistance as well as the deputy

chairman. Other addressees are asked to provide members for the PAT. Please provide the names of the chairmen and the members to COL Pete Hadley, DSN: 227-4440, Commercial: 703-697-4440, or LTC Bill Fast, DSN: 225-7264, Commercial 703-695-7264, as soon as possible.

RONALD V. HITE
Lieutenant General, GS
Director
Army Acquisition Corps

Enclosure

**CHARTER FOR THE PROCESS ACTION TEAM
ON
ARMY ACQUISITION CORPS RESERVE COMPONENTS**

I. Background. The Army Acquisition Corps (AAC) represents the Total Army, both Active and Reserve Components (RC). The Army National Guard and Army Reserve contribute much to our Army Acquisition Workforce (AAF) in day to day peacetime operations, during contingencies, and in times of mobilization. We must have certified acquisition professionals in the RC. To this end, we must provide education, training, and acquisition work experience opportunities for the RC comparable to that provided Active Component personnel.

II. Authority. The Defense Acquisition Workforce Improvement Act (DAWIA) directs the Secretary of Defense to implement acquisition workforce policies and procedures uniformly throughout the Department of Defense (DAWIA, Section 1701(b)). Department of Defense Instruction 5000.58 says "There shall be a single military/civilian Acquisition Corps in each military Department..."(para D8) and the Secretaries of the Military Departments acting through the Service Acquisition Executives shall "Establish an Acquisition Corps for their respective military and civilian acquisition workforce...." (para E1c)

III. Purpose.

Product: The Process Action Team (PAT) shall produce a report that documents options for enhancing the meaningful participation of the RC in the AAC, provides proposed initiatives and policies, and recommends an implementation plan and timeline.

Goal: Review and provide recommendations for the establishment, integration, training, management, and utilization of RC AAC members. Ensure that the RC members can meet the requirements of the Defense Acquisition Workforce Improvement Act (DAWIA) or recommend ways to achieve the required certification, training, and experience.

Measures of Success: The PAT will consider these aspects of the RC in the AAC: review and identify RC AAC requirements to include critical acquisition positions, workforce positions, developmental positions, active duty training positions, and individual mobilization augmentee positions; TOE/ MTOE/TDA impacts; Reserve Acquisition Position List (RAPL); Civilian Acquisition Position List (CAPL); career development paths; accession requirements, numbers, and boards; certification; training and funding; advanced civil schooling; assignment policies; deployment/mobilization; and, proponency.

IV. Roles and Responsibilities

Cochairmen of the PAT:

Office of the Chief, Army Reserve, DAAR-ZA

Office of the Chief, National Guard Bureau, NGB-ZA

Deputy Chairman of the PAT:

Office of the Director, Army Acquisition Corps Policy, SARD-ZAC

PAT membership shall consist of empowered representatives at appropriate working levels and with applicable experience from the following organizations:

Office of the Chief, Army Reserve, DAAR-ZA

Office of the Chief, National Guard Bureau, NGB-ZA

Director, Reserve Affairs, SARD-RA

Acquisition Policy, SARD-RP

Acquisition Education and Training Office, SARD-ACP

Army Acquisition Corps Reengineering Team, SARD-ZAC

Army Acquisition Corps Proponency Office, SARD-ZAC

**Appendix G:
USAR FY97 Dedicated Procurement Program**

26 November 1996

SUBJECT: Talking Points for Quarterly Army Performance Review, 4Q96, DPP Good News Story

1. NGREA is a Congressional Appropriation over and above the Presidents Budget.
 - a. Started in 1981
 - b. Annual average is \$97.6M
 - c. Total DPP through FY 97 is \$1658.667M
 - d. Total fielded through FY 96 is (approx) \$1300.M
 - e. DPP execution has been above 99.9% obligation for 8 consecutive years (1987-1994)
2. Leverage the Army to stretch USAR DPP dollars.
 - a. Army providing new HMMWVs to be integrated with a tool box for Contact Maintenance Trucks
 - b. Army providing M977 HEMTTs to be rebuilt and converted to HEMTT Bridge Transporters
 - c. Army providing M985 HEMTTs to be rebuilt and converted to HEMTT Fuel Trucks
3. USAR new starts. The Army has planned procurements based on USAR lead
 - a. Floodlight Set, Trailer Mounted
 - b. All-Terrain Crane, 25 Ton - replaces 3 outdated cranes
 - c. M917A1 Dump Truck
 - d. Barge Derrick, 115 Ton Floating Crane
 - e. Hydraulic Excavator
 - f. 5 Ton Yard Tractor (Truck)
4. DPP and Depot Maintenance team up. DPP buys kits and Depot Maintenance does conversion
 - a. HEMTT Cargo to Bridge Transporter Conversion
 - b. HEMTT Cargo to Fuel Tanker Conversion
 - c. 3kw gas to diesel conversion
 - d. M101A1 to M101A2s and M101A2 to M101A3s
 - e. 5 Ton Cargo to Drop Side conversion
 - f. M915 Glider Kits
5. USAR DPP Completes procurements when Army funding falls short or hasn't planned funding
 - a. M917A1 (Army buys 255, DPP buys 180) completed USAR requirement in FY 96
 - b. High Speed Compactor (Army buys 17 and DPP buys 38) completed USAR requirement in FY 96
 - c. AISI (Electronic Survey Equipment), (Army buys 33 and DPP buys 18) completed USAR requirement in FY 96
 - d. Heavy Equipment Transporter (HET),(Army buys 287 and DPP buys 130) completed USAR requirement in FY 96
 - e. SINCGARs Radios [Army completes buy after DPP funds \$30M (USAR complete in FY 99)]
 - f. Steel Wheel Dual Drum Roller (Army bought 33 and DPP bought 4) completed USAR requirement in FY 95
 - g. Airplane, C-12 (Army provided 8 and DPP bought 24) completed USAR requirement in FY 95
 - h. 2 1/2 Ton Extended Service Program (ESP). USAR goal was based on tiered resourcing with a total requirement of about 5100 vehicles. Equipping the middle third with ESP vehicles means we must ESP about 1700 . With FY 97 funds the USAR goal is complete at 1708.

Sirs -

All of you should have received an e-mail on Friday afternoon, subject: Army Acquisition Workforce. This memo asked everyone to review their TDAs and identify those folks that they felt could be integrated into the DoD Acquisition Workforce.

This fax contains all job descriptions (both military/civilian) that qualify as Acquisition Workforce positions. It should make it easier for you to identify positions.

Please note that the purpose for this first look is to initially forecast to DoD the resources required to assist the ARNG for the required acquisition training.

If you have any questions please call me at DSN 327-9449

Sincerely,
TROY A. FRYE

IL&E FUTURES, ARNG'S KEY TO THE FUTURE

Appendix M:
Memorandum - Support of US Army Reserve Acquisition Corps

**REPLY TO
ATTENTION OF**

DAAR-LO

28 APR 1997

**DEPARTMENT OF THE ARMY
OFFICE OF THE CHIEF, ARMY RESERVE
WASHINGTON, DC 20310-2400**

**MEMORANDUM FOR Commander, U. S. Army Personnel Center, ATTN:
COL Wilson, 9700 Page Blvd., St. Louis, MO 63132-5200**

SUBJECT: Support of the U.S. Army Reserve (USAR) Acquisition Corps

1. Reference letter, DAAR-LO, 7 Jan 97, subject: Support of Reserve Process Action Team (PAT).
 2. The Chief, Army Reserve has signed a Memorandum of Agreement (MOA) with the Military Deputy, Army Acquisition Corps making the USAR a full partner in the Army Acquisition Corps (AAC). To bring the USAR into the AAC, all positions identified as acquisition must be validated, boarded and assessed into the Corps. Additionally, all personnel must be identified, certified and a database developed to manage personnel within the AAC. Those identified personnel must be managed for career development within their basic branch and the AAC.
 3. A PAT was chartered to verify the acquisition positions and develop the database to record and manage the acquisition personnel, training and assignments. LTC Dennis Smith, a fully qualified AAC officer, was approved to work on the PAT, develop the USAR AAC database and manage the AAC training and assignments. The PAT cannot accomplish its mission without this support.
 4. The SARDA-ZAC position that is temporarily working to develop the USAR AAC, will not be able to manage the personnel issues. In the reorganization of ARPERCEN, there must be a Personnel Management Officer (PMO) charged to oversee the USAR AAC personnel certification, training and acquisition assignments.
 5. LTC Smith should be assigned the position of Acquisition Functional Area Personnel Management Officer and should be charged to develop the USAR Acquisition Corps database, manage personnel certification, personnel training and acquisition personnel assignments.

I am
glad for you to tell us of the
little car upon this date in addition
to what we have, or if you need additional
R. B.

J. R. Helmly 4-28

OPERATING PROCEDURE

VOLUME 15

ACQUISITION PROFESSIONAL DEVELOPMENT PROGRAM (APDP)

SECTION A - GENERAL INFORMATION

15A-1 Introduction. The Acquisition Professional Development Program (APDP) is designed to enhance the quality of the military and civilian acquisition work force, both by attracting highly qualified new personnel and improving the skills and motivation of currently assigned personnel. The purpose of APDP is to systematically select and develop a skilled, professional acquisition work force. The program defines a certification process, as well as career paths with specific education, training, and experience requirements for competition for acquisition positions. The APDP covers specific functional areas defined by law and supplemented by Army and Air Force. These include: program management; manufacturing and production; industrial property management; contracting; purchasing; acquisition logistics; quality assurance; business; cost estimation and financial management; systems planning, research, development, and engineering; test and evaluation engineering; and communications and computer systems. Most of these positions are located within the active component except for contracting positions which are located throughout the National Guard. Volume 15 is a joint endeavor of NGB-HRI-R and NGB-AQP-F.

15A-3 Qualification Requirements for Acquisition Positions.

The Defense Acquisition Workforce Improvement Act (DAWIA) specifically defines requirements for the GS-1102 series, Contracting Officers and Program Managers of major acquisition programs. It also prescribes that, effective 1 Oct 1993, critical acquisition positions can be filled only with those eligible for membership in the acquisition corps. The law is specific on minimum qualification requirements for acquisition corps membership, and defines critical acquisition positions.

15A-3a DODM 5000.52 defines the mandatory and desired experience, education and training in the acquisition career areas and establishes a requirement for certification at levels I, II, and III in each area. The manual imposes additional training, education, and experience requirements for personnel in acquisition positions. Questions regarding individual qualifications and certification process should be directed to the Office for Acquisition, NGB-AQ.

15A-4 Background. Due to the National Guard APDP being relatively new, there is a propensity for change more often than in older, more stable programs. Some of the data names used in DCPDS are different from those in DOD Instruction 5000.55. These differences occurred when DCPDS tables were published prior to the issuance of the DOD Instruction. Also, some codes are specific to the Air Force table set (used by the National Guard) and will be reported to DOD by converting our codes to DOD codes. An example of this is in the area of Acquisition Training. Base level DIN EGR, UPDT-TNG-SOURCE-CAT uses code "1" to report "Gov Agency/CONUS". For DOD reporting purposes, this code will be converted to "02".

15A-5 Reporting Requirements. Most of the acquisition data elements and specific coding instructions are being driven by reporting requirements levied by Congress and DOD. The National Guard is being tracked by these agencies and the active components (Army and Air Force) on the professionalism of our acquisition work force. We must report in accordance with DODI 5000.55. Rather than impose a complex manual reporting requirement, DCPDS has been enhanced to generate required reports. The data captured will be useful in other ways, such as job analysis, promotion evaluation pattern development, and identification of training needs.

SECTION B - POSITION RECORD CODING

15B-1 Introduction: This section covers the position record coding necessary to meet DOD reporting requirements for acquisition positions as prescribed in DODI 5000.55. A sample coding sheet for the position record follows on the next two pages. Some of the update requirements for position records have been automated. The specialists involved in the coding/update process need to be familiar with system generated actions and their impact on update requirements. All acquisition positions should be skill coded in order for the skills to flow to the employee's experience record (see Section C for information about coding skills in the employee's experience file). They are used by the DCPDS certification PTIs and DESIREs to certify an employee as an acquisition professional. Refer to DCPDS Central Table 465 for a complete list of skills codes for the appropriate occupational series and skill levels

15B-1a. Building position records to include acquisition data will be an on-going requirement as new acquisition positions are established. Fast-copy option (PTI 052) should be used whenever possible. It is important to use up-to-date central tables; ensure you are aware of the latest systems changes and work closely with the appropriate functional manager. System changes that affect acquisition procedures will be specifically identified in system release documentation.

15B-2 Update Procedures for Position Records. To include acquisition data in new positions or add acquisition data to existing positions, use PTI 051 or 052, respectively. When using PTI 052 ("W" series DINs) the correct data name for each data element will include "WK" (for WORK), for example, the data title for DIN WYT is ACQ-SPECIAL-ASSIGN-WK. Beginning on the next page is an addendum coding sheet for PTIs 051 and 052. Following the coding sheets are the tables containing the codes for valid input.

Addendum Sample Coding Sheets for PTIs 051 and 052,
Establishing and Building a New Position

This is **NOT** the complete list of required DINs for the PTIs, just the ones needed for acquisition occupational series 1102 and 1105. A sample skill code is furnished below. The classifier must check the skills table (CT 465) and determine the proper codes and percentages to use for each position.

PTI 051 - Establish a New Position (Army and Air Technicians)

15B-2a. DIN JYT automatically updates DIN CLK in the CY record.

TABLE 571

DIN JYT/WYT, ACQ-SPECIAL-ASSIGN

- A - Program executive manager
- B - Program manager
- C - Deputy program manager
- D - Senior contracting official
- E - Education, training, and career development position
- *F - Contracting officer - warranted above small purchase threshold
- G - Program executive officer and contracting officer
warranted above the small purchase threshold
- H - Program manager and contracting officer warranted
above the small purchase threshold
- J - Deputy program manager and contracting officer
- K - Senior contracting official and contracting
officer warranted above the small purchase threshold
- L - Deputy program executive officer
- * - Space (Not applicable)

* Functional OPR guidance is NG contracting positions will either be coded "F" or Space for "Not Applicable".

15B-2b. The following is a REQUIRED DIN for all occupation series 11XX (except 1152) and automatically updates DIN CLJ in the CY record.

TABLE 215

DIN JYN/WYN, ACQ-CRIT-POSN-ID

- 1 - Critical Acq Position, Not a Div Head
- 2 - Critical Acq Position, Div Head
- 3 - Developmental Acq Position
- * 4 - Acq Position is not critical or Developmental
- 5 - Critical Acq position - Developmental

* Functional OPR guidance is that NG positions will be coded 4.

15B-2c. DIN JYR automatically updates DIN CLB in the CY record. Table 121 and table 632 (ACQ-EMPL-CAREER-FIELD-ID) have basically the same code structure.

TABLE 121

DIN JYR/WYR, ACQ-POSN-CAREER-CAT

- C - Contracting Series (1102)
- D - Property Management Series (1103)
- E - Purchasing Series and Procurement Series (1105)

15B-2d. DIN JYL automatically updates DIN CLC in the CY record.

TABLE 359**DIN JYL/WYL, ACQ-CAREER-LVL-REQ**

- 1 - Entry Lvl (GS-7 and below)
- 2 - Intermediate Lvl (GS-8 thru GS-12)
- 3 - Senior Lvl (GM-13 and above)
- 9 - None/Unknown

15B-2e. DIN JYP automatically updates DIN CLD in the CY record.

TABLE 418**DIN JYP/WYP, ACQ-JOB-SPECIALTY-1**

- 1 - Primarily Pre-award Oriented
- 2 - Primarily Post-award Oriented
- 3 - Primarily Oriented to cost and price analysis
- * 4 - Both Pre-award and Post-award Oriented
- 5 - Primarily post, station, installation (base) oriented
- 9 - None of the above
- B - Business and financial management
- C - Cost estimating

* Functional OPR guidance (NGB-AQ) is to use code 4 for all National Guard positions.

15B-2f. DIN JYQ automatically updates DIN CLF in the CY record. An interesting characteristic of specialty 1 and specialty 2 is that they are different tables with totally different definitions.

TABLE 610

DIN JYQ/WYQ, ACQ-JOB-SPECIALTY-2

- 1 - Involved in acquisition of information resources assigned to a major system acquisition including persons who devote 50 percent of the time to one or more major systems
- 2 - Major system acquisition
- 3 - Involved in acquisition of information resources and assigned to a major systems acquisition
- *8 - Not involved in acquisition of information resources or assigned to a major system acquisition
- 9 - Unknown

* Functional OPR guidance is to use code 8 for all National Guard positions.

15B-2g. DIN JYS automatically updates DIN CLG in the CY record.

TABLE 419

DIN JYS/WYS, ACQ-PROG-IND

- 1 - Incumbent performs work in support of a major defense acquisition position
- 2 - Incumbent performs work in support of a significant, non-major defense acquisition program
- 3 - Non-major, non-significant defense programs
- *9 - Incumbent does not work in support of a major or significant non-major program

* Functional OPR guidance is to use code 9 for all National Guard positions.

15B-2h. DIN JYM automatically updates DIN CLH in the CY record.

TABLE 497

DIN JYM/WYM, ACQ-CONTRACTOR-JOB-SITE

- * N - 50% or less time spent on contractor-owned or operated site plant during reporting period (All those not coded Y)
- Y - Acquisition functions were performed such that more than 50% of the individual's time during the reporting period was at a contractor site.

* Functional OPR guidance is to use code N for all National Guard positions.

SECTION C - EMPLOYEE RECORD CODING

15C-1 Introduction. This section covers coding instructions for updating acquisition data in the employee record. Some new PTIs have been developed specifically for acquisition and some new data elements have been added to existing PTIs. Like the Position Record, information in the employee record is being driven by reporting requirements prescribed in DODI 5000.55. In addition to the instructions detailed below, sample coding sheets have been provided.

15C-2 Update Procedures for Employee Records. The "DS#" series DINs (DSB, DSD, and DSE) identify an acquisition employee. They can be input two ways: either with an accession (PTI 1##) or at any time after via DIN/DATA update. This should be done for all new acquisition employees or if a current employee is moved to an acquisition position.

15C-2a. Several things must be present in acquisition employee records for the system to "qualify" them for certification and produce the certification RIPS; they are a) education, b) training (acquisition courses) and c) acquisition experience in the CE file. For purchasing and contracting consult Appendix A of this volume for the correct combinations of education, training and experience that are required for each level of certification.

15C-2b. Education resides in the employee file in DINs EC#. These DINs are required input with accessions (PTI 1##) and can be updated at any time after via DIN DATA update.

15C-2c. When an acquisition employee is promoted, changes jobs, etc., an experience entry is created in the CE file. It is of utmost importance that the acquisition experience be skill coded so that it is recognized by the system's automated certification processes. If the acquisition position is skill coded then the skills will automatically go into the CE record when the entry is generated. Any CE record for acquisition employees that does not contain the skills must be corrected for each occurrence of acquisition experience. Following is an example of a correction for miscellaneous Purchasing Agent skills:

UTFCEDO555667777 PTI COR TWB 910821F. TWW DNR. TWX CPX. TXZ 01.

This would insert a skill code and shred in the first occurrence of experience in the employee's CE record. Be very careful when doing this; ensure the correct occurrence is being updated and is actually acquisition experience.

15C-2d. In some records the acquisition experience may be missing from the CE record. If this is the case then it must be added and can be done by inputting PTI 363 for each missing occurrence. A coding sheet and the tables are at the end of this chapter.

		If DIN JA0 = 07 or below, use code "1" If DIN JA0 = 08 thru 12, use code "2" If DIN JA0 = 13 or above, use code "3"
ACQ-DT-CAREER-LVL-ACHVD YR-MO-DA	CK6	:____:____:____:____:
ACQ-CAREER-LVL-AUTH	CK7	:NGB:____:____:____:
		CK7 - This is a 10 character field but we will use only the first three with "NGB" as the literal and 7 spaces.

Table 558 provides the following options for all of the above DINs.

* N - Not involved in special program

Y - Involved in special program
P - Has received assistance in the past

* Functional OPR guidance is that NGB currently does not have any special programs, however it is likely they will in the future.

TABLE 359

DIN CK5, ACQ-CAREER-LVL-ACHIEVED

- 1 - Entry level (Level I) GS-7 and below
- 2 - Intermediate level (Level II) GS-8 thru GS-12
- 3 - Senior level (Level III) GM-13 and above

DIN CK6, ACQ-DT-CAREER-LVL-ACHVD (6 character date)

DIN CK7, ACQ-CAREEC-LVL-AUTH - This is a 10 character field however we will use only the first 3 with "NGB" as the literal.

15C-2h. PTI 4AQ and 5AQ are used to update assignment review data and waiver data. At this time they are not being used.

15C-2i. PTI 7TK. This PTI has been used to update Training information for some time; however, it is described below because of its importance in updating acquisition data in the CE record. Required DINs for this PTI are:

DIN EGC, UPDT-DATE-COMP-WD-TNG - Six character date field.

DIN EGD, UPDT-TNG-TYPE - This is a five character field. The first three characters are the training course number found in table 188. The next two characters can be used at the discretion of the Training Manager for sequence control, to distinguish between similar courses, or for any other purpose desired and the characters can be alpha, numeric or blank.

Addendum Sample Coding Sheet for PIT 7TK, Training Update

- 25 - DCAI, Memphis TN 98 - Non College/University
- 99 - Appr College/University

*NGB functional OPR advises these sponsors are the most likely training providers used by NG purchasing and contracting.

TABLE 214

DIN EGK, UPDT-APROP-PEC-ID-DIR

- 0 - Not applicable

- 1 - O & M - 88751
- 2 - RDTE
- 3 - Industrial Fund
- 4 - Air Force Reserve
- 5 - National Guard
- 6 - Non-USAF Funds
- 7 - O & M - Not 88751
- 8 - AETC, AU, AFIT (TMS)
- 9 - Acquisition - 88751
- A - Cost of Ops Dn (COD) Stock Fund

DIN EGM, UPD-HRS-INSTRUC-REC - Four characters, numeric (total hours of instruction, this course). This data element is to record "Short Term" civilian training that is a minimum of 8 hours and a maximum of 960 hours. Although this is a four character field, only the first three characters will be used and data will always be left justified. If this DIN is used then DIN EGS must be blank.

DIN EGN, UPD-DONT-DROP-IND - One character.

- *1 - Retain
- 2 - Do not retain

There are 20 occurrences of training data per employee stored in the CE file. As training history is accumulated, the oldest course (20th occurrence) will drop off unless the DONT-DROP-IND is used. With the understanding that some courses in the training history are more important than others, use the above code structure to retain courses. When all 20 occurrences are filled with code 1 (retain) a TR remark will be generated requiring a decision on which course to drop.

*NGB functional OPR recommends that all purchasing and contracting courses be coded "1".

DIN EGP, UPD-TOT-DIRECT-TNG-COST - Six characters, numeric (How much did it cost)

DIN EGQ, UPD-TOT-INDIRECT-TNG-COS - Six characters, numeric (How much indirect cost)

DIN EGS, UPD-LTCT-NR-DAYS-LGTH - Three characters, numeric. Long Term Civilian Training (LTCT) is defined as training that exceeds 120 days; therefore, the minimum entry in this field is 121. If this DIN is updated then DIN EGM must be blank.

SECTION D - AUTOMATED ACQUISITION CERTIFICATION

15D-1 Introduction: This section deals with the automated certification features of DCPDS and what the system uses in order to produce the certification RIPs. The RIPs will be used in the future by NGB-AQ to produce the warrants for acquisition personnel.

15D-2. Update Procedures for Acquisition Certification:

15D-2a. Several acquisition transactions have but one purpose which is to evaluate the data in a record and determine if the employee is qualified for certification. If they meet the qualifications the system will update the license area with the type and date. If they are not qualified the system will produce the RIP stating the individual is not qualified. The PTIs and their purpose are listed below. They will process the data and produce RIPs for each category shown below.

<u>PTI</u>	<u>PURPOSE</u>
9AA	PROCESS ACQ CORPS QUALS FOR CERT
9AB	PROCESS 1102 QUALS FOR CERT
9AC	PROCESS CONTRACTING OFFICER QUALS FOR CERT
9AR	PROCESS CONTRACTING QUALS FOR CERT
9AT	PROCESS PURCHASING QUALS FOR CERT

The following PTIs produce notices of training required for certification vs training accomplished:

<u>PTI</u>	<u>CAREER PROGRAM</u>	<u>RIP PRODUCED</u>
9AF	CONTRACTING	ACCERT
9AH	PROCUREMENT	PRCERT
9AI	PURCHASING	PUCERT

Where there are large numbers of acquisition personnel these may be run enmasse with the following DESIREs from Central Table 007. Keep in mind that the DESIREs must be modified for NG use and **in most cases it will be easier to input the PTI manually against individual records.**

- REENTRY-PTI-9AA
- REENTRY-PTI-9AB
- REENTRY-PTI-9AC
- REENTRY-ACQ-CERT (runs PTIs 9AR, 9AS, 9AT, 9AU, 9AV, and 9AW)
- REENTRY-ACQ-TNG (runs PTIs (9AD, 9AE, 9AF, 9AG, 9AH, 9AI, 9AJ, 9AK, 9AL, and 9AM)

15D-2b. Listed below are some of the RIPs available for acquisition. The RIP and its purpose are listed below and examples are furnished in the appendices.

- ACCERT (Contracting Training Requirements)
- ACQ-01 (Career Program Career Brief)
- ACQBR1 (Career Brief)
- ACQBRF (Career Brief)
- ACQP01 (Crit Acq Posn Supplemental PD Cover Sheet)
- ACQP02 (Non-Crit Acq Posn Suppl PD Cover Sheet)
- HAFBR5 (Civilian Career Program Brief)
- PRCERT (Procurement Training Requirements)
- PUCERT (Purchasing Training Requirements)
- RPCERT (Acquisition Professional Development Program Cert/Qual Level)

15D-2c. The preceding PTIs were designed for Air Force use and because of the vast numbers of acquisition people the DESIREs were designed to be run once or twice a month and create the PTIs as a disk files. The disk files must be drained through the PSEUDO program either on line or with end of day processing. Once a PTI is run against these people and a RIP is produced, the system sets a flag (Air Force x-din XU1) to prevent the same RIP from being produced until the circumstances that caused it to be produced are changed. For instance if the system certifies a Contracting Officer as Level I (or someone manually updates the license area) and RIP RPCERT is produced, the flag will be set so that another RIP will not be produced until the record is changed so that it qualifies for the next level of certification. In cases where the system has been "fooled" and the certification RIP has been produced steps must be taken to space out DIN XU1. This cannot be done manually, instead an update DESIRE must be run to accomplish this task. The PSM should do this and may contact NGB-HRI for more information and assistance.

APPENDIX A

CONTRACTING - LEVEL 1
EDUCATION - Have ONE of:

Baccalaureate degree

At least 24 semester hours (DANTES or CLEP equivalency exams may be included) among: accounting, law, business finance, contracts, purchasing; economics, industrial management, marketing, quantitative methods, organization and management.

At least 10 years of acquisition experience as of 1 Oct 91

EXPERIENCE - One year of contracting experience

TRAINING:

Contracting Principles - Complete ONE of:

CON 101 Contracting Fundamentals	BDQ
CON 102 Operational Level Contracting Fundamentals (For contracting positions at the post, camp, or station level)	PEC
CON 103 Facilities Contracting Fundamentals (For construction and facilities contracting personnel)	HEI

Contract Pricing Principles - Complete ONE of:

CON 104 Contract Pricing Prerequisite: CON101 Contracting Fundamentals (BDQ) or CON102 Operational Level Contracting Fundamentals (PEC) or CON 103 Facilities Contracting Fundamentals (HEI)	BDR
CON 105 Operational Level Contract Pricing Fundamentals (For contracting positions at the post, camp or station level) Prerequisite: CON 101 Contracting Fundamentals (BDQ) or CON 102 Operational Level Contracting Fundamentals (PEC)	QNU
CON 106 Facilities Contracts Pricing (For construction and facilities contracting personnel) Prerequisite: CON 101 Contracting Fundamentals (BDQ) or CON 103 Facilities Contracting Fundamentals (HEI)	BDU

CONTRACTING - LEVEL 2
EDUCATION - Have ONE of:

Baccalaureate degree

At least 24 semester hours (DANTES or CLEP equivalency exams may be included) among: accounting, law, business finance, contracts, purchasing; economics, industrial management, marketing, quantitative methods, organization and management.

At least 10 years of acquisition experience as of 1 Oct 91

(Desired) Graduate studies in business administration or procurement

EXPERIENCE:

Two years of contracting experience

(Desired) An additional two years of contracting experience

TRAINING:

According to primary assignment, complete at least ONE of:

CON 211 Intermediate Contracting **BDN**

(For pre-award personnel)

Prerequisites: CON 104 Contract Pricing (BDR)
 or CON 105 Operational Level Contract Pricing Fundamentals (QNU)
 or CON 106 Facilities Contract Pricing (BDU)

CON 221 Intermediate Contract Administration **BDO**

(For post award personnel)

Prerequisite: CON 104 Contract Pricing (BDR)
 or CON 105 Operational Level Contract Pricing Fundamentals (QDU)
 or CON 106 Facilities Contract Pricing (BDU)

CON 222 Operational Level Contract Administration **PDQ**

(For contracting positions at the post, camp or station level)

Prerequisite: CON 104 Contract Pricing (BDR)
 or CON 105 Operational Level Contract Pricing Fundamentals (QDU)

CON 223 Intermediate Facilities Contracting **BE4**

(For construction and facilities contracting personnel)

Prerequisite: CON 104 Contract Pricing (BDR)
 or CON 106 Facilities Contracts Pricing (BDU)

CON 231 Intermediate Contract Pricing **BCC**

Prerequisites: CON 104 Contract Pricing (BDR)

or CON 105 Operational Level Contract Pricing Fundamentals (QNU)
 or CON 106 Facilities Contracts Pricing (BDU)

CON 201 Government Contract Law **BDP**

Prerequisites: Level I courses mandatory for Contracting Career Field

**CONTRACTING - LEVEL 3
EDUCATION - Have ONE of:**

Baccalaureate degree

At least 24 semester hours (DANTES or CLEP equivalency exams may be included) among: accounting, law, business, finance, contracts, purchasing; economics, industrial management, marketing, quantitative methods, organization and management.

At least 10 years of acquisition experience as of 1 Oct 91

(Desired) Master's degree in Business Administration or Procurement

EXPERIENCE:

Four years of contracting experience

(Desired) An additional four years of contracting experience

TRAINING:**CON 301 Executive Contracting****BB3**

Prerequisites: Level II courses mandatory for Contracting Career Field
(Should be taken every 3 - 5 years as a refresher, but does not have to be repeated to maintain certification)

CON 333 Management for Contracting Supervisors**BU7**

(For pre- and post-award personnel)
Prerequisite: At least one year experience in a contracting position after receiving Contracting Level II certification

(Desired) 2 weeks Management and Leadership Training

(Not currently provided by DAU - See local training support office)

PURCHASING - LEVEL 1**EDUCATION**

(Desired) Sixteen semester hours of undergraduate work, with emphasis in business

EXPERIENCE

One year of experience in purchasing

TRAINING

Complete **ONE** of:

PUR 101 Simplified Acquisition Fundamentals BCQ

PUR 102 Operational Level Simplified Acquisition Fundamentals PDZ

PURCHASING - LEVEL 2**EDUCATION**

(Desired) Thirty-two semester hours of undergraduate work, with an emphasis in business

EXPERIENCE:

Two years of experience in purchasing

TRAINING:

PUR 201 Intermediate Simplified Acquisition Procedures BCO

Prerequisite: PUR 101 Simplified Acquisition Fundamentals (BCQ)
or PUR 102 Operational Level Simplified Acquisition Fundamentals (PDZ)

PURCHASING - LEVEL 3**EDUCATION**

(Desired) Thirty-two semester hours of undergraduate work, with an emphasis in business

EXPERIENCE:

Three years of experience in purchasing

TRAINING: None Required

Iwrcresv

AMC - RELEVANT, RESPONSIVE & READY

RESERVE COMPONENT LOGCAP SUPPORT OPPORTUNITIES

PURPOSE:

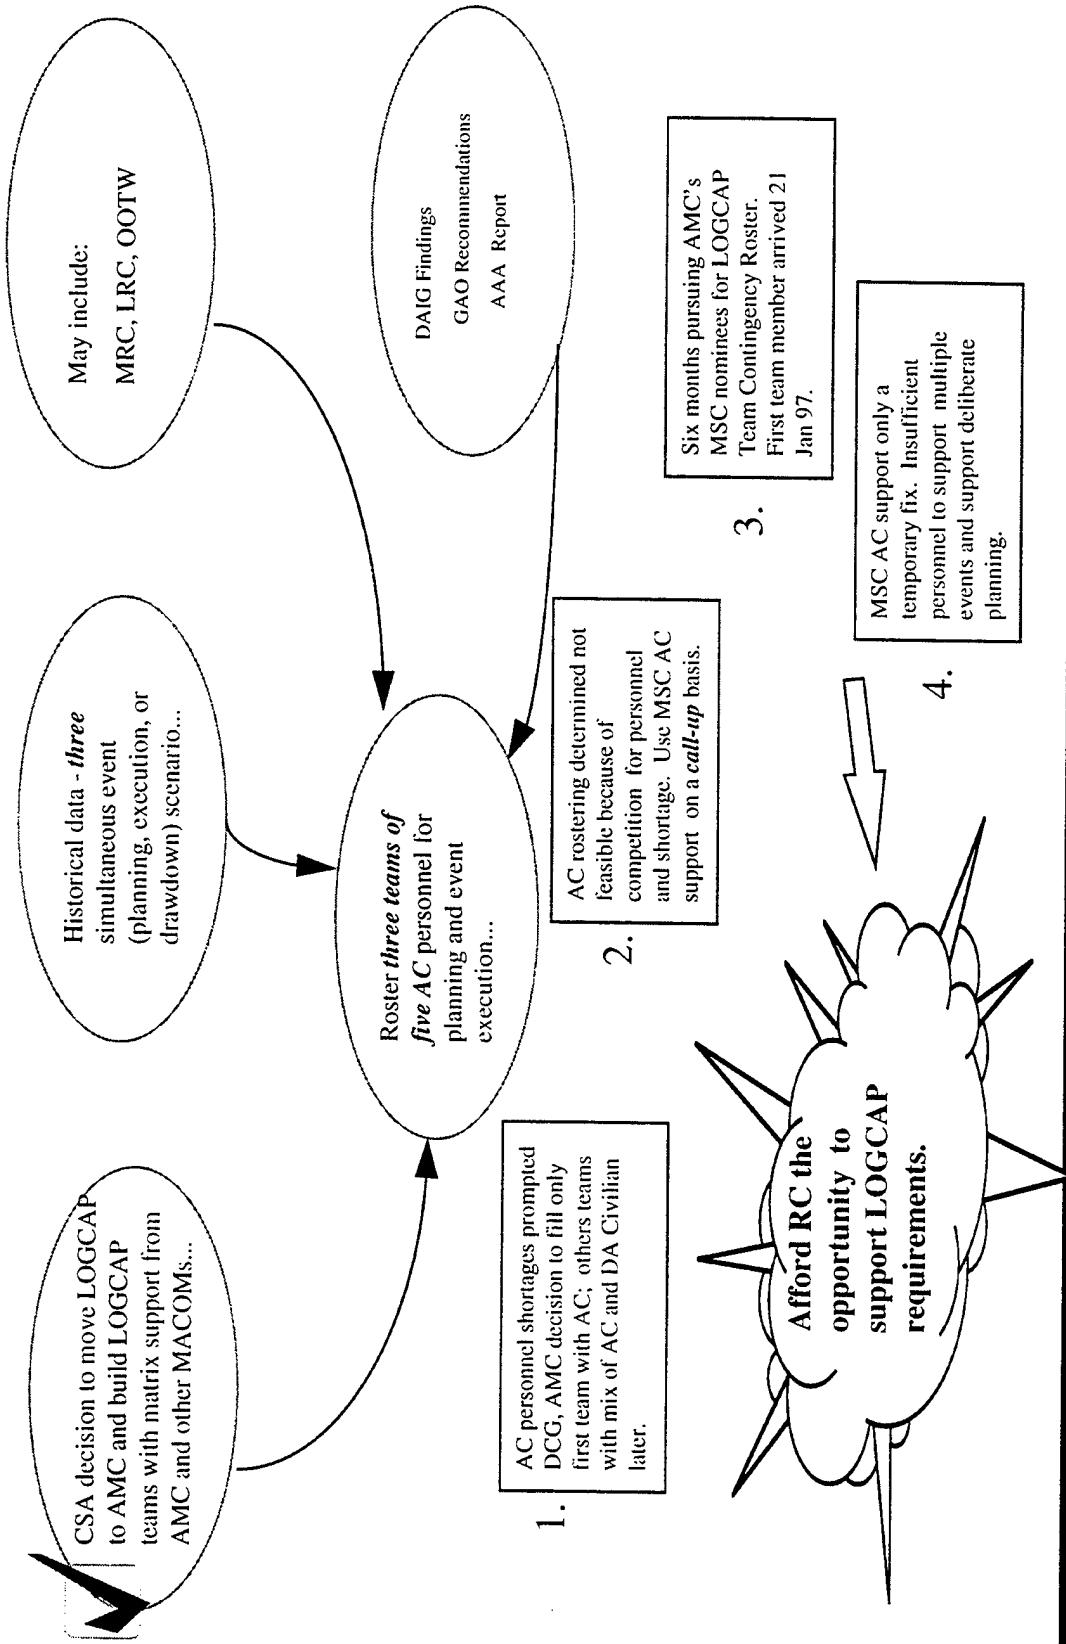

Present the organizational structure, missions, and operational procedure associated with providing USAR LOGCAP support to the US Army Materiel Command.

AMC - RELEVANT, RESPONSIVE & READY

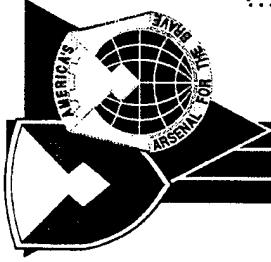

RESERVE COMPONENT LOGCAP SUPPORT OPPORTUNITIES

BACKGROUND

AMC - RELEVANT, RESPONSIVE & READY

RESERVE COMPONENT LOGCAP SUPPORT OPPORTUNITIES

BACKGROUND:

From DA IG Findings (2/2/96) ACTIONS REQUIRED:

- “Develop a single responsible agency at DA level”
- “Develop and promulgate both doctrine and information”
 - ✓ “Develop appropriate ‘green suit’ oversight”
 - ✓ •“Establish LOGCAP elements @ appropriate level for planning and execution”

From AAA findings (AA 97-76) Suggested Actions:

- “Establish a logistics cell with expertise relevant to the logistical support contract”
- ✓ •“Use this team to provide up-front planning and on-the-ground assistance”
 - ✓ •“Consider making the immediate deployment of the logistics assistance cell a mandatory condition of using the logistical support contract in future contingency operations”

From GAO/NSIAD-97-63) Recommendations:

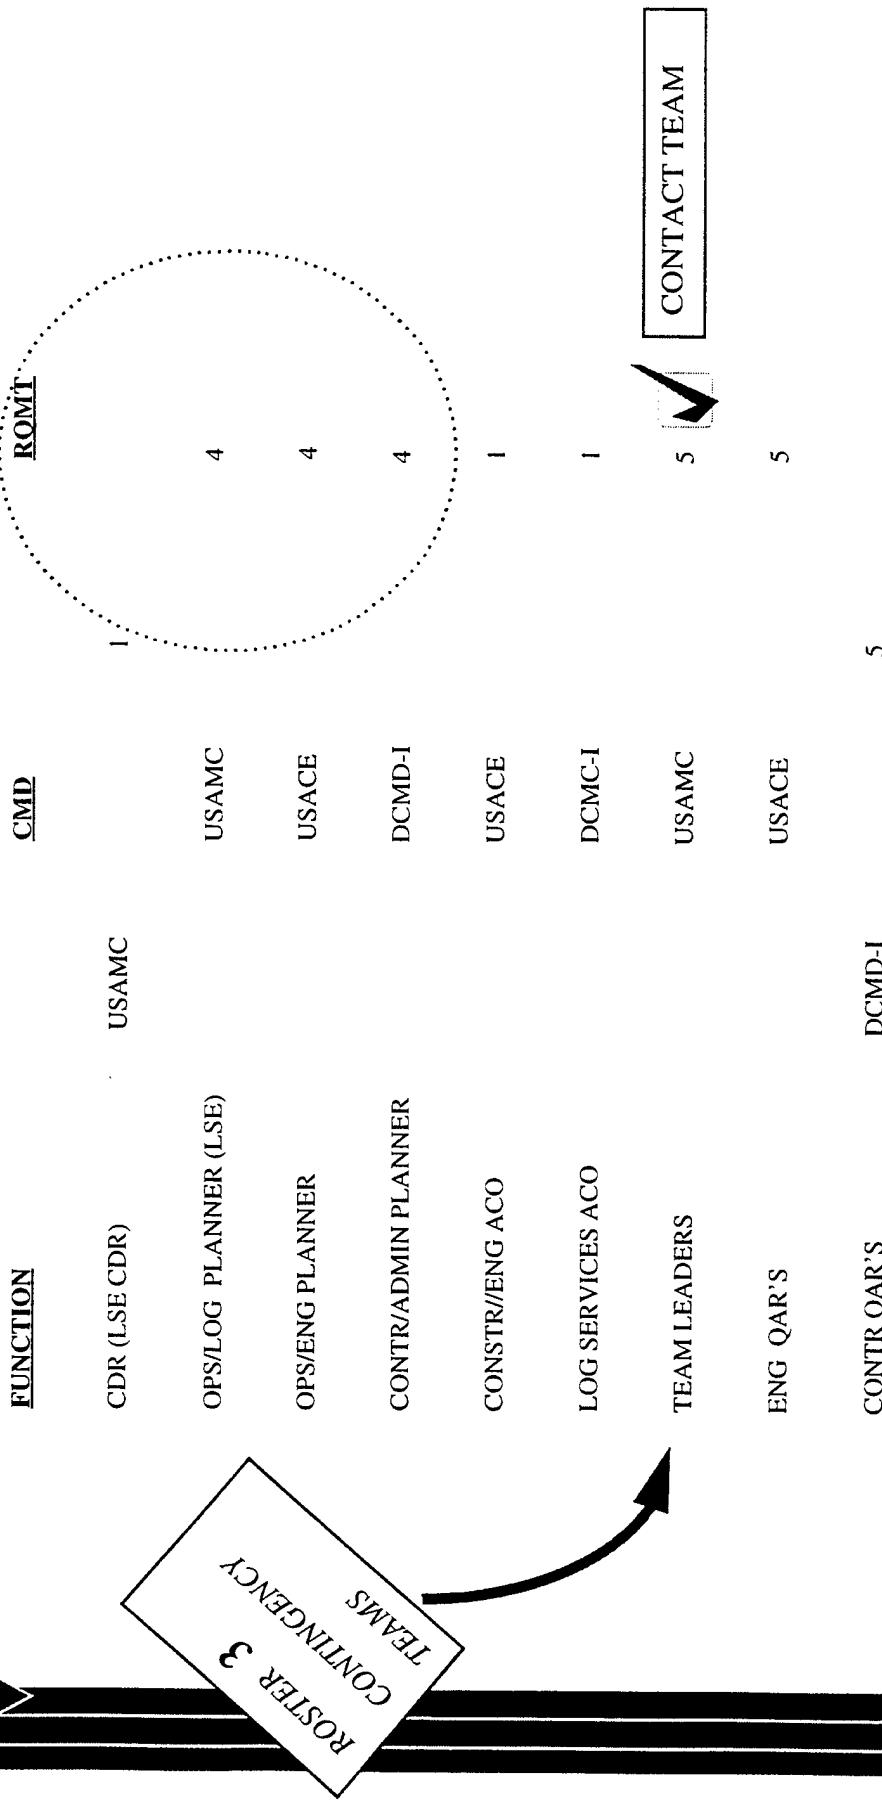

- ✓ •“Provide assistance to commands when LOGCAP is implemented to include deployable management teams”
 - ✓ •“Develop doctrine and guidance for implementing LOGCAP that identify the way to use the contractor effectively”

AMC - RELEVANT, RESPONSIVE & READY

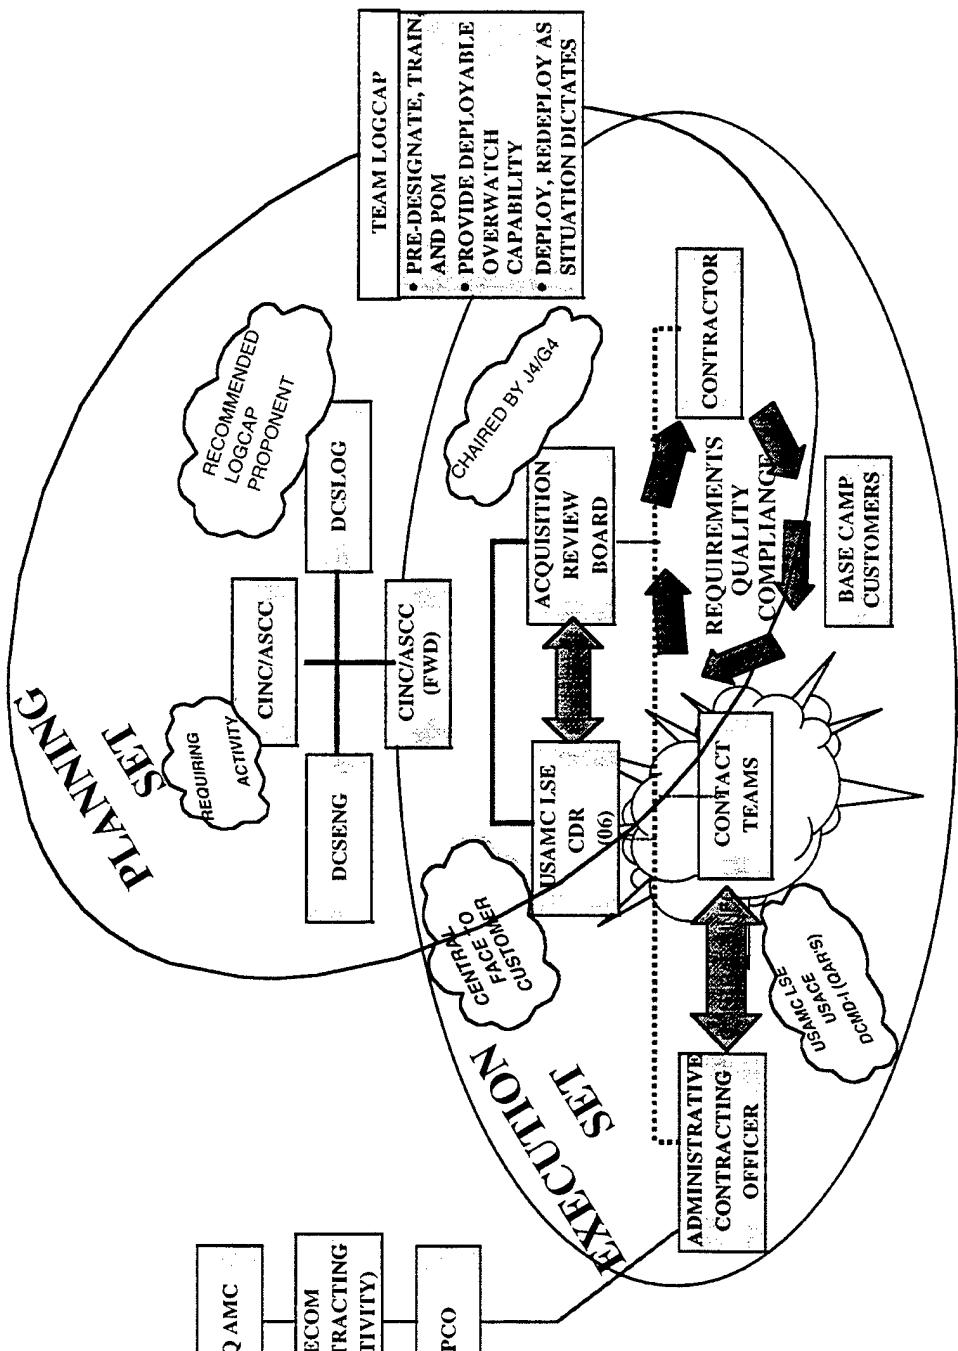

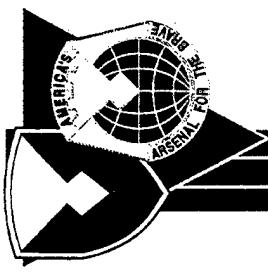

RESERVE COMPONENT LOGCAP SUPPORT OPPORTUNITIES

Represents a worst case, single event scenario requiring 30 personnel.

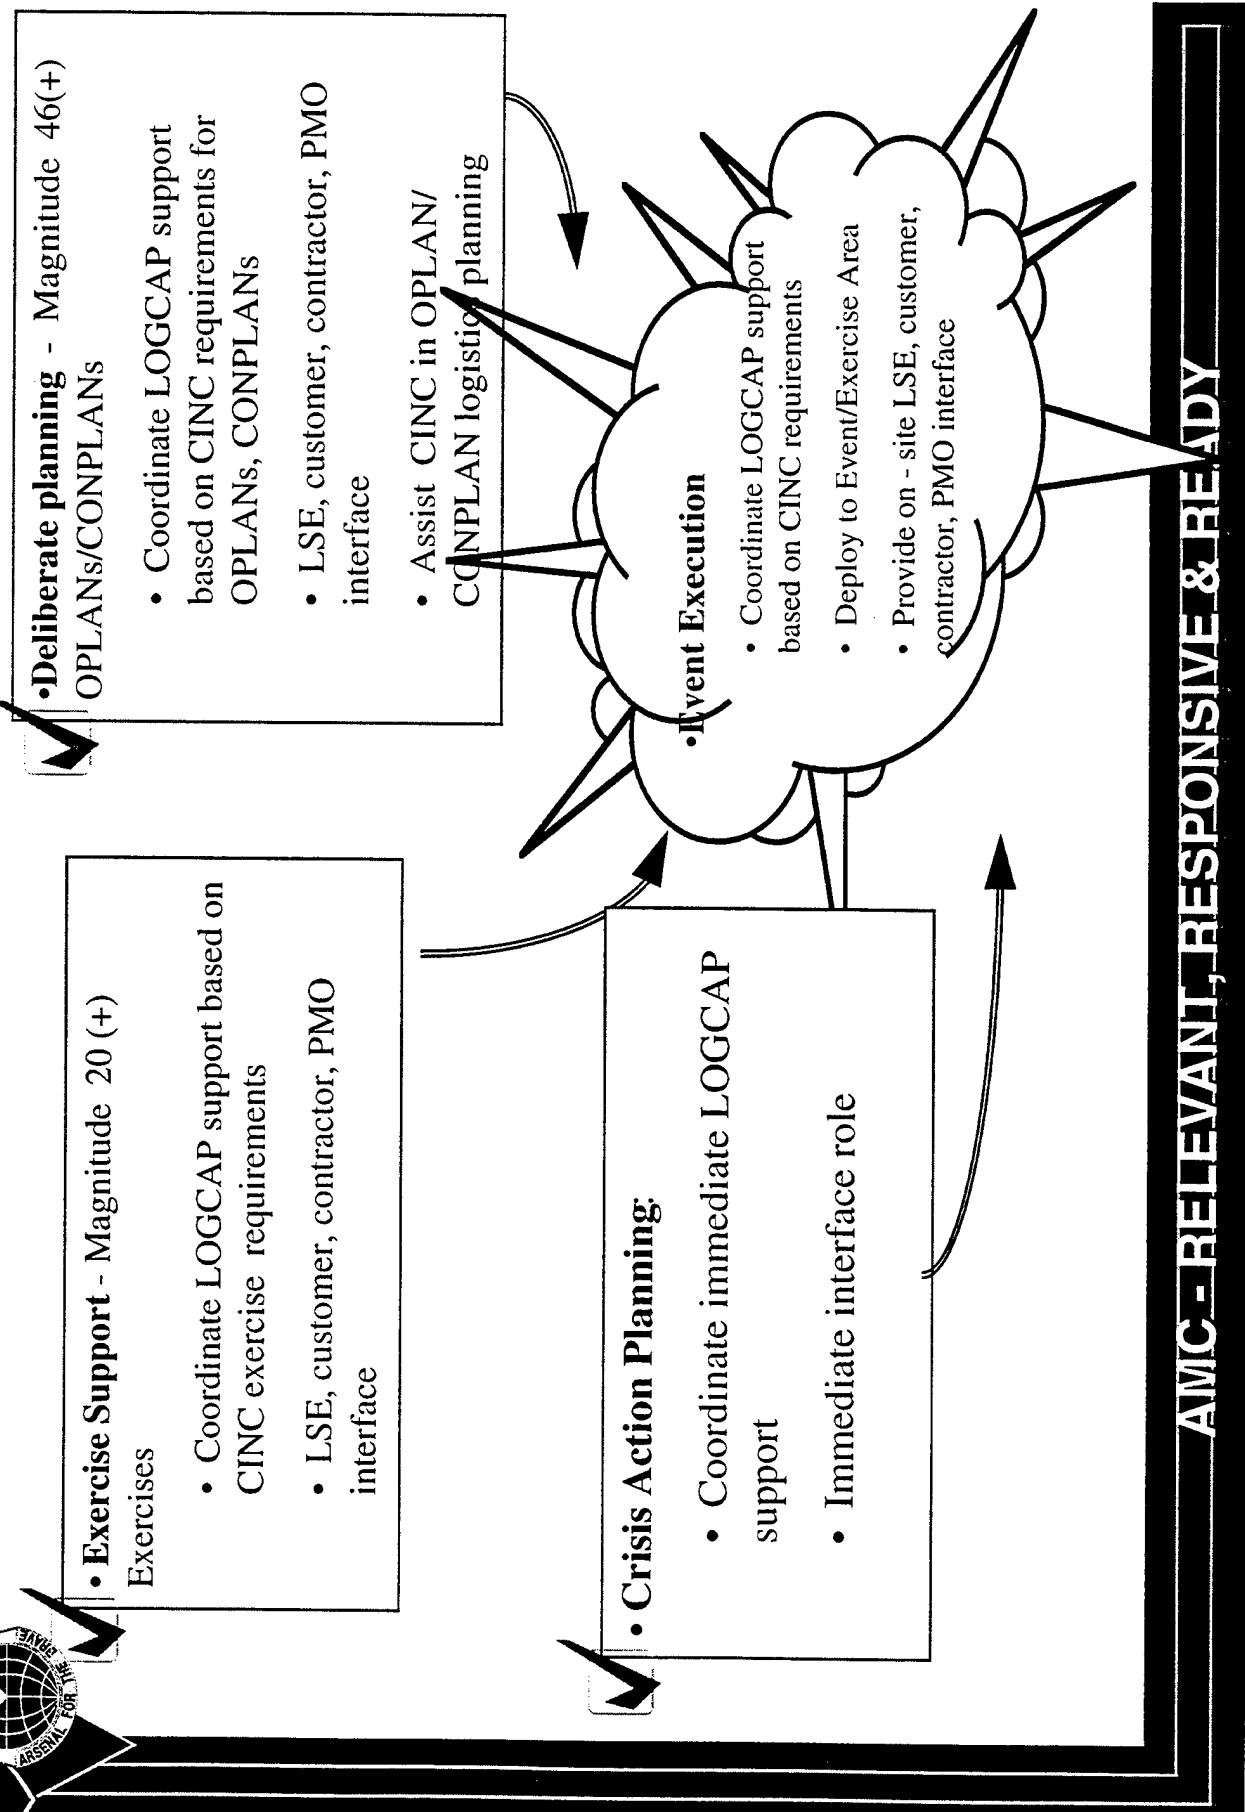

RESERVE COMPONENT LOGCAP SUPPORT OPPORTUNITIES

AMIC-E RELEVANT, RESPONSIVE & READY

RESERVE COMPONENT LOGCAP SUPPORT OPPORTUNITIES

CONCLUSION:

- *Provide response to OCAR request TO DEFINE RC support of LOGCAP*
- *Justify personnel requirements for LOGCAP SUPPORT*

- *Options:*
 - *Roster RC support personnel at PMO, LOGCAP through TDA at HQ, AMC?*
 - *Roster full time RC LOGCAP support personnel with a mix of personnel from existing logistical commands (ADSW/TTADS)?*
 - *Support LOGCAP through available mix from options above?*
